English Today

English Today will interest everyone concerned with or fascinated by the English language — teachers and advanced students of English as a first or second language; linguists, writers, broadcasters and journalists; and anyone with a broad, general interest in English. It covers all aspects of the language, including its uses and abuses, its international variations, its history, literature and linguistics, and its usages and neologisms. Special articles and regular features keep readers up to date with current opinion and recent developments. Vigorous debates continue on the nature and teaching of the international standard language, academic models of the language and the influence of new communication technologies on English.

Internet for English Teaching

Mark Warschauer, Heidi Shetzer, and Christine Meloni

For educators from many backgrounds, *Internet for English Teaching* combines teaching suggestions, research, and theory to deliver up-to-date information about multiclass on-line projects, multimedia authoring, distance education, and networking for professional development.

"This is one of those times when the sequel surpasses the original. *Internet for English Teaching* offers English teachers everything they need to keep themselves abreast of the teaching, technical, and practical issues of computer-mediated instruction."

—Ron Corio, ESL instructor, Virginia Commonwealth University

Technology-Enhanced Learning Environments

Elizabeth Hanson-Smith, Editor

Presenting case studies from Europe, North and South America, Asia, and the Middle East, this volume demonstrates how teachers have adapted and pioneered teaching innovations that range from simple additions to traditional classroom teaching to radical alternatives that change the nature of language learning and teaching. In these technology-enhanced learning environments, learning centers, classrooms, and labs become spaces in which students and their teachers explore, create, and communicate as they learn language.
