

THE SOVIETS IN WORLD AFFAIRS

1917-1929

BY LOUIS FISCHER

Here, in a reissue with a new introduction, is the full text of one of the most famous books on the Soviet Union ever written. It is based on sources to which Louis Fischer had access during his sixteen years' residence in Russia and which, in large part, are no longer available. Not only did Mr. Fischer have the unique advantage of working in Soviet archives, but he also had many long and frank interviews with the men who made Soviet policy during the dozen years after the Bolshevik Revolution.

"The only serious comprehensive work in any language on Soviet foreign policy during its first decade. . . . It presents an unusually clear and vivid picture which will be supplemented and deepened but is unlikely to be superseded."

Times Literary Supplement

"It is today an even more important book for American readers than it appeared to be twenty-one years ago."

Saturday Review of Literature

"A remarkably able, well-informed, and illuminating study."

Manchester Guardian

"This work, which has long been out of print, deserves renewed study on the occasion of its republication."
