*Antiquity* remains neutral with regard to jurisdictional claims in maps supplied by authors.

*Cover. Excavations at the reconstructed heritage site of Castell Henllys have revealed the ubiquity of plastic waste, here particularly that associated with school-party visits, as found in the Earthwatch roundhouse. Plastics such as these disposable eating implements are entering the terrestrial as well as marine environment in a way that leaves a distinct archaeological signature of our times. For full details, see the 'The Iron Age in the Plastic Age: Anthropocene signatures at Castell Henllys' by Harold Mytum and James Meek in this issue. Photographs by A. Fairley.*
