

LASER AND PARTICLE BEAMS

Volume 13 1995

Cambridge University Press

40 West 20th Street, New York, NY 10011, USA

The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU

10 Stamford Road, Oakleigh, Melbourne 3166, Australia

Laser and Particle Beams

Pulse Power and High Energy Densities

Editor in Chief:

G. H. MILEY
 Director, Fusion Studies Laboratory,
 University of Illinois,
 103 S. Goodwin Ave, Urbana, IL 61801, USA

Emeritus Editor in Chief: HEINRICH HORA

Professor Emeritus
 University of New South Wales
 Kensington 2033, Australia

Associate Editors:

R. DAUTRAY (for Europe)
 Scientific Director, CEA Limeil, B.P. 27
 94190 Villeneuve St. Georges, France

A. H. GUENTHER (for Pulse Power)
 Scientific Advisor (Lab. Development)
 Sandia National Laboratories
 Albuquerque, NM 87115

C. YAMANAKA (for Japan)
 Director, Institute of Laser Engineering,
 Osaka University, Suita,
 565 Osaka, Japan

Editorial Board

N. G. Basov (Moscow)
 D. Cartwright (Los Alamos)
 P. van Devender (Albuquerque)
 S. Eliezer (Soreq, Israel)
 G. Kessler (Karlsruhe)
 M. H. Key (Rutherford Appleton Lab.)
 M. Kristiansen (Pulse Power Lab.,
 Texas Tech)
 R. L. McCrory (Rochester)
 G. A. Mesyats (Sverdlovsk, Russia)
 P. Mulser (Darmstadt)
 S. Nakai (Osaka)
 K. Niu (Nagatsuta)
 A. A. Offenberger (Alberta)
 A. M. Prokhorov (Moscow)
 B. Ripin (Washington)
 D. D. Ryutov (Novosibirsk)
 E. Storm (Livermore)
 J. P. Watteau (CEA Limeil)

Laser and Particle Beams is an international journal that covers the generation, and the interaction with matter, of high intensity laser and particle beams. It also covers the physics of systems with high energy densities. Specific fields of interest include nuclear fusion, especially inertial confinement, magnetic confinement, diagnostics, material treatment, laboratory astrophysics, plasmas and spectroscopy at extreme conditions, physical properties of hot dense matter and intense particle beams and optical (laser) beams from the microwave to the X-ray region. The exploration of these fields and their new physics, including nonlinear and nonclassical phenomena, should find a forum in this journal.

As well as publishing original articles the journal also publishes occasional review articles, surveys of research at particular laboratories and reviews of recent books.

Copying: This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$11.00 + .10. This consent does not extend to multiple copying for promotional or commercial purposes. Code 5/0263-0346/95 \$11.00 + .10.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission must be sought from Cambridge University Press.

Subscriptions: *Laser and Particle Beams* (ISSN 0263-0346) is published quarterly. The subscription price for institutions (which includes postage) of Volume 13, 1995 is US \$333 for the US, Mexico, and Canada (UK £175 elsewhere). Individual rates: US \$95 in the US, Mexico, and Canada; UK £60 elsewhere. Single parts cost US \$84 for the US, Mexico, and Canada (UK £50 elsewhere) plus postage. Four parts form a volume. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent, or direct to the publishers: Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211, USA; orders outside the US, Canada, or Mexico may be sent to Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, England. Claims for missing issues should be made immediately after receipt of the next issue. POSTMASTER: Send address changes in the US, Mexico, and Canada to *Laser and Particle Beams*, Cambridge University Press, 110 Midland Avenue, Port Chester, NY 10573-9864.

Second Class Postage paid at New York, NY and at additional mailing offices.

CONTENTS OF VOLUME 13

TABLE OF CONTENTS LASER AND PARTICLE BEAMS

Vol. 13 1995

NUMBER 1

Preface: G.H. Miley	1
<i>Papers presented at the 11th International Workshop on Laser Interaction and Related Plasma Phenomena, Monterey, CA, USA, October 25-29, 1993</i>	
J. Davis, R. Clark, and J. Giuliani (Plasma Phys. Division, Naval Research Lab., Washington, DC, USA): Ultrashort pulse laser-produced Al/Si Plasma	3
A.A. Offenberger (Univ. of Alberta, Canada), W. Blyth, S.G. Preston, J.S. Wark (Univ. of Oxford, Oxford, UK), A.E. Dangor, A. Modena, Z. Najmudin (Imperial College of Sci., London, UK), A. Djaoui and M.H. Key (Rutherford Appleton, Lab., Chilton, UK): Optical ionization and heating of gases by intense picosecond KrF laser radiation	19
Claude Phipps (Los Alamos Nat. Lab., Los Alamos, NM, USA): LISK-BROOM: A laser concept for clearing space debris	33
S. Eliezer, J.M. Martinez-Val, (Univ. Politecnica de Madrid, Spain), and C. Deutsch (Univ. de Paris XI, Orsay Cedex, France): Inertial fusion targets driven by cluster ion beam: The hydrodynamic approach	43
B.W. Boreham (Univ. of Central Queensland, Rockhampton, Australia), and H. Hora (Univ. of New South Wales, Kensington, Australia): Energy spectra of electrons emitted from laser irradiated low-density gas and the correspondence principle of electromagnetic interaction	71
E. Kolka, S. Eliezer, and Y. Paiss (Soreq Nuclear Research Center, Yavne, Israel): Miniature magnetic bottle confined by circularly polarized laser light	83
L.-T.S. Lin, M.A. Prelas, Z. He (Univ. of Missouri-Columbia, MO, USA), J.T. Bahns, W.C. Stwalley (Univ. of Connecticut, CT, USA), G.H. Miley, M. Petra (Univ. of Illinois, Urbana, IL, USA), E.G. Batyrbekov (Nuclear Phys. Inst., Alma-Ata, Kazakhstan), and Y.R. Shaban (Alexandria, Egypt): Design of an ICF plant using a nuclear-driven solid-state laser	95
Regular Papers	
A.V. Karelin, S.I. Yakovlenko (Russian Acad. of Sciences), V.F. Tarasenko and A.F. Fedenev (Russian Acad. of Sciences Siberian Division): High-pressure He-Cd and He-Zn lasers pumped by a hard ionizer	111
S.P. Moo and C.S. Wong (Univ. of Malaya, Kuala Lumpur, Malaysia): Time-resolved hard X-ray emission from a small plasma focus	129
A. Kitamura, T. Asahina, Y. Furuyama, and T. Nakajima (Kobe Univ. of Mercantile Marine, Kobe, Japan): Near-threshold ablation of target material irradiated with pulsed ion beams	135

N.A. Ebrahim and S.R. Douglas (Chalk River Lab., Ontario, Canada): Acceleration of particles by relativistic electron plasma waves driven by the optical mixing of laser light in a plasma	147
Book Review: Heinrich Hora	173

NUMBER 2

Special Issue: Papers from the 6th International Workshop on Atomic Physics for Ion-Driven Fusion, November 7–12, 1993, Santa Fe, New Mexico, USA.

G.H. Miley: Editor's Preface	177
T.A. Mehlhorn: Guest Editor's Preface	179
W. Laux, J. Jacoby, and D.H.H. Hoffmann (Gesellschaft für Schwerionenforschung, Darmstadt, Germany): X-ray diagnostics of dense plasmas produced by high-energy heavy ions	183
P. Wang, J.J. MacFarlane, and G.A. Moses (Univ. of Wisconsin, Madison, WI, USA): Effects of multiple ionization on the K_{α} spectrum of aluminum in intense lithium beam experiments	191
X. Kang, K. Masugata, and K. Yatsui (Nagaoka Univ. of Tech., Niigata, Japan): Evaluation of ablation plasma characteristics of intense, pulsed, ion-beam evaporation	201
C. Deutsch and N.A. Tahir (Univ. Paris XI, Orsay Cedex, France): Fragmentation and stopping of heavy cluster ions in a lithium target	211
A. Tauschwitz, E. Boggasch (Max-Planck-Inst., Garching, Germany), D.H.H. Hoffmann, J. Jacoby (Gesellschaft für Schwerionenforschung, Darmstadt, Germany), U. Neuner, M. Stetter, S. Stöwe, R. Tkotz (Physikalisches Inst., Erlangen, Germany), M. de Magistris (Univ. di Napoli, Napoli, Italy), and W. Seelig (Inst. für Angewandte Physik, Darmstadt, Germany): Heavy-ion beam focusing with a wall-stabilized plasma lens	221
J.J. MacFarlane, P. Wang (Univ. of Wisconsin, Madison, WI, USA), J.E. Bailey, T.A. Mehlhorn, and R.J. Dukart (Sandia Nat. Labs., Albuquerque, NM, USA): Plasma diagnostics using K_{α} satellite emission spectroscopy in light ion beam fusion experiments	231
S.A. Slutz (Sandia Nat. Labs., Albuquerque, NM, USA): Analytic optimization of ion driven hohlraums	243
T. Blenski and S. Morel (Ecole Polytech. Féd. de Lausanne, Lausanne, Switzerland): Application of Hartree-Fock theory of fluctuations to opacity calculation	255
G. Maynard, C. Deutsch, P. Fromy, and K. Katsonis (CNRS, Univ. Paris XI, Orsay, France): Atomic physics for inertial fusion using average correlated hydrogenic atom model	271
P. Sigmund and A. Nørmann (Odense Univ., Odense M, Denmark): Charge-exchange and energy-loss statistics of swift penetrating ions	281
M. Chabot, D. Gardès, J. Kiener, S. Damache, B. Kubica (IPN, Orsay, France), C. Deutsch, G. Maynard, M. Pouey (LPGP, Orsay, France), W. André, C. Fleurier, D. Hong (GREMI, Orléans, France), K. Wohrer (GPS, Paris VI, France), and D.H.H. Hoffmann (GSI, Darmstadt, Germany): Charge-state distributions of chlorine ions interacting with cold gas and with fully ionized plasma	293
V.L. Jacobs (Naval Research Lab., Washington, DC, USA) and A.B. Filuk (Sandia Nat. Labs., Albuquerque, NM, USA): Polarization of atomic radiative transitions in crossed electric and magnetic fields	303

G. Zwicknagel, C. Toepffer, and P.-G. Reinhard (Univ. Erlangen, Erlangen, Germany): Stopping power of heavy ions in strongly coupled plasmas	311
E.J. McGuire (Sandia Nat. Lab., Albuquerque, NM, USA): Systematic ion-atom interaction cross sections and stopping powers in the plane wave Born approximation	321
E. Nardi and Z. Zinamon (Weizmann Inst. of Science, Rehovot, Israel): The interaction of large fast carbon clusters with plasma	335
W. Jiang, T. Sakagami, K. Masugata, and K. Yatsui (Nagaoka Univ. of Tech., Niigata, Japan): Three-dimensional, tight focusing of intense pulsed light-ion beam by spherical plasma focus diode	343

NUMBER 3

Mark A. Prelas (Univ. of Missouri, Columbia, MO, USA): Lasers with combined nuclear pumping	351
R.W. John (Max-Born Institut, Berlin, Germany): The inversion condition for the X-ray Balmer- α transition in consideration of the modeled time-dependent Lyman- α reabsorption in a rapidly recombining laser-produced plasma	365
Mostafa Hemmati (Arkansas Tech Univ., AR, USA): Electron shock waves moving into an ionized medium	377
Shigeo Kawata (Nagaoka Univ. of Tech, Nagaoka, Japan): Inhomogeneous mixing of D and T fuels in inertial confinement fusion	383
N.K. Gupta and V. Kumar (Bhabha Atomic Research Center, Bombay, India): Angular dependence of M and N band radiation and the effect of angular anisotropy on the total conversion efficiency of X rays emitted from a laser irradiated gold foil	389
W. Brunner and R.W. John (Max-Born Institut, Berlin, Germany): Time dependence of the inversion condition and optimized X-ray emission in recombining laser-produced plasmas	403
J. Hecht, D. Ofer, U. Alon, D. Shvarts (Nuclear Research Centre Negev, Beer-Sheva, Israel), S.A. Orszag (Princeton Univ., Princeton, NJ, USA), D. Shvarts, and R.L. McCrory (Univ. of Rochester, Rochester, NY, USA): Three-dimensional simulations and analysis of the nonlinear stage of the Rayleigh-Taylor instability	423
S. Eliezer (Politech. Univ. of Madrid, Madrid, Spain and SOREQ N.R.C., Yavne, Israel), H. Hora (CERN, Geneva, Switzerland), E. Kolka, H. Szichman (SOREQ N.R.C., Yavne, Israel), and F. Green (CSIRO, Lindfield-West NSW, Australia): How double layers accelerate charged particles	441

NUMBER 4

<i>Papers from the 23rd European Conference on Laser Interaction with Matter, St. John's College, Oxford, 19-23 September 1994</i>	
Preface: G.H. Miley	449
R.A. Cairns, D. Johnson (Univ. of St. Andrews, St. Andrews, Fife, UK), and R. Bingham (Rutherford Appleton Lab., Chilton, Didcot, Oxon, UK): Laser wakefield and beat-wave generation by multiple and chirped laser pulses	451

S. Borgström, T. Starczewski, S. Svanberg, C.-G. Wahlström (Lund Inst. of Tech., Lund, Sweden), E. Fill, and J. Steingruber (Max-Planck-Inst., Garching, Germany): Time-resolved X-ray spectroscopy of optical-field-ionized plasmas	459
T. Ceccotti, S. Bastiani, A. Giulietti, V. Biancalana, P. Chessa (Istituto di Fisica Atomica e Molecolare, Pisa, Italia), D. Giulietti (Università di Pisa, Pisa, Italia), and C. Danson (Rutherford Appleton Lab., Chilton, Didcot, UK): A study of random phased laser spots	469
R.K. Thareja, Abhilasha, and R.K. Dwivedi (Indian Inst. of Tech., Kanpur, India): Optical emission spectroscopy of laser-produced carbon plasma at moderate and low irradiance in an ambient atmosphere	481
S. Bastiani, A. Giulietti, L.A. Gizzi, T. Ceccotti, A. Macchi (Istituto di Fisica Atomica e Molecolare, Pisa, Italy), and D. Giulietti (Università di Pisa, Pisa, Italy): A study of laser plasmas as X-ray sources in the 1–10 keV spectral region	493
O. Renner, E. Krouský (Inst. of Physics, Academy of Sciences of the Czech Republic, Prague, Czech Republic), T. Mißalla, E. Förster, and G. Hölzer (Max-Planck-Gesellschaft at the Friedrich-Schiller-Universität Jena, Jena, Germany): High-precision measurement of velocity profiles in laser-created chlorine plasma	503
L.A. Gizzi, A.J. MacKinnon, D. Riley, S.M. Viana, and O. Willi (The Blackett Lab., Imperial College of Science, London, England): Measurements of thermal transport in plasmas produced by picosecond laser pulses	511
H.C. Barr, T.J.M. Boyd, F.I. Gordon, and S.J. Berwick (Univ. of Essex, Colchester, England): Stimulated Raman scattering in plasmas produced by short intense laser pulses	525
Regular Papers	
I.V. Aleksandrova, E.R. Koresheva, I.E. Osipov (Lebedev Physical Inst., Moscow, Russia), and L.V. Panina (Nagoya Univ., Nagoya, Japan): Cryogenic targets for modern ICF experiment	539
Sarang Medhekar, X. Rajkamal (Inst. of Computer Science, Electronics and Instrumentation, Devi Ahilya Univ., Indore, India), and S. Konar (School of Energy Studies, Devi Ahilya Univ., Indore, India): Successive uptapering and stationary self-trapped propagation of a laser beam in a saturating nonlinear medium	559
Book Review: Heinrich Hora	569
Index	571

PINPOINT YOUR FUTURE
with CAMBRIDGE BOOKS

Optical Physics

Third Edition

S.G. Lipson, H. Lipson, and D.S. Tannhauser

Praise for the Second Edition:

"...an up-to-date survey of modern optics...it will be an excellent choice of text for...a course in optics."

— *Applied Optics*

1995 515 pp.
43047-X Hardback \$84.95
43631-1 Paperback \$34.95

Optical Polarization of Molecules

Marcis Auzinsh and Ruvin Ferber

Starts with a review of molecular angular momentum before considering resonant absorption, fluorescence, photodissociation, and collisions and static fields.

Cambridge Monographs on Atomic, Molecular, and Chemical Physics 4

1995 321 pp.
44346-6 Hardback \$84.95

Optical Methods of Engineering Analysis

Gary L. Cloud

Efficiently integrates optics theory with the development of optical methods.

1995 515 pp.
45087-X Hardback \$79.95

Design Issues in Optical Processing

John N. Lee, Editor

Provides a detailed review of key issues in the design, evaluation, and implementation of practical systems for signal processing and optical interconnection.

Cambridge Studies in Modern Optics 16

1995 292 pp.
43048-8 Hardback \$59.95

Optical Effects of Ion Implantation

P.D. Townsend, P.J. Chandler, and L. Zhang

Gives a detailed description of the factors and processes that govern the optical properties of ion implanted materials, as well as the devices that can be produced in this way.

Cambridge Studies in Modern Optics 13

1994 294 pp.
39430-9 Hardback \$54.95

Now in paperback...

Photodissociation Dynamics

Spectroscopy and Fragmentation of Small Polyatomic Molecules

Reinhard Schinke

"...destined to become standard reading for graduate students about to embark on research careers in chemical dynamics..."

— *Jim Baggott, Science*

Cambridge Monographs on Atomic, Molecular, and Chemical Physics 1

1993 432 pp.
38368-4 Hardback \$94.95
48414-6 Paperback \$39.95

A NEW BENCHMARK IN OPTICS

*Cambridge University Press is extremely pleased to
announce the publication of*

Optical Coherence and Quantum Optics

Leonard Mandel, University of Rochester

Emil Wolf, University of Rochester

Written by two of the world's most highly regarded optical physicists, this book is a systematic treatment of the broad area that deals with the coherence and fluctuation of light. The authors begin with a review of probability theory and random processes, and follow this with a thorough discussion of optical coherence theory within the framework of classical optics. They next treat the theory of photoelectric detection of light and photoelectric correlation. They then discuss in some detail quantum systems and effects. The book closes with two chapters devoted to laser theory and one on the quantum theory of non-linear optics. This book is required reading of all physicists and engineers working in optics.

1995 c. 1100 pp.

4 halftones 290 line diagrams

Information for Contributors

1. Manuscripts must be written in English. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favorable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Associate Editor or the Editor.
2. Manuscripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, phone and/or fax numbers, position, and affiliations. Authors are urged to send in their final manuscripts on disks as well as on hard copy.
3. The title and section headings should highlight the significant points. A short abstract should precede the main text.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables.
7. References and footnotes should be cited according to the Harvard (Author/date) system, also known as the "British form". In the text, author and year are cited in parentheses, e.g. "... was found by McCarthy (1980, 1980a)..." or "(Emmett *et al.* 1972)". Full references are listed in alphabetic order at the end of the paper. References are not numbered. An example of a reference list is:

DEUTSCH, C. & KLARSFELD, S. 1973 *Phys. Rev. A* 7, 2081.
NICHOLSON, D.R. 1983 *Plasma Theory* (John Wiley, New York).
OOMURA, H. *et al.* 1982a *Res. Rep. ILE*, ILE-8207p.
OOMURA, H. *et al.* 1982b *Trans. Ans.* 43, 617.

Note that the year of publication appears after the author's name. If possible, all authors names should be listed in preference to "*et al.*" If one author or team is referred to more than once in any year, the letters *a*, *b*, etc., should be added after the year to distinguish the individual references.
8. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 off-prints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

LASER AND PARTICLE BEAMS

Pulse Power and High Energy Densities

Volume 13, Number 4, 1995

Papers from the *23rd European Conference on Laser Interaction with Matter*, St. John's College, Oxford, 19–23 September 1994

Preface: G.H. Miley 449

R.A. Cairns, D. Johnson (Univ. of St. Andrews, St. Andrews, Fife, UK), and R. Bingham (Rutherford Appleton Lab., Chilton, Didcot, Oxon, UK): Laser wakefield and beat-wave generation by multiple and chirped laser pulses 451

S. Borgström, T. Starczewski, S. Svanberg, C.-G. Wahlström (Lund Inst. of Tech., Lund, Sweden), E. Fill, and J. Steingruber (Max-Planck-Inst., Garching, Germany): Time-resolved X-ray spectroscopy of optical-field-ionized plasmas 459

T. Ceccotti, S. Bastiani, A. Giulietti, V. Biancalana, P. Chessa (Istituto di Fisica Atomica e Molecolare, Pisa, Italia), D. Giulietti (Università di Pisa, Pisa, Italia), and C. Danson (Rutherford Appleton Lab., Chilton, Didcot, UK): A study of random phased laser spots 469

R.K. Thareja, Abhilasha, and R.K. Dwivedi (Indian Inst. of Tech., Kanpur, India): Optical emission spectroscopy of laser-produced carbon plasma at moderate and low irradiance in an ambient atmosphere 481

S. Bastiani, A. Giulietti, L.A. Gizzi, T. Ceccotti, A. Macchi (Istituto di Fisica Atomica e Molecolare, Pisa, Italy), and D. Giulietti (Università di Pisa, Pisa, Italy): A study of laser plasmas as X-ray sources in the 1–10 keV spectral region 493

O. Renner, E. Krouský (Inst. of Physics, Academy of Sciences of the Czech Republic, Prague, Czech Republic), T. Mißalla, E. Förster, and G. Hölzer (Max-Planck-Gesellschaft at the Friedrich-Schiller-Universität Jena, Jena, Germany): High-precision measurement of velocity profiles in laser-created chlorine plasma 503

L.A. Gizzi, A.J. Mackinnon, D. Riley, S.M. Viana, and O. Willi (The Blackett Lab., Imperial College of Science, London, England): Measurements of thermal transport in plasmas produced by picosecond laser pulses 511

H.C. Barr, T.J.M. Boyd, F.I. Gordon, and S.J. Berwick (Univ. of Essex, Colchester, England): Stimulated Raman scattering in plasmas produced by short intense laser pulses 525

Regular Papers

I.V. Aleksandrova, E.R. Koresheva, I.E. Osipov (Lebedev Physical Inst., Moscow, Russia), and L.V. Panina (Nagoya Univ., Nagoya, Japan): Cryogenic targets for modern ICF experiment 539

Sarang Medhekar, X. Rajkamal (Inst. of Computer Science, Electronics and Instrumentation, Devi Ahilya Univ., Indore, India), and S. Konar (School of Energy Studies, Devi Ahilya Univ., Indore, India): Successive uptapering and stationary self-trapped propagation of a laser beam in a saturating nonlinear medium 559

Book Review: Heinrich Hora 569
