

Dionysian Art and Populist Politics in Austria

William J. McGrath

Vienna at the turn of the century felt the impact of an extraordinary student movement whose leaders dreamed of welding art and politics into a vital national culture that would replace what they regarded as a sterile and fragmented society. This unusual interdisciplinary study traces the relationships between the political and artistic manifestations of this important cultural movement. \$12.50

NEW GERMAN CRITIQUE

An Interdisciplinary Journal of German Studies.

New German Critique is an independent socialist journal of modern German society, culture, politics, and theory. The purpose of its interdisciplinary approach is to help develop a critical school in America and to eliminate the often artificial distinctions between disciplines.

Themes will include: the political economy of East and West Germany, labor history and working class culture, theories of fascism, alienation under capitalism and socialism, the Brecht-Lukács debate, Marxist aesthetics in literature and art.

The first issue, published in December 1973, contained articles on Max Weber, Heinrich Heine, Wilhelm Reich, the German New Left, the political economy of reparations, questions of organization, theories of popular literature, and child education in West Germany.

Forthcoming: special issue on East Germany with articles on the convergence theory, mass-culture, historiography, political economy, Bertolt Brecht, Johannes R. Becher and Heiner Müller, plus — a classic by composer Hanns Eisler, plus — reports, reviews, and an extensive bibliography.

The Word in Stone

The Role of Architecture in the National Socialist Ideology

Robert R. Taylor

What kind of architecture was considered appropriate for the German renaissance that allegedly was occurring under National Socialism? What was the ideal or typical "German" style? What concepts and values should genuinely "German" architecture express? Historians have suggested that German leaders were generally indifferent to architecture; Taylor argues, however, that it was intended as government propaganda for national unity. In support of his thesis he reviews the speeches, conversations, and diaries of Nazi leaders, as well as relevant published works of the time.

Island Refuge

Britain and Refugees from the Third Reich, 1935-1939

A. J. Sherman

The acrimonious debate over British policy toward refugees from Nazi Germany has scarcely died down even now. It has, however, become possible to investigate the truth of these charges and to analyze the British reaction to these refugees. The first authoritative account is based on government and private papers only recently released for public scrutiny.
