# DEVELOPMENT AND PSYCHOPATHOLOGY

 Cambridge  
Journals

---

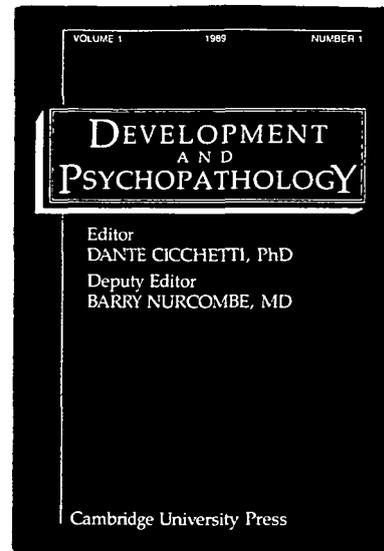

## EDITORS:

Dante Cicchetti, *University of Rochester*  
Barry Nurcombe, *Child and Adolescent  
Psychiatric Hospital, Vanderbilt University*

This multidisciplinary journal is devoted to the publication of original empirical, theoretical and review papers which address the interrelationship of normal and pathological development in adults and children. It is intended to serve and integrate the emerging field of developmental psychopathology which strives to understand patterns of adaptation and maladaptation *throughout* the life span. Explorations of abnormal functioning in the social, emotional, cognitive, linguistic and biological domains help to clarify normal developmental processes. Reciprocally, elucidations of principles of normal development help to broaden our understanding of psychopathological conditions. Contributions may also be on the processes underlying the adaptive outcomes in populations "at risk" for psychopathology. This journal is of vital interest to psychologists, psychiatrists, social scientists, neuroscientists, pediatricians and researchers.

*Development and Psychopathology* (ISSN 0954-5794) is published quarterly. Subscriptions to Volume 1 (1989) or Volume 2 (1990) are each \$75.00 for institutions; \$35.00 for individuals; single parts \$20.00.

# BEHAVIORAL and BRAIN SCIENCES

Cambridge  
Journals

---

EDITOR:

Stevan Harnad, *Princeton, NJ*

*Behavioral and Brain Sciences* publishes particularly significant and controversial "target articles." These have been successful in drawing out the leading investigators in a wide range of fields who discuss, debate and critically analyze topics of current interest to the entire biobehavioral science community. Fascinating and often surprising results come from the 20-30 open peer commentaries on each target article from psychologists, linguists, philosophers, neuroscientists, anthropologists, developmentalists and other specialists within and across these disciplines.

*Selected Papers*

Sex differences in human mate preferences:  
Evolutionary hypothesis tested in 37 cultures,  
*D.M. Buss*

A solution to the tag-assignment problem for neural  
networks, *Gary W. Strong, Bruce A. Whitehead*

Strategies for the control of voluntary movements  
with one degree of freedom, *G.L. Gottlieb et al.*

Numerical competence in animals: Definitional  
issues, current evidence and a new research agenda,  
*H. Davis, R. Perusse*

Genetic similarity, human altruism, and group  
intelligence, *J. Philippe Rushton*

*Behavioral and Brain Sciences* (ISSN 0140-525X) is  
published quarterly. Subscription to Volume 13 1990 (US  
and Canada only): \$164.00 for institutions; \$69.00 for  
individuals; single parts \$45.00.

Back Volumes: 1-12 (1978-1989) \$160.00 each.

# PSYCHOLOGICAL SCIENCE

*Published for the  
American Psychological Society*

---

Cambridge  
Journals

---

## EDITOR

William K Estes, *Harvard University*

*Psychological Science* is a new bimonthly publication being launched as the flagship journal of the American Psychological Society, founded 1988, to regain the scientific focus of psychological research. The journal is designed to be the forum for research, theory, and application in psychology and the closely related behavioral, cognitive, neural, and social sciences. The journal also considers psychology in government and public affairs. Unlike most research journals, *Psychological Science* encourages articles of general theoretical significance or of broad interest across specialties.

## Recent Articles

The Prenatal Origins of Behavioral Organization,  
*William P Smotherman and Scott R Robinson*

Facts, Fantasies, and the Future of Child Care in  
the United States, *Sandra Scarr et al.*

Serial vs Parallel Processing, *James T Townsend*

Answering Reading Comprehension Items Without  
Passages on the SAT, *Stuart Katz et al.*

Infants' Perception of Phase Structure in Music,  
*Carol L Krumhansl and Peter W Jusczyk*

*Psychological Science* (ISSN 0956-7976) is published bimonthly. Volume 1 (1990) subscriptions (US and Canada only): \$100.00 institutions; \$50.00 for non-member individuals. APS members receive the journal as part of their dues.

# V I S U A L N E U R O S C I E N C E

Volume 5

December 1990

Number 6

## CONTENTS

### *Research Articles*

- DIETMAR PUM, 511 Iso-orientation areas in the foveal cone mosaic  
PETER K. AHNELT, AND  
MARKUS GRASL
- EARL L. SMITH, III, 525 Orientation bias of neurons in the lateral geniculate nucleus  
YUZO M. CHINO, of macaque monkeys  
WILLIAM H. RIDDER, III,  
KOSUKE KITAGAWA, AND  
ANDY LANGSTON
- D.I. FLITCROFT 547 A neural and computational model for the chromatic control  
of accommodation
- BONNIE E. AIKEN AND 557 Visual reaction time of cats to different spatial frequencies  
MICHAEL S. LOOP
- T.R. VIDYASAGAR AND 565 Relationship between preferred orientation and ordinal  
G.H. HENRY position in neurones of cat striate cortex
- WALLACE B. THORESON AND 571 Effects of synaptic blocking agents on the depolarizing  
DWIGHT A. BURKHARDT responses of turtle cones evoked by surround illumination
- ARI SITARAMAYYA AND 585 Photoreceptor rod outer segment 48-kDa protein has ATPase  
SHEREEN HAKKI activity
- A. NISHIGORI, 591 Contribution of quisqualate/kainate and NMDA receptors to  
T. TSUMOTO, AND excitatory synaptic transmission in the rat's visual cortex  
F. KIMURA

### *Short Communications*

- AVI CHAUDHURI AND 605 A new technique for estimating chromatic isoluminance in  
THOMAS D. ALBRIGHT humans and monkeys
- LEAH KRUBITZER 609 Convergence of processing channels in the extrastriate cortex  
AND JON KAAS of monkeys
- 615 Acknowledgment to *Ad Hoc* Reviewers
- 617 Detailed Information for Contributors
- 618 The Humane Care and Use of Animals
- 619 Author Index and Contents to Volume 5
