Proceedings of the Nutrition Society

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the *Directions to Contributors* as reproduced in the first issue of a recent volume of the Proceedings (February), or contact the Editorial Office on +44 (0) 171 371 6225 (telephone) or +44 (0) 171 602 1756 (fax) or i.sambrook@nutsoc.org.uk (e-mail).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.

Contributors of Symposium papers will be asked to assign their copyright, on ceertain conditions, to The Nutrition Society to help protect their material.

Page format. The *Proceedings* is printed in double-column format (folumn width of 85 mm) with a text area of 235×177 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accampanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. The original illustrations should accompany the manuscript for submission. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant figures.

References. References must be based on the name and year (Harvard) system; **give full journal title**s and conform to the following styles:

Hollman PCH, Devries JHM, Vanleeuwen SD, Mengelers MJB & Katan MB (1995) Absorption of dietary quercetin glycosides and quercetin in healthy ileostomy volunteers. *American Jounnal of Clinical Nutrition* **62**, 1276–1282.

Elia M (1992) Organ and tissue contribution to metabolic rate. In *Energy Metabolism: Tissue Determinants and Cellular Corollaries*, pp. 61–77 [J Kinney and H Tucker, editors]. New York: Raven Press.

Wilmore JH & Costill DL (1994) *Physiology of Sport and Exercise*. Champaign, IL: Human Kinetics.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The Proceedings of the Nutrition Society, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Lond W6 7NJ, UK.

Manuscripts. Three complete copies of the manuscript together with the original artwork should be submitted to:

Contents

Brighton	Centre,	Brighton,	5	December	1997

Symposium on 'Lipids and the immune system' Chairs: P. C. Calder, University of Southampton; L. S. Harbige, University of Greenwich; W. J. Morrow, St Bartholomew's Hospital, London		
Dietary fatty acids and lymphocyte functions. Philip C. Calder n-3 Polyunsaturated fatty acids and immune function.	487–502	
Dayong Wu & Simin Nikbin Meydani	503-509	
Monounsaturated fats and immune function. Parveen Yagoob	511–520	
In vitro and in vivo effects of n-3 polyunsaturated fatty acids on human monocyte function. David A. Hughes	521–525	
The effects of dietary <i>n</i> -3 polyunsaturated fatty acids on neutrophils. **Richard I. Sperling**	527–534	
Dietary lipids and the inflammatory response. R. F. Grimble	535–542	
The effects of dietary lipids on gene expression and apoptosis. Gabriel Fernandes, Dean A. Troyer & Christopher A. Jolly	543-550	
Phospholipase A ₂ (EC 3.1.1.4) and D (EC 3.1.4.4) signalling in lymphocytes. Michael J. O. Wakelam & Margaret M. Harnett	551-554	
Dietary n-6 and n-3 fatty acids in immunity and autoimmune disease. Laurence S. Harbige n-6 and n-3 Essential fatty acids in rheumatoid arthritis and other rheumatic conditions. J. J. F. Belch & A. Muir		
Use of fish oil to prevent graft rejection. Helmut Grimm, Friedrich Grimminger, Stephan Korom & Werner Seeger	577–585	
St James's Hospital, Dublin, Republic of Ireland, 19 February 1998		
Symposium on 'Nutrition and the elderly' Chair: N. P. Kennedy, Trinity College, Dublin		
Protein-energy malnutrition in older subjects. John E. Morley	587–592	
Malnutrition or healthy senescence. W. Cameron Chumlea, Bruno Vellas & Shumei S. Guo Nutrition assessment methods for the older Irish adult in the clinical and community settings.	593-598	
Ruth P. Charles	599–602
