

## Announcement

### Special Issue in Honour of David Montgomery

The *Journal of Plasma Physics* announces a special issue to be published in 1996 and dedicated to Professor David Montgomery in celebration of his 60th birthday. Over the years, David Montgomery has been a leading figure in plasma physics, and his work spans a wide range of topics within the field.

The Editors invite members of the plasma physics community to submit manuscripts, either new research or pertinent review papers, for publication in this special issue. Manuscripts may address any aspect of plasma physics. They will be subject to the usual refereeing process, and also judged regarding their suitability for the special issue. Any papers that are scientifically acceptable, but judged not to be appropriate to the special issue, will, subject to the agreement of the authors, be published in the regular way.

Associate Editor Gary Zank will serve as Acting Editor for this issue, and manuscripts should be submitted to him by 31 March 1996. Publication is anticipated for late in 1996.

A committee of Professor Montgomery's former students will assist the Editor: Murshed Hossain, William Mattheus and Charles Smith, at the Bartol Research Institute; Jill and Russell Dahlburg, at the Naval Research Laboratory; and John Shebalin at NASA Langley Research Center. Questions regarding the special issue may be directed to any of the members of this committee or to Gary Zank.
