**ERRATA: THE COINCIDENCE OF FIELDS OF MODULI
FOR NON-HYPERELLIPTIC CURVES AND
FOR THEIR JACOBIAN VARIETIES**

(Nagoya Math. J., Vol. 82 (1981), 57–82)

TSUTOMU SEKIGUCHI

Theorem 6.3 should read

THEOREM 6.3. *Let (X, λ) be a principally polarized abelian variety over a field k (of characteristic $\neq 2$) of dimension 3. Then there exists a good curve C over k such that*

$$(J(C), \lambda(C)) \sim (X, \lambda).$$

With this change we must adopt the other proof. The finer result and the proof can be seen in T. Sekiguchi [Nagoya Math. J., Vol. 88 (1982), 197–212; cf., in particular Corollary 3.3.]
