Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

2014 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623)

is published quarterly in January, April, July, and October by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 30 (2014): Institutions online only US \$560.00, and online only UK and elsewhere £321.00. Individuals online only US \$281.00, and online only UK and elsewhere £158.00. Single part: US \$102.66 in the U.S.A., Canada and Mexico; UK £58.85 and elsewhere. Online only for all institutions. Print editions ceasing for 2014. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

CONTENTS

Editorial

- 1 Art of the possible?
Sarah Garner

Methods

- 3 Harmonization of ethics in health technology assessment: A revision of the Socratic approach
Bjørn Hofmann, Sigrid Droste, Wija Oortwijn, Irina Cleemput and Dario Sacchini
- 10 Responsiveness of the EQ-5D to clinical change: Is the patient experience adequately represented?
David Tordrup, Jean Mossman and Panos Kanavos
- 20 Rapid review: An emerging approach to evidence synthesis in health technology assessment
Sara Khangura, Julie Polisena, Tammy J. Clifford, Kelly Farrah and Chris Kamel
- 28 Methodological challenges in evaluating the value of registers
Jayne Taylor, Hannah Patrick, Georgios Lyratzopoulos and Bruce Campbell
- 34 How health technology assessment agencies address the issue of unpublished data
Julia Kreis, Dimitra Panteli and Reinhard Busse
- 44 Using prediction intervals from random-effects meta-analyses in an economic model
Conor Teljeur, Michelle O'Neill, Patrick Moran, Linda Murphy, Patricia Harrington, Máirín Ryan and Martin Flattery

Assessments

- 50 Cost-effectiveness of human leukocyte antigen matching in penetrating keratoplasty
Michael Bäumlér, Leonie Sundmacher, Thomas Reinhard and Daniel Böhringer
- 59 Cost-effectiveness of telehealth interventions for chronic heart failure patients: A literature review
Andrija S. Grustam, Johan L. Severens, Jan van Nijnatten, Ron Koymans and Hubertus J. M. Vrijhoef
- 69 Economic evaluation of intravenous iodinated contrast media in Italy
Sergio Iannazzo, Stijn Vandekerckhove, Maria De Francesco, Akash Nayak, Claudio Ronco, Giovanni Morana and Massimo Valentino
- 78 Semiautomated external defibrillators for in-hospital early defibrillation: A comparative study
Federico Nocchi, Pietro Derrico, Gerardina Masucci, Carlo Capussotto, Corrado Cecchetti and Matteo Ritrovato
- 90 Comparative cost-effectiveness models for the treatment of multiple myeloma
Keith Cooper, Joanna Picot, Jackie Bryant and Andrew Clegg
- 98 Attitudes and acceptance toward the technology of cryonics in Germany
Stephanie Kaiser, Dominik Gross, Jens Lohmeier, Michael Rosentreter and Jürgen Raschke

Policies

- 105 Implementation of EUnetHTA Core Model[®] in Lombardia: The VTS framework
Giovanni Radaelli, Emanuele Lettieri, Cristina Masella, Luca Merlino, Alberto Strada and Michele Tringali
- 113 Attitudes on warfarin pharmacogenetic testing in Chinese patients and public
Sze Ling Chan, Joshua Jun Wen Low, Kee Seng Chia and Hwee-Lin Wee
- 121 Health technology assessment in an Argentinean Province: Adapting existing tools
Maria Eugenia Brisson and Norberto Schapochnik

Letters

- 128** Who should conduct modeling and cost-effectiveness analysis?
Måns Rosén
- 129** Update on romiplostim and eltrombopag indirect comparison
Katy Cooper, James Matcham, Kawitha Helme and Ron Akehurst
