NET ZERO EMISSIONS IS ONLY THE BEGINNING

“With careful explanations of the technologies, policies, governance issues, and ethical dilemmas involved, Pandora’s Toolbox emerges as ‘must reading’ for all who seek to understand the pathways to a successful global response to climate change.”
DAN ESTY, Hillhouse Professor of Environmental Law and Policy, Yale University and editor of *A Better Planet: 40 Big Ideas for a Sustainable Future*

“At last, a realistic and unflinching view of the hard reality of climate choices that are coming. Smith’s treatise is that avoiding a dystopian nightmare future requires levels of political courage in our scientific convictions not seen since the Second World War.” JOHN MOORE, Chief Scientist at the College of Global Change and Earth System Science, Beijing Normal University

“In the Greek myth Pandora was curious and she opened a box thus releasing evils into the world. Here we explore the contents of the box more carefully. In it we find tools useful for climate repair. This great book gives us a ray of hope in a situation where everything looks rather bleak.” HUGH HUNT, Fellow of Trinity College, University of Cambridge

“An overview of climate change and the array of possible responses that manages to be simultaneously comprehensive, detailed, and accessible. It’s jam-packed with the sort of specific, practical detail that is usually missing in such overviews. A valuable contribution and an impressive achievement.” EDWARD A. PARSON, Dan and Rae Emmett Professor of Environmental Law and Faculty Director, Emmett Institute on Climate Change and the Environment

“A well written, accurate and entertaining guide to climate change and climate intervention techniques that gives the readers all the arguments to make up their own mind on the topic.” OLIVIER BOUCHER, Climatologist, Sorbonne Université / CNRS
