

# STUDIES IN SECOND LANGUAGE ACQUISITION

## Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in *SSLA*). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Methods Forum.** Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 11,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

### RESEARCH ARTICLES

- Complex Dynamic Systems Theory in Language Learning: A Scoping Review of 25 Years of Research*  
Phil Hiver, Ali H. Al-Hoorie, and Reid Evans 913–941
- Do L1-L2 Differences in Discourse Processing Reflect Processing Demands or Difficulty of Form-Function Mapping? Evidence from Self-Paced Listening of Contrastive Prosody*  
Eun-Kyung Lee and Scott Fraundorf 942–966
- Exploring the Relationship Between Second Language Learning Motivation and Proficiency: A Latent Profiling Approach*  
Karen Dunn and Janina Iwaniec 967–997
- Exploring Crosslinguistic Influence in Gender Marking in Spanish*  
Aarnes Gudmestad and Amanda Edmonds 998–1019
- The Relationship Between Cognitive-Linguistic Task Difficulty and L1-L2 Interaction for Academic Listening Comprehension in Turkish–Dutch Emergent Bilinguals*  
Sven Sierens, Koen Van Gorp, Stef Slembrouck, and Piet Van Avermaet 1020–1044
- Sometimes Less is More: The Effects of Phonetically Variable Input on Auditory Processing Instruction for L2 French*  
Kiwako Ito and Wynne Wong 1045–1070
- Emotion-Laden Texts and Words: The Influence of Emotion on Vocabulary Learning for Heritage and Foreign Language Learners*  
Meagan Driver 1071–1094
- Exploring an Elicited Imitation Task as a Measure of Heritage Language Proficiency*  
Megan Solon, Hae In Park, Marzieh Dehghan-Chaleshtori, Carly Carver, and Avizia Y. Long 1095–1123
- Conceptualizing L2 Vocabulary Knowledge: An Empirical Examination of the Dimensionality of Word Knowledge*  
Beatriz González-Fernández 1124–1154

### METHODS FORUM

- P-Curving as a Safeguard Against P-Hacking in SLA Research: A Case Study*  
Seth Lindstromberg 1155–1180

### RESEARCH REPORTS

- L2 Learners' Adaptation to an L2 Structure that is Different from L1: Priming of an English Causative Structure in Korean Learners*  
Heeju Hwang 1181–1193
- The Impact of Orthography on Lexical Access: The Case of Capitalization and Word Category Information in L1 and L2 German*  
Andreas Opitz and Denisa Bordag 1194–1209

### CORRIGENDUM

- Complex Dynamic Systems Theory in Language Learning: A Scoping Review of 25 Years of Research – Corrigendum*  
Phil Hiver, Ali H. Al-Hoorie, and Reid Evans 1210–1210
