

# CONTENTS.

	PAGE
<i>On Ramanujan's arithmetical function <math>\Sigma_{r,s}(n)</math>.</i> By Mr J. R. WILTON, Trinity College . . . . .	255
<i>On the Phragmén-Lindelöf principle.</i> By P. L. SRIVASTAVA, D.Phil. (Oxon.). (Communicated by Professor LITTLEWOOD) . . . . .	265
<i>Jacobian surfaces of quadrics in four dimensions.</i> By L. ROTH, B.A., Clare College . . . . .	268
<i>On the transport of sediments by streams.</i> By Mr H. JEFFREYS, St John's College . . . . .	272
<i>Systems of double rows of line vortices in a channel of finite breadth where the axis of the row is parallel to the axis of the channel.</i> By L. ROSENHEAD, St John's College. (Communicated by Mr H. JEFFREYS) . . . . .	277
<i>The second mean value theorem in the integral calculus.</i> By A. C. DIXON, Sc.D., Trinity College . . . . .	282
<i>A proof of Miquel's theorem by involutions in the Argand diagram.</i> By R. A. FRAZER, B.A., B.Sc., Pembroke College. (Communicated by Mr R. V. SOUTHWELL) . . . . .	285
<i>On the obliquity function to be used in the approximate theory of diffraction.</i> By W. R. HARPER, B.A., Hutchinson Research Student, St John's College. (With Three Text-figures) . . . . .	289
<i>The quantum theory of electronic scattering by helium.</i> By N. F. MOTT, B.A., St John's College. (With One Text-figure) . . . . .	304
<i>The wave mechanics of an atom with a non-Coulomb central field. Part IV. Further results relating to terms of the optical spectrum.</i> By D. R. HARTREE, Ph.D., Christ's College . . . . .	310
<i>Some calculations relevant to the quantum defect in the extended Ritz formula.</i> By J. HARGREAVES, B.A., Clare College . . . . .	315
<i>The dispersion electrons in the one-electron problem.</i> By J. HARGREAVES, B.A., Clare College . . . . .	323
<i>An approximate method of determining the high-velocity limits of continuous <math>\beta</math>-ray spectra.</i> By J. A. CHALMERS, B.A., Queens' College, Lecturer in Physics in the University of Durham. (With Four Text-figures) . . . . .	331
<i>A new electroscope.</i> By B. F. J. SCHONLAND, M.A., Ph.D., Gonville and Caius College. (With One Text-figure) . . . . .	340
<i>Note on the condensation of radioactive substances on solid surfaces.</i> By G. H. HENDERSON, Ph.D., Professor of Physics, Dalhousie University, Halifax, N.S. (Communicated by Professor Sir ERNEST RUTHERFORD) . . . . .	344
<i>Layers of caesium and nitrogen on tungsten.</i> By N. A. DE BRUYNE, B.A., Fellow of Trinity College. (With Six Text-figures) . . . . .	347
<i>An analysis of triode valve rectification.</i> By S. E. A. LÁNDALE, Corpus Christi College. (Communicated by Mr E. B. MOULLIN.) (With Five Text-figures) . . . . .	355

*First printed in Great Britain at the University Press, Cambridge*
