Experimental Agriculture publishes the results of research on crops, herbage and forage, with the main emphasis on field experiments relevant to husbandry in the warmer climates of the world. It also includes accounts of new experimental techniques, discussions of specific problems met in countries where agricultural production is developing rapidly, review articles on new developments in scientific agriculture, and occasional papers on technical, economic and sociological aspects of farming systems. The journal is the successor to *The Empire Journal of Experimental Agriculture*.

Experimental Agriculture is published quarterly. Four parts form a volume.

Subscriptions may be sent to any bookseller or subscription agent or direct to Cambridge University Press, P.O. Box 92, London NW1 2DB or in the U.S.A. and Canada to the American branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The 1973 subscription price is £9.50 net (including postage) for a volume (US\$32.00 in the U.S.A. and Canada), payable in advance; separate parts cost £3.50 net or \$11.00 each (plus postage). Second class postage paid at New York, N.Y.

Back Volumes. Inquiries for Vols. 1-32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from the London or New York offices of Cambridge University Press.

Permissions. For permission to reproduce material from *Experimental Agriculture*, please apply to the London or New York office of Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A., is authorized to supply single copies of separate articles for private use only.

NOTES FOR CONTRIBUTORS

Contributions will be welcomed from scientists of all nationalities, particularly those working in tropical and sub-tropical countries where up-to-date techniques of agricultural experimentation are helping in the rapid development of more modern methods of farm production. Contributions, which must be written in English, should be sent to the Editor, Professor J. P. Hudson, The Spinney, Wrington, Bristol BS187 7LB, England.

Conditions of acceptance. Submission of a paper will be taken to imply that the material has not previously been published, and is not being considered for publication elsewhere. Papers published in *Experimental Agriculture* may not be reprinted or published in translation without permission from the Editor, given on behalf of the Editorial Board.

General lay-out. Before having their manuscripts typed contributors are asked to look carefully at the lay-out of other papers published in a recent number of this journal, to ensure that their own papers, as submitted, conform as closely as possible to

the accepted pattern. This very much facilitates the work of the Editor and may often result in a paper being published earlier than if it requires a great deal of detailed editorial attention. Numerical data, which should only be included if they are essential to the argument, can be presented either in the form of tables or diagrams, but should never be shown in both ways. It is not the normal custom of the Journal to publish notes shorter than about 2000 words (4 pages) or longer than about 6000 words (12 pages including illustrations).

Typescripts. A top copy and one carbon copy of the script should be submitted, typed with double spacing, on one side of the paper only and with margins of about 1½ inches at the left-hand side and head of each sheet. Quarto size is preferred to foolscap.

Title. The development of automatic bibliographic methods, based on single-word indexing of the significant words in the title, makes it essential that the title of each paper should contain the maximum of relevant informa-

The Scientific Principles of Crop Protection

Sixth Edition

HUBERT MARTIN

The problems of crop protection involve biological, chemical and physical studies and require cooperation between entomologist, mycologist, chemist, physicist and plant physiologist. The primary purpose of this book is to assist this cooperation by a survey of the scientific principles underlying modern methods of control of crop pests.

Principles of Environmental Physics

JOHN L. MONTEITH

At a time when man's misuse of his environment is causing acute concern, the solution of many ecological problems must be sought in the basic principles of the physical and biological sciences. Professor Monteith's book provides undergraduates in the biological sciences with a foundation for more advanced study of environmental physics and it is also a general source of reference for research workers.

"Hitherto . . . no comprehensive text has been available; for this reason Professor Monteith's excellent study is particularly welcome." *Times Higher Education Supplement*.

An Ecological Atlas of Grassland Plants

J. PHILIP GRIME and
PHILIP S. LLOYD

This original book provides a standardized account of the ecology in grassland of 95 common plants of temperate regions and describes their distribution and variation in abundance with respect to variation in geology soil acidity, grassland management and topography. The book contains numerous tables, histograms and polarographs.

RHODESIAN JOURNAL OF AGRICULTURAL RESEARCH

VOL. 11 No. 2

CONTENTS

1973

Animal Production

Reproductive performance of the indigenous Rhodesian pig

1. The effect of plane of nutrition on number of ova shed, embryo and foetal mortality, and the distribution of embryos in the uteri of gilts and sows, by D. H. Holness and A. J. Smith

Tobacco

Effect of manganese and iron on flue-cured tobacco seedlings, by W. W. Ryding

Soil Chemistry

Phosphate intensity and capacity in some Rhodesian soils

1. Changes in a sandy tobacco soil due to previous fertilizer additions and subsequent cropping, by R. C. Salmon

Soil Erosion

Rainfall parameters to predict surface runoff yields and soil losses from selected field-plot studies, by H. A. Elwell and M. A. Stocking

*Entomology*Age and the changes in water and fat content of adult laboratory-reared *Locusta migratoria migratorioides*

- R. and F., by J. P. Loveridge

*Ecology*Relationship between tree canopy cover and grass growth in the vicinity of Fort Victoria, with particular reference to *Panicum maximum*, by D. G. Kennard and B. H. Walker*Forestry*Variation in leaf morphology among provenances of *Eucalyptus camaldulensis* Dehn, grown in Rhodesia, by Ian A. Andrew*Fisheries*The commercial exploitation of *Hydrocynus vittatus* Castelnau (tiger fish) stocks by means of small-meshed gill nets in Lake Kariba, Rhodesia, by D. H. S. Kenmuir*Meteorology*

The variation of some meteorological elements with increasing altitude in the Eastern Border mountains of Rhodesia, by J. D. Torrance

*Research Note*Quantity of flowering on *Pinus kesiya* in Zambia, by T. F. Geary and J. G. Williamson*Book Reviews**Index to Vols. 10 and 11*

Published twice annually

Annual subscription R\$3.00

Single numbers R\$1.50

Specimen copies available to libraries from:

The Assistant Editor, Rhodesian Journal of Agricultural Research
P.O. Box 8108, Causeway, Salisbury, Rhodesia

THE Journal of the British Grassland Society

A medium for the publication of the results of research
and practical experience in grassland husbandry and
forage production

Published quarterly. Annual Subscription £6.00 or \$14.40

Orders to: The Secretary, British Grassland Society
c/o Grassland Research Institute, Hurley, Maidenhead,
Berks, SL6 5LR, England

Articles for publication should be sent to:

A. G. G. Hill (Editor), Dellwood, Windrush, Burford, Oxford OX8 4TR

Articles from overseas can be accepted, provided that they have some
relevance to grassland research or practice in Britain.

HERBAGE ABSTRACTS

(grasses, pastures, rangelands and fodder crops)

FIELD CROP ABSTRACTS

(annual field crops)

for coverage of the world literature on agricultural research

Write for specimen copies of these computer-produced monthly journals and for lists of annotated bibliographies and other publications to:

**Commonwealth Bureau of
Pastures and Field Crops
Hurley, Maidenhead,
Berks SL6 5LR, UK**

THE JOURNAL OF AGRICULTURAL SCIENCE

Partial Contents of Vol. 81 Part 1 August 1973

- J. ANNA NIKOLIĆ and M. JOVANOVIĆ. Preliminary study on the use of different methods for determining the proportion of bacterial nitrogen in the total nitrogen of rumen contents
- E. R. JOHNSON and A. W. BEATTIE. Variation in muscle fibre diameter among sections and intra-sections and between contralateral muscles in seven bovine muscles
- B. A. C. ENYI. Growth rates of three cassava varieties (*Manihot esculenta* Crantz) under varying population densities
- R. HALLIDAY. Serum immunoglobulin concentrations at two days of age in lambs born after ova transfer between ewes of different breeds
- C. A. FOSTER. Prospects for the development of F_1 hybrid varieties of perennial ryegrass (*Lolium perenn*) and other herbage grasses
- *R. C. SALMON. Effects of initial phosphate intensity and sorption or buffering capacity of soil on fertilizer requirements of different crops grown in pots or in the field
- J. B. A. RODGER, W. D. GILL and G. K. SHUKLA. Comparisons of anhydrous ammonia with solid ammonium nitrate for spring barley and winter wheat 1967-70
- MANOHAR SINGH, I. S. YADAVA and A. R. RAO. Stomach development in buffalo calves as influenced by different feeds
- A. WISEMAN, CHRISTINE O. DAWSON, H. M. PIRIE, R. G. BREEZE and I. E. SELMAN. The incidence of precipitins to *Micropolyspora faeni* in cattle fed hay treated with an additive to suppress bacterial and mould growth
