- 343 **Primary hyperparathyroidism and psychiatry: manifestations, causes and management**
Sukhmeet Singh, Victoria Stokes, Al Hakam El Kaubaisy & Judy S. Rubinsztein
- 352 **A unifying framework for suicide risk assessment: the source–problem–solution–motive (SPSM) model**
Mohammed J. Abbas
- 365 **Mind–body treatments for children with functional gastrointestinal disorders**
Kate Stein, Lucy Howarth & Nancy L. Zucker
- 375 **Management of cardiac adverse effects of clozapine**
Sumeet Gupta, Abdullah Sayeed, Rajender Singh & Santanu Goswami

This special issue of BJPsych Advances marks the first in a two-part series dedicated to Liaison Psychiatry—an essential field that integrates physical and mental healthcare across diverse clinical settings. Far from being a niche subspecialty, Liaison Psychiatry addresses the complex interplay between medical and psychiatric conditions, offering insights into classical challenges such as delirium, sleep disturbance, endocrine–psychiatric overlap, suicide risk, and psychopharmacology. Through a focus on evolving evidence and integrative approaches, this issue reaffirms the central role of Liaison Psychiatry in delivering compassionate, reflective, and medically informed psychiatric care.
