Invasive Plant Science and Management

Published quarterly by the Weed Science Society of America

Antonio DiTommaso, *Editor*

The Weed Science Society of America (WSSA) publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports.

Associate Editors (Assignment Year)

Edith B. Allen, Botany & Plant Sciences Department, University of California, Riverside, CA 92521 (2008)

Jacob N. Barney, School of Plant and Environmental Sciences, Virginia Tech, Blacksburg, VA 24061 (2012)

John Cardina, Department of Horticulture & Crop Science, Ohio State University, Wooster, OH 44691 (2008)

Stephen F. Enloe, Center for Aquatic and Invasive Plants, University of Florida, Gainesville, FL 32653 (2010)

Songlin Fei, Department of Forestry and Natural Resources, Purdue University, West Lafayette, IN 47907 (2015)

Guillaume Fried, Plant Health Laboratory, Anses, 34988 Montferrier-sur-Lez, France (2017)

Catherine S. Jarnevich, US Geological Survey, Fort Collins, CO 80526 (2015)

Marie Jasieniuk, University of California, Davis CA 95616 (2017)

Darren J. Kriticos, CSIRO, Canberra, ACT 2601, Australia (2010)

James K. Leary, Center for Aquatic and Invasive Plants, University of Florida, Gainesville, FL, 32653 (2014)

Kelly G. Lyons, Department of Biology, Trinity University, San Antonio, TX 78212 (2008)

Rob J. Richardson, Department of Crop Science, North Carolina State University, Raleigh, NC 27695 (2014)

Steve S. Seefeldt, NWREC, Washington State University, Mount Vernon, WA 98273 (2014)

Ryan M. Wersal, Minnesota State University, Mankato, Mankato, MN 56001 (2014)

Tracy Candelaria, *Managing Editor*

Officers of the Weed Science Society of America

Invasive Plant Science and Management (ISSN 1939-7291) is an official publication of the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234 (720-977-7940). It is published quarterly, one volume per year, four issues per year beginning in March.

Membership includes receipt of *Weed Science*, *Weed Technology*, *Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Invasive Plant Science and Management* subscription page at <https://www.cambridge.org/core/journals/invasive-plant-science-and-management/subscribe>; Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

Invasive Plant Science and Management publishes four times a year in March, June, September, and December. Annual institutional electronic subscription rates: US \$398.00; UK £277.00.

Please use Editorial Manager to access manuscript submissions (<http://www.editorialmanager.com/ipsm>). Authors are asked to pay \$65 per page as a portion of the cost of publication, plus an additional processing charge of \$55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Invasive Plant Science and Management* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique, propagative materials they might possess with other workers in the area who request such materials for the purpose of scientific research.

INVASIVE PLANT SCIENCE AND MANAGEMENT

Table of Contents

Research Articles

- High genetic diversity in the clonal aquatic weed *Alternanthera philoxeroides* in the United States. Dean A. Williams, Nathan E. Harms, Ian A. Knight, Brenda J. Grewell, Caryn Joy Futrell and Paul D. Pratt 217
- Consequences of *Ventenata dubia* 30 years postinvasion to bunchgrass communities in the Pacific Northwest. Lisa C. Jones, Cleve Davis and Timothy S. Prather 226
- Pyrus calleryana* allometric equations and stand structure in southwestern Ohio and northern Kentucky. Richard L. Boyce and Miciah Ocasio 239
- Identification of resistant clones of Eurasian (*Myriophyllum spicatum*) and hybrid (*Myriophyllum spicatum* × *Myriophyllum sibiricum*) watermilfoil to an operational rate of fluridone. Gregory M. Chorak and Ryan A. Thum 247
- Efficacy of five herbicide treatments for control of *Pyrus calleryana*. James T. Vogt, David R. Coyle, David Jenkins, Chris Barnes, Christopher Crowe, Scott Horn, Chip Bates and Francis A. Roesch 252

Case Study

- The effects of treatment and management history on the control of Old World climbing fern (*Lygodium microphyllum*), Brazilian pepper (*Schinus terebinthifolia*), and punktree (*Melaleuca quinquenervia*). Samantha L. Dietz, Chad T. Anderson, Dexter R. Sowell, Robert L. Gundy and Linda E. King 258
- Reducing *Eragrostis lehmanniana* populations by preparing seedbeds with unconventional tillage implements and seeding in a semiarid grassland. Carlos Raúl Morales-Nieto, Alan Álvarez-Holguín, Eduardo Santellano-Estrada, Federico Villarreal-Guerrero and Raúl Corrales-Lerma 266
- Long-term treatment leads to reduction of tree-of-heaven (*Ailanthus altissima*) populations in the Buffalo National River. Craig C. Young, Jordan C. Bell and Lloyd W. Morrison 276
- Effectiveness of herbicides on *Lysimachia vulgaris*: a 17-year case study
Marisa R. De Luccia, Ben Peterson, Michael J. Bradshaw and Patrick C. Tobin 282

Note

- Cover–biomass relationships of an invasive annual grass, *Bromus rubens*, in the Mojave Desert. Scott R. Abella 288
