
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 77, 2024, which includes print and electronic access, is £878 (USA, Canada and Mexico US \$1582) and includes delivery by air; single parts are available at £170 (USA, Canada and Mexico US \$306) plus postage. The electronic-only price available to institutional subscribers is £532 (USA, Canada and Mexico US \$973). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8EA, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

For EU product safety concerns, contact us at Calle de José Abascal, 56, 1º, 28003 Madrid, Spain, or email eugpsr@cambridge.org.

This journal issue has been printed on FSCTM-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

THE JOURNAL OF NAVIGATION

VOLUME 77 • NUMBER 5–6 • SEPTEMBER 2024

CONTENTS

- A brain-inspired relative navigation method for collective UAVs based on neurodynamics of social place cells and grid cells 559
Chuang Yang, Zhi Xiong, Jianye Liu, Jun Xiong and Yang Peng
- Robust centroid extraction using the hybrid genetic algorithm with applications to planetary optical navigation 575
Qichang Qiang, Baojun Lin and Yingchun Liu
- A fuzzy-hybrid SHELL framework for predicting air traffic conflict detection and resolution performance: a human-factors perspective 594
Fitri Trapsilawati
- The plain scale from *Warwick* (1619) 612
Piotr T. Bojakowski
- A study on the relationships between factors contributing to fishing vessel collision accidents and hull damage severity in South Korea 624
Hyungoo Park, Young-Soo Park, Sangwon Park, Dae-Yul Chong, Wonsik Kang and Daewon Kim
- An approach to establishing evaluation criteria for unmanned surface vessel manoeuvres during COLREGs encounters 645
Michael E. Heistand and Craig M. Payne
- Grid-based 3DMA GNSS with clustering and Doppler velocity using factor graph optimisation 658
Hoi-Fung Ng, Qiming Zhong, Paul Groves and Li-Ta Hsu
- A study on AIS positional error analysis and transmission frequency requirements of attitude data for future vessel monitoring 677
Gen Fukuda, Hitoi Tamaru, Nobuaki Kubo and Ruri Shoji
- A general extreme value-based Gaussian global navigation satellite systems measurement error distribution for mission-critical applications 695
Ma'mon Saeed Alghananim and Washington Yotto Ochieng
- Ship domain-based traffic capacity of Singapore Strait 709
Zhaoyang Lu and Liujiang Kang
- Decision-making and risk-taking under uncertainty in safety-critical systems: a study among aviation employees 723
Akram Sadat Jafari Roodbandi, Alireza Choobineh and Mohammad Nami
- Augmented reality projection errors in maritime navigation 736
Bruno Giordano Leite, Helio Takahiro Sinohara and Eduardo Aoun Tannuri
