The Latest On UNFANDRAUSE

EPA ACCEPTED: For complete disinfection (including T.B. activity)

“SPORICIDIN, DILUTED 1:16, IS TUBERCULOCIDAL AND CAN BE USED AND RE-USED FOR 30 DAYS FOR 100% HOSPITAL LEVEL DISINFECTION IN 10 MINUTES AT TRUE ROOM TEMPERATURE, 68°F AND ABOVE • (REG. #8383-5).”

Important Product Information:

Sporicidin is the **ONLY** dilutable glutaraldehyde-based 10 minute disinfectant that is registered for tuberculocidal re-use without heating. Respiratory and other equipment were used in the studies supporting the re-use claims. It is recommended for respiratory therapy and operating room instruments and equipment.

Sporicidin is recommended by all major scope manufacturers.

• • Cidex now must be heated to 77°F / 25°C for 45 minutes for tuberculocidal activity. Cidex, and Cidex type products, require a much higher glutaraldehyde concentration (2%) for disinfection and are less effective than Sporicidin, a glutaraldehyde (0.13%)-phenate complex.

Under the most stringent and scientific guidelines, Sporicidin is the best sterilizing/disinfecting product available.

TO THOSE WHO FOUGHT A DIFFERENT KIND OF BATTLE.

More than 10,000 women served their country in Vietnam—most of them nurses who were fighting the battle to save lives. Now, through Stuart Pharmaceuticals' Project Memorial, you have an opportunity to join your colleagues in paying tribute to this special group of veterans.

What is Project Memorial? It's a program designed to support the efforts of a group called the Vietnam Women's Memorial Project. Their goal is to see the day—Veterans Day, 1988—when a statue of a woman is unveiled in its place of honor at the Vietnam Veterans Memorial. But if this goal is to be reached, over \$1 million needs to be raised.

Responding to the call

Stuart, as serving corporate sponsor, has responded by making a substantial contribution to the project. But we're doing even more: through Project Memorial, we're making it easy for *you* to help, too.

For one full year—from November 1, 1987, to October 31, 1988—Stuart will make the following additional contributions:

10¢ each time your hospital purchases a unit of a HIBICLENS® liquid product.

25¢ for each case of HIBICLENS® Sponge/Brushes your hospital purchases during three special deal periods

25¢ each time *you* return a Project Memorial entry card (your card also enters you into a drawing for \$15,000 in educational prizes)

So please join in the effort—your help is urgently needed if the statue is to be unveiled by the November '88 deadline. To get both the entry cards and complete details on Project Memorial, look for the posters and brochures on display at your hospital or contact your Stuart representative.

HIBICLENS. You know it's the leader in the fight against infection. But now it's also helping America's nurses win the recognition they deserve.

Subscriptions. Requests should be addressed to the publisher (except Japan). In Japan, contact Woodbell Scope Incorporated, Mansui Bldg., 9-18, Kanda Surugadai 2-chome, Chiyoda-ku, Tokyo 101, Japan. Subscription rates in the US and possessions: Individual: One year—\$40.00; Two years—\$66.00; Three years—\$94.00. Institutional: One year—\$55.00; Two years—\$92.00; Three years—\$128.00; Canada: \$15.00 additional each year; all other countries: \$25.00 additional each year. Single copies of current issues may be obtained for \$7.00, United States and possessions; \$13.00 all other countries.

Change of address: Notice should be sent to the publisher six weeks in advance of effective date. Include old and new addresses with zip codes. The publisher cannot accept responsibility for undelivered copies. Second-class postage is paid at Thorofare, New Jersey 08086, and additional entry points. **Postmaster:** Send address changes to SLACK Incorporated, 6900 Grove Road, Thorofare, NJ 08086.

As of Volume 1, Number 1, INFECTION CONTROL is listed in *Index Medicus*, *Current Contents—Clinical Practice*, *Hospital Literature Index*, and *Cumulative Index to Nursing and Allied Health Literature*.

A Point Of Concern

The ICU HR Needle helps eliminate the cost, liability, and anxiety of accidental needle sticks.

1. The HR Needle accommodates any standard slip or luer lock syringe.

2. Administer injection following normal hospital procedure.

3. To remove the HR Needle-assembly, grasp the plastic guard firmly with one hand. Then withdraw the syringe with the other hand until the guard clicks in place.

4. The HR Needle is now safe for disposal, recessed within the protective guard—thus preventing accidental needle-stick injuries.

Today's healthcare professional is concerned about infectious diseases. Through on-the-job exposure to high-risk patients, medical personnel are more likely to contract AIDS, Hepatitis B, and non-A, non-B Hepatitis than any other working group.

Accidental needle sticks account for nearly $\frac{1}{3}$ of healthcare cases. Last year, there were **800,000 reported needle stick injuries** resulting in expenses of over **\$500 million** for accident work-ups alone. Liability and treatment for infected individuals drove the totals into the billions of dollars.

Now, there's a standard of protection from accidental needle sticks—the HR Needle from ICU Medical. The HR Needle eliminates the possibility of needle-stick injuries, and prevents the needless transmission of infectious diseases.

The HR Needle is the healthcare worker's first line of defense, reducing the liability *and* the anxiety of dealing with high-risk patients.

ICU—A New Standard in Protection

ICU Medical is committed to manufacture products designed to reduce the liability, costs and anxiety encountered by today's medical professionals.

TOUGH ON STAPH. GENTLE ON STAFF.

It shouldn't hurt to wash your hands. Yet that's just what happens at so many medical facilities. But now relief is as close as your fingertips. With the new ProCare™ hand-care system from Sani-Fresh International.

ProCare's rich emollients refresh tired hands. Its non-staining, synthetic-based products gently clean without irritation. And its thick, creamy formulations bathe skin in a luxurious lather.*

But don't let ProCare's mild-mannered qualities fool you. Because washing with it eliminates a wide range of transient microorganisms. Its anti-septic ingredients** provide proven effectiveness

Introducing new ProCare™
Extra mild to encourage
frequent handwashing.

for all non-surgical applications.

New ProCare also provides something else—a complete system of disposable hermetically sealed pump/pouch refills. Plus a free dispenser which can be operated with one hand to reduce cross contamination. And which complies with CDC guidelines.

So go tough on staph, not on staff. Call toll-free 1-800-322-2200 to order new ProCare. And take the pain out of fighting nosocomial infections. Ask about new ProCare SpectraCare™, Para-San® and Alco-San® Anti-septic Hand Care Products. Or ProCare extra-mild Ultra-Kind™ Multi-Purpose Hand Wash.

*Alco-San is a non-synthetic waterless formulation. **SpectraCare and Para-San contain Chloroxylenol. Alco-San contains gelled Isopropyl Alcohol.
