

Tennant, *Phys. Rev Lett.* **52** (1984) p. 228.

40. H. Rauh, *Wacker's Atlas for Characterization of Defects in Silicon* (Wacker-Chemitronic Co., Burghausen, Germany). This atlas describes the categories of defects and all important preferential etches, and gives pictorial examples of defect photomicrographs.

41. H.J. Queisser and Kristallene Krisen, (Piper, Munich, 1985), English version: *The Conquest of the Microchip* (Harvard University Press, Cambridge, MA, 1988).

42. A very recent review describes the ubiquity of H on and in Si: G.J. Pietsch, *Appl. Phys.* **A60** (1995) p. 347.

43. David J. Eaglesham, *MRS Bulletin XIX* (12) (December 1994) p. 59.

Hans J. Queisser studied physics in Berlin, in Lawrence, Kansas, and in Goettingen where he obtained his PhD degree. From 1959 to 1963, he witnessed the very beginning of Silicon Valley in William Shockley's small transistor company. From 1964 to 1966, he worked on GaAs materials and lasers at AT&T Bell Laboratories, then became a professor of physics in Frankfurt, Germany until 1970, when he was asked to establish the new Max-Planck Institute for Solid State Research in Stuttgart where he is still one of the directors. He is a Fellow of the American Physical Society, was president of the German Physical Society, and serves on many advisory boards. His book "The Conquest of the Microchip" (Harvard University Press) won him a medal. His field is semiconductors, especially their extrinsic properties—such as defects—and their influence on the physics of devices. Queisser can be reached at Max-Planck-Institut für Festkörperforschung, Heisenbergstrasse 1, D-70569 Stuttgart, Germany; phone 49-711-689-1600; fax 49-711-689-1602; e-mail queisser@quasix.mpi-stuttgart.mpg.de.

Don't Miss These Books on SEMICONDUCTORS from the Materials Research Society

Materials Reliability in Microelectronics V Volume 391-B
\$64.00 MRS Member \$74.00 U.S. List \$85.00 Non-U.S. List

Rapid Thermal and Integrated Processing IV Volume 387-B
\$57.00 MRS Member \$63.00 U.S. List \$72.00 Non-U.S. List

**Ultraclean Semiconductor Processing
Technology and Surface Chemical Cleaning and Passivation** Volume 386-B
\$57.00 MRS Member \$63.00 U.S. List \$72.00 Non-U.S. List

**Materials—Fabrication and Patterning
at the Nanoscale** Volume 380-B
\$72.00 MRS Member \$83.00 U.S. List \$95.00 Non-U.S. List

**Strained Layer Epitaxy—Materials,
Processing, and Device Applications** Volume 379-B
\$62.00 MRS Member \$71.00 U.S. List \$81.00 Non-U.S. List

**Defect and Impurity Engineered
Semiconductors and Devices** Volume 378-B
\$72.00 MRS Member \$83.00 U.S. List \$95.00 Non-U.S. List

**Microcrystalline and Nanocrystalline
Semiconductors** Volume 358-B
\$72.00 MRS Member \$80.00 U.S. List \$85.00 Non-U.S. List

Compound Semiconductor Epitaxy Volume 340-B
\$50.00 MRS Member \$57.00 U.S. List \$65.00 Non-U.S. List

**Growth, Processing and Characterization
of Semiconductor Heterostructures** Volume 326-B
\$64.00 MRS Member \$74.00 U.S. List \$79.00 Non-U.S. List
