

Erratum

Effect of teat skin disinfection on the rate of infection and interval to infection in cows exposed to high levels of *Staphylococcus aureus*

RICHARD F. SHELDRAKE AND RODERIC J. T. HOARE

Journal of Dairy Research (1981), **48**, 1-5

Table 1 on page 2 should read:

Table 1. *Effect of teat skin disinfection on the occurrence of new intramammary infection for cows with single or multiple quarters infected during lactation*

	Cows with a single infection or the first infection of cows with multiple infection		Second infection of cows with multiple infection	
	Dipped	Undipped	Dipped	Undipped
Disinfectant treatment				
No. of quarters infected in cows with a single infection	9	20	—	—
No. of quarters infected in cows with multiple infections	7	5	5	7
Total no. of quarters infected	16	25	5	7
No. of quarters exposed to infection	244	244	66	57
Proportion of quarters becoming infected, %	6.6	10.2	7.6	12.3
