Invasive Plant Science and Management

Published quarterly by the Weed Science Society of America

Antonio DiTommaso, *Editor*

The Weed Science Society of America (WSSA) publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports.

Associate Editors (Assignment Year)

Edith B. Allen, Botany & Plant Sciences Department, University of California, Riverside, CA 92521 (2008)
Jacob N. Barney, School of Plant and Environmental Sciences, Virginia Tech, Blacksburg, VA 24061 (2012)
John Cardina, Department of Horticulture & Crop Science, Ohio State University, Wooster, OH 44691 (2008)
Stephen F. Enloe, Center for Aquatic and Invasive Plants, University of Florida, Gainesville, FL 32653 (2010)
Chelsea Carey, Point Blue Conservation Science, Petaluma, CA 94954 (2022)
Songlin Fei, Department of Forestry and Natural Resources, Purdue University, West Lafayette, IN 47907 (2015)
Guillaume Fried, Plant Health Laboratory, Anses, 34988 Montferrier-sur-Lez, France (2017)
Catherine S. Jarnevich, US Geological Survey, Fort Collins, CO 80526 (2015)
Marie Jasieniuk, University of California, Davis CA 95616 (2017)
Darren J. Kriticos, CSIRO, Canberra, ACT 2601, Australia (2010)
Elizabeth LaRue, University of Texas, El Paso, TX 79968 (2022)
James K. Leary, Center for Aquatic and Invasive Plants, University of Florida, Gainesville, FL, 32653 (2014)
Kelly G. Lyons, Department of Biology, Trinity University, San Antonio, TX 78212 (2008)
Rob J. Richardson, Department of Crop Science, North Carolina State University, Raleigh, NC 27695 (2014)
Steve S. Seefeldt, NWREC, Washington State University, Mount Vernon, WA 98273 (2014)
Ryan M. Wersal, Minnesota State University, Mankato, Mankato, MN 56001 (2014)

Biology of Invasive Plants Series Editors

David R. Clements, Trinity Western University, Langley, BC V2Y 1Y1, Canada (2020)
Darren J. Kriticos, CSIRO, Canberra, ACT 2601, Australia (2010)

Tracy Candelaria, *Managing Editor*

Officers of the Weed Science Society of America

Invasive Plant Science and Management (ISSN 1939-7291) is an official publication of the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234 (720-977-7940). It is published quarterly, one volume per year, four issues per year beginning in March.

Membership includes receipt of *Weed Science*, *Weed Technology*, *Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Invasive Plant Science and Management* subscription page at <https://www.cambridge.org/core/journals/invasive-plant-science-and-management/subscribe>; Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

Invasive Plant Science and Management publishes four times a year in March, June, September, and December. Annual institutional electronic subscription rates: US \$402.00; UK £280.00.

Please use Editorial Manager to access manuscript submissions (<http://www.editorialmanager.com/ipsm>). Authors are asked to pay \$65 per page as a portion of the cost of publication, plus an additional processing charge of \$55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Invasive Plant Science and Management* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique, propagative materials they might possess with other workers in the area who request such materials for the purpose of scientific research.

Table of Contents

Editorial

Editorial for <i>Invasive Plant Science and Management</i> , Volume 15. Antonio DiTommaso	1
--	---

Research Articles

Hybridization and invasiveness in Eurasian watermilfoil (<i>Myriophyllum spicatum</i>): is prioritizing hybrids in management justified? Hannah K. Hoff and Ryan A. Thum	3
Development of a growing degree-day model to estimate <i>Linaria vulgaris</i> shoot emergence and prospects for improving biological control efforts. Suzanne Blatt, Rosemarie De Clerck-Floate and Scott N. White	9
Incorporating rainy season and reproductive phenology into the survival and transition rates of the invasive species <i>Sambucus nigra</i> : an approximation with multistate models. Leticia Bonilla-Valencia, Mariana Hernández-Apolinar, J. Jaime Zúñiga-Vega, Francisco J. Espinosa-García, Yuriana Martínez-Orea and Silvia Castillo-Argüero	16
<i>Miscanthus</i> × <i>giganteus</i> growth and control in simulated upland and wetland habitats. Gray Turnage, John D. Byrd and John D. Madsen	25
Russian thistle (<i>Salsola</i> spp.) control in California rangelands over five years. Devii R. Rao, Katherine Hovanes, Richard Smith, Josh Davy and Elise S. Gornish	33

Education/Extension

Creating informed consumers of aquatic invasive species management programs through online education for nonprofessionals. Megan M. Weber, Daniel J. Larkin and Patrick Mulcahy	41
---	----

Case Study

Suppression of <i>Potentilla recta</i> by targeted goat grazing and aminopyralid on northern intermountain rangelands. Myra Juckers and Katherine J. Stewart	49
--	----

Note

Low rate of aminopyralid nearly eliminates viable seed production in barb goatgrass (<i>Aegilops triuncialis</i>) in the greenhouse. Matthew J. Rinella, Susan E. Bellows and Pamela A. Beitz ...	57
Crown area predicts total biomass for <i>Rhodomyrtus tomentosa</i> , an invasive shrub in Florida. Melissa C. Smith, Paul D. Pratt and Min B. Rayamahji	61
