Call for Papers ISABE 2017

Airbreathing Propulsion Systems are at the forefront of technology and central to our way of life. Furthermore, technology transfer from propulsion to other areas of activity, beyond aerospace, has yielded great environmental, economic and utility benefits. The ISABE conference is a great forum to showcase industry trends, key developments, future concepts and ideas. It provides fertile ground for beneficial exchanges between professionals across the globe. ISABE cordially invites your paper for ISABE 2017.

New for ISABE: a Review Process via the RAeS

For 2017 and, hopefully, for the long term ISABE will offer the established review process of the Royal Aeronautical Society (RAeS). This opportunity and service will require a modified preparation schedule of the papers by the authors and will offer the opportunity of publication in The Aeronautical Journal.

Special for 2017: The Aeronautical Journal Special Issue

The Royal Aeronautical Society (RAeS) will publish a special issue of The Aeronautical Journal for the ISABE 2017 conference. This will contain 8~12 papers from the conference. Papers for this special issue will need to be submitted as fully completed manuscripts by July 2016 for a pre-selection by the ISABE Board. Those selected will then be submitted for the review process of the Royal Aeronautical Society.

For ISABE 2017: three alternative routes for paper submissions:

1. Normal - abstract submission by July 2016, full paper by June 2017
2. RAeS Review - abstract submission by July 2016 - full paper by February 2017
3. RAeS Special Issue and Review - full paper submission by July 2016

Looking forward to see you at ISABE 2017 in Manchester

ISABE very much looks forward to your presence at the 2017 ISABE Conference in Manchester, UK during 3-8 September 2017. Manchester, as I am certain you know, is the birthplace of Rolls-Royce and a major European cultural, industrial and tourist centre. Please keep an eye on our website (www.isabe.org) to keep abreast of the opportunities this conference offers you.

Structures & Material Group

ROYAL
AERONAUTICAL
SOCIETY

2016 • CELEBRATING 150 YEARS

5TH AIRCRAFT STRUCTURAL DESIGN CONFERENCE

MANCHESTER / 4 - 6 OCTOBER 2016

This conference will provide a platform for the presentation of new ideas, computerised design methods & algorithms for the design & development of civil & military aircraft, both manned and unmanned, over the course of the next decade.

A call for papers is now open and the deadline for submitting abstracts is 15 April 2016.

Submission of Manuscripts

All manuscripts should be submitted online at: <http://www.edmgr.com/aeroj>

Any enquiries should be directed to Wayne J Davis at aerojournal@aerosociety.com.

The current set of instructions for authors are available at: <http://journals.cambridge.org/AER>

Subscriptions

The Aeronautical Journal (ISSN 0001-9240) is published monthly in 12 issues each year.

Non-Members

The subscription price (excluding VAT) to *The Aeronautical Journal* for volume 120 (2016), which includes print and electronic access, is £525 (USA, Canada and Mexico US\$788) and includes delivery by air; single parts are available at £50 (USA, Canada and Mexico US\$75) plus postage. The electronic-only price available to institutional subscribers is £460 (USA, Canada and Mexico US\$690). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada, and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese Prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo, Japan.

RAeS Members

The subscription price for RAeS members is £85 for Hardcopy and online access and £65 for online access only. Individual copies are £7.40. Orders are available from: Membership Department, Royal Aeronautical Society, No.4 Hamilton Place, London, W1J 7BQ, UK. Tel: +44 (0)20 7670 4304 or email: subscriptions@aerosociety.com

RAeS Conference Proceedings

Details, prices and availability of Royal Aeronautical Society Conference Proceedings can be obtained from: RAeS Conference and Events Department, No.4 Hamilton Place, London, W1J 7BQ, UK.

Tel: +44 (0)20 7670 4345, email: conference@aerosociety.com or via www.aerosociety.com/proceedings

Advertising

All advertising enquiries should be sent to Simon Levy, simon.levy@aerosociety.com

Internet Access

The Aeronautical Journal is included in the Cambridge Journals Online service and can be found at: <http://journals.cambridge.org/AER>.

The Aeronautical Journal now supports open access publications across its hardcopy and online platforms, and accepts papers to consider for publication under both the 'green' and 'gold' open access options.

Information contained within *The Aeronautical Journal* has been published in good faith and the opinions expressed do not represent those of the Royal Aeronautical Society.

The Royal Aeronautical Society is a registered charity: No 313708

CONTENTS

Volume 120 Number 1229

July 2016

K. A. Schau, G. Gaonkar and S. Polsky

Rotorcraft downwash impact on ship airwake: statistics, modelling, and simulation

1025

A. Ben Mosbah, R.M. Botez and T.-M. Dao

New methodology combining neural network and extended great deluge algorithms for the ATR-42 wing aerodynamics analysis

1049

G.J. Durango, C. Lawson and A.Z. Shahneh

Formation flight investigation for highly efficient future civil transport aircraft

1081

Y. Cao, J. Huang, Z. Xu and J. Yin

Insight into rime ice accretion on an aircraft wing and corresponding effects on aerodynamic performance

1101

R. Sriram and G. Jagadeesh

Shock-tunnel investigations on the evolution and morphology of shock-induced large separation bubbles

1123

S. Zivkovic, M. Milinovic, N. Gligorijevic and M. Pavic

Experimental research and numerical simulations of thrust vector control nozzle flow

1153

S. He and D. Lin

Sliding mode-based continuous guidance law with terminal angle constraint

1175
