# GENETICAL RESEARCH

---

GENETICAL RESEARCH publishes original work on all aspects of genetics, or in any field of research which has an important bearing on genetics. Papers will be submitted to referees before acceptance. They will generally be printed in order of acceptance. In addition, Short Papers (see below) may be included if received 3 months before publication date.

GENETICAL RESEARCH is published bi-monthly.

Single parts 45s. net (\$6.50 in U.S.A.), plus postage.

Three parts form a volume. The subscription price of a volume (which includes postage) is £5 net (\$16.50 in U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

Orders should be sent to a bookseller or to the publishers, Cambridge University Press, P.O. Box 92, London, N.W. 1 and 32 East 57th Street, New York, N.Y. 10022.

## NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English, with an English summary. An additional summary in French, German, Russian or Italian will be accepted. Papers should be sent to the Executive Editor, Dr E. C. R. Reeve, Institute of Animal Genetics, West Mains Road, Edinburgh 9.

GENERAL. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in *Genetical Research* may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible.

SHORT PAPERS. This category is designed for concisely written reports of work for which rapid publication is considered desirable. Such papers will normally be published within three months of receipt in acceptable form. They should not exceed 6 pages of print in length.

TYPESCRIPTS. A top copy and one carbon copy should be submitted. They should be typed with double-spacing, on one side of the paper, leaving margins of about 1½ inches at the left-hand side and head of each sheet. Quarto is preferred to foolscap paper. Heavily corrected typescripts may have to be returned to the author for retyping. Papers should state the name and address of the author (or his proxy) to whom proofs are to be sent. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper, and changes of address and sources of financial support may be added in footnotes.

A short title should be supplied for running headlines; this must not exceed 50 characters, counting each letter and space as one character.

# ANIMAL BREEDING ABSTRACTS

How many scientific man hours can you afford to spend keeping up with the literature in and bordering on your field? How long would it take you to track down 1000 recent papers concerned with the genetics of livestock and laboratory animals, let alone read them? You are sick of questionnaires? All right, just accept our word for it that **Animal Breeding Abstracts** exists to save your time by scanning the literature for you. Last year, 1033 (almost one quarter) of its abstracts dealt with genetical aspects of animal breeding.

This valuable guide to the latest world literature on the breeding of livestock, poultry and laboratory animals is prepared at the Commonwealth Bureau of Animal Breeding and Genetics, Edinburgh. You can have it on your desk at the beginning of March, June, September and December for 160s. if you live in the British Commonwealth or Republic of Ireland, or for 315s. if in a non-contributing country.

## COMMONWEALTH BUREAU OF PLANT BREEDING AND GENETICS

SCHOOL OF AGRICULTURE, CAMBRIDGE, ENGLAND

Information on all topics concerned with the improvement of economic plants and microorganisms, in particular the methods and achievements of crop breeding, field trials, new varieties and strains, genetics and cytology, is given regularly in the journal

## PLANT BREEDING ABSTRACTS

COMPILED FROM WORLD LITERATURE

Each volume contains over seven thousand abstracts from articles and reports in thirty to forty different languages, also reviews of new books and notices of new journals

# JOURNAL OF REPRODUCTION AND FERTILITY

The Journal publishes original papers, abstracts of Proceedings, and occasionally reviews and bibliographies, dealing with the morphology, physiology, biochemistry and pathology of reproduction in man and animals, and with the biological, medical and veterinary problems of fertility and lactation. Nine numbers are issued to give three volumes a year.

*Papers appearing in August 1969 include:*

- M. FREUND. Interrelationships among the characteristics of guinea-pig semen collected by electro-ejaculation.
- C. FOX and B. FOX. Blood pressure and respiratory patterns during human coitus.
- R. L. BRINSTER and J. T. TENBROECK. Blastocyst development of mouse pre-implantation embryos in the rabbit Fallopian tube.
- R. STAMBAUGH and J. BUCKLEY. Identification and subcellular localization of the enzymes effecting penetration of the zona pellucida by rabbit spermatozoa.
- G. H. STABENFELDT, L. L. EWING and L. E. McDONALD. Peripheral plasma progesterone levels during the bovine oestrous cycle.
- C. H. BEATTY, G. M. BASINGER and R. M. BOCEK. Carbohydrate metabolism of myometrium from the pregnancy rhesus monkey.
- J.-P. FOUQUET and S. GUHA. Glycogen, phosphorylase and glycogen synthetase in hamster testis during postnatal development.
- P. A. RACEY. Diagnosis of pregnancy and experimental extension of gestation in the pipistrelle bat, *Pipistrellus pipistrellus*.
- R. TOAFF, H. ASHKENAZI, A. SCHWARTZ and M. HERZBERG. Effect of oestrogen and progestagen on the composition of human milk.
- R. A. VAIDYA, J. M. BEDFORD, R. H. GLASS and J. MCL. MORRIS. Evaluation of the removal of tetracycline fluorescence from spermatozoa as a test for capacitation in the rabbit.
- R. A. BEATTY, G. H. BENNETT, J. G. HALL, J. L. HANCOCK and D. L. STEWART. An experiment with heterospermic insemination in cattle.
- J. B. CHOUDARY and G. S. GREENWALD. Reversal by gonadotrophins of the luteolytic effect of oestrogen in the cyclic guinea-pig.
- T. R. WRENN, J. R. WOOD and J. BITMAN. Alterations in the uterine environment produced by IUDs.
- D. O. E. GEBHARDT. The effects of starvation or of treatment with cytotoxic agents on pregnancy in mice.
- J. S. PERRY and J. G. ROWELL. Variations in foetal weight and vascular supply along the uterine horn of the pig.
