A. D. Harvey

"It will fill a glaring gap in our knowledge of early nineteenth century history...." *J. T. Ward*

"Its coverage of the period is comprehensive...an extremely good piece of historic writing, and well presented...." *G. E. Mingay*

This is the first comprehensive and integrated history of Britain during the two crucial opening decades of the nineteenth century—years of struggle against Napoleon, of intense political conflict, and of major economic change.

1978 ISBN 0-312-09747-6 432 pages \$22.50

## **Independent Colliers**

**The Coal Miner as Proletarian Reconsidered**

Royden Harrison, *editor*

In a closely related series of studies of coal mining communities in nineteenth century Britain, the contributors challenge the conventional view of the miner as the "archetypal proletarian." These essays emphasize the experience of individuals and make new use of economic and demographic evidence to reconstruct the lives of mining communities. They refute Adam Smith's declaration that colliers were indistinguishable in point of skill from common laborers and reveal the experience of mining communities to be far more varied and complex than has been previously realized.

1978 ISBN 0-312-41290-8 200 pages \$18.95

## **Wilberforce**

John Pollock

The campaign of William Wilberforce to abolish the slave trade is the predominant concern of this book. Drawing on a mass of new manuscript material, John Pollock discloses the dramatic inside story of the final stages of the slave trade's abolition.

## **The Twentieth Century, 1880-1939**

Paul Hayes

*Modern British Foreign Policy Series*

This volume analyzes the years when Britain lost her status as the world's leading power. Professor Hayes explores the increasing constraints placed upon British diplomatic strategy by changing political and economic climates and argues that politicians, diplomats, and even the British public accelerated the country's diplomatic decline by their common lack of faith in Britain's ability to make and execute appropriate foreign policy decisions.

1978 ISBN 0-312-82409-2 340 pages \$15.95

## **David Livingstone**

**The Dark Interior**

Oliver Ransford

David Livingstone, though a contemporary hero to the Victorian British, was a lonely man and one of the most elusive figures of his age. In his new biography, Oliver Ransford probes the personality of this solitary explorer, tracing his severe moodiness and his difficulty in working with other Europeans to a manic-depressive disorder which afflicted several members of the Livingstone family, and finding explanations for his intense fascination with African culture in the missionary zeal instilled by his non-conformist upbringing.

1978 ISBN 0-312-18379-8 300 pages, illustrated \$18.95

## **Inside Asquith's Cabinet**

**From the Diaries of Charles Hobhouse**

Edward David, *editor*

"It is a happy circumstance that Hobhouse's diaries, originally running to 300,000 words, have now been unearthed and reduced to publishable form. It is even happier that they have been edited with such style and skill by Edward David..." *TLS*

"Hobhouse's diaries covering the years 1893-1898 and 1904-1915 provide an accurate and unique view of many familiar personalities and events in early 20th-Century politics.... The editor has done a thorough job of introducing the material, identifying personages, and verifying the facts. The resulting book will be both useful to the historian and fascinating to the general reader." *Library Journal*

1978 ISBN 0-312-41868-X 295 pages \$16.95

## The Development of the British Welfare State, 1880-1975

J. R. Hay

*Documents of Modern History Series*

With the publication of this documentary survey, the student of modern British history will be able at last to trace the historical development of the British welfare state—in the words of the people involved where appropriate—and in the author's lucid commentaries in other instances. The book clearly illustrates the ambivalence of members of the working class toward social reform and demonstrates that their perception of social problems was, throughout the period, a good deal more complex and sophisticated than earlier historians understood.

1978 ISBN 0-312-19749-7 250 pages \$18.95

## Leonard Woolf A Political Biography

Duncan Wilson

Leonard Woolf, a man deeply committed to politics and social problems as well as a literary figure of major importance, had a significant influence on the development of the British Left in the early twentieth century. In this new biography Duncan Wilson traces the course of Leonard Woolf's political life and provides a masterly precis of the historical background against which Leonard Woolf's work has to be seen.

1978 ISBN 0-312-48001-6 288 pages \$18.50

## Social Reform in England, 1780-1880

John Roach

John Roach views social history primarily as the evolution of ideas under the pressure of events. He argues that the changes that produced the social pattern of nineteenth-century England began considerably earlier than the legislation of the 1830's and was maintained by a certain balance between individualistic philosophy and state power, which held until the 1880's.

1978 ISBN 0-312-73481-6 260 pages \$22.50

Duncan Bythell's comprehensive study traces for the first time the disappearance of the domestic system of mass-production, exploring the reasons for its prolonged tenacity as well as the reasons for its eventual decline.

1978 ISBN 0-312-77999-2 272 pages \$21.50

## Stuart England

J. P. Kenyon

In this interpretive survey, J. P. Kenyon addresses questions about Parliament's legislative role and character, England's prosperity, Stuart self-interest, and propriety in policy making. He demonstrates that the central issues for the seventeenth century were those of power, physical authority, and the ability to command obedience.

The House of Commons  
Sessional Papers of the Eighteenth Century

edited by Sheila Lambert

“One of the most significant projects of recent years . . . it clearly supercedes both the so-called Abbot Collection . . . and the fifteen volumes *Reports from Committees of the House of Commons 1715–1801*.”

“. . . for every research library it should become an essential holding.”  
— *The British Studies Monitor*

“. . . easily eclipsing the old 19th-century selections of the Abbot Collection. There has never been and there will never be a collection quite as complete and indispensable.” — *Choice*

“A facsimile reproduction of the House of Commons sessional papers of the eighteenth century in itself constitutes a valuable service to historians of the period, whatever their particular interest. But it is still more of service when it comes with two introductory volumes as excellent as Sheila Lambert’s.”
