

## THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of one or more of *The Mathematical Gazette*, *Mathematics in School*, *Primary Mathematics* (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced rate. Those interested in becoming members should contact MA Headquarters for information and application forms. The address of the Association Headquarters is **259 London Road, Leicester LE2 3BE, UK (telephone 0116 221 0013)**. The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to **Teaching Committee** should be addressed to TC Chair. The **Association's Library** is housed in the University Library, Leicester. Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

### THE MATHEMATICAL GAZETTE

*Editor:*

Dr Gerry Leversha,  
15 Maunder Road,  
Hanwell,  
London W7 3PN  
*g.leversha@btinternet.com*

*Problem Corner:*

Mr Nick Lord,  
Tonbridge School,  
Tonbridge,  
Kent TN9 1JP  
*njl@tonbridge-school.org*

*Production Editor:*

Mr Bill Richardson,  
Kintail,  
Longmorn,  
Elgin IV30 8RJ  
*wpr3145@gmail.com*

*Reviews Editor:*

Mr Owen Toller,  
4 Caldwell House,  
48 Trinity Church Road,  
London SW13 8EJ  
*owen.toller@btinternet.com*

Potential advertisers e-mail Charlotte Dyason at: [charlotted@media-shed.co.uk](mailto:charlotted@media-shed.co.uk)

Material for publication should be sent to the Editor.

Books for review should be sent to the Reviews Editor.

*Advice to authors of notes and articles.*

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS may be submitted electronically, preferably in pdf format, or, if sent by post, should be typed and two copies included. (Mathematical expressions may be hand written.) Please send electronic files by e-mail. This edition of the *Gazette* was produced on an Acorn machine using TechWriter and Draw.

10.1017/mag.2022.57

## CONTENTS (continued)

### 106.16 (continued)

Polynomials and a generalised Lagrange theorem	<i>Melvyn B. Nathanson</i>	120
Interpretation of Cramer's rule	<i>Hailiang Hu</i>	124
Equality of sums of square roots	<i>Nguyen Xuan Tho</i>	125
A problem involving triangles	<i>Prithwijit De</i>	127
Old proof of the harmonic mean – arithmetic mean inequalities	<i>Ángel Plaza</i>	130
Words: the Cauchy-Schwarz inequality in analytic geometry	<i>Edney Freitas Gregorio</i>	132
A proof without words	<i>Mehdi Hassani</i>	133
Metric inequality	<i>Victor Oxman, Moshe Stupel</i>	134
Proof of Bottema's theorem	<i>Dario Pellegrinetti</i>	135
The $n$ -dimensional isoperimetric theorem	<i>Tran Quang Hung</i>	136
Equality	<i>Juhaina A. Shahbari, Moshe Stupel</i>	138
The Finsler-Hadwiger inequality	<i>Martin Lukarevski</i>	138
Lukarevski's conjecture	<i>Nguyen Xuan Tho</i>	143
Numbers are cubes - a planar problem	<i>Stephan Berendonk</i>	147
Words		
Words		
Simultaneous evaluation of $\sum k^3$ and $\sum k^2$	<i>Nick Lord</i>	149
A chemist (again!)	<i>Nick Lord</i>	149
Optimisation problems	<i>Nick Lord</i>	151
Words		155

## CONTENTS

n circles	<i>Howard Sporn</i>	1
angles and the ral	<i>Aldo Scimone</i>	9
Langley's problem	<i>John R. Silvester</i>	21
of the formula $\sum_{n=0}^{\infty} \frac{1}{(2n+1)^2} = \frac{\pi^2}{8}$	<i>Lubomir Markov</i>	28
ing with examples ports	<i>Talaat Abdin, Hosam Mahmoud, Arian Modarres, Kai Wang</i>	32
from Jakob Steiner ations	<i>Alexandru Gîrban, Bogdan D. Suceavă</i>	41
of squares and sums of cubes	<i>G. J. O. Jameson</i>	54
of equalisation problems	<i>Toshio Nakata</i>	61
ivation of the sum of fifth powers	<i>Michael Heinrich Baumann</i>	68
of the angle semi-bisectors	<i>Mowaffaq Hajja</i>	78
ong-forgotten trigonometric ne function and its inverse	<i>Seán M. Stewart</i>	84
principle for convex functions	<i>G. J. O. Jameson</i>	95
y to discover the rainbow	<i>Joscha Prochno and Michael Schmitz</i>	103
<b>106.16</b>		
visors of L.C.M. of the nbers	<i>Angad Singh</i>	116
nce problem revisited	<i>Nguyen Xuan Tho</i>	117
