

## CONTENTS (continued)

### Notes 105.01 to 105.15 (continued)

Almost Goldbach theorems	<i>Clement E. Falbo</i>	111
Polynomials with no real zeros	<i>Aaron Melman</i>	117
Simpler derivation of Bring radical	<i>Raghavendra G. Kulkarni</i>	120
The Hermite-Sylvester criterion for real-rooted polynomials	<i>Melvyn B. Nathanson</i>	122
A golden ratio enigma	<i>Adolf Cusmariu</i>	125
An infinitesimal definition of limit	<i>Benjamin Baumslag</i>	126
Monotonic ratios of functions	<i>G. J. O. Jameson</i>	129
Right-angled triangles link circular and hyperbolic functions	<i>Blanca Isabel Niel</i>	134
Median-parallelogic and median-orthologic triangles	<i>Thanh Tung Vu</i>	136
Two solutions to a Sangaku problem	<i>Robert Bosch</i>	139
Proximity of the incentre to the inarc centres	<i>Martin Lukarevski</i>	142
Cubes, cones and the Gauss-Bonnet theorem	<i>J. N. Ridley</i>	148
Could Newton have calculated the deflection angle of starlight?	<i>Robert L. Lamphere</i>	154

### Teaching Notes

A small note on small angle approximations	<i>Nick Lord</i>	159
$\sum_{n=2}^{\infty} \frac{1}{nH_{n-1}}$ diverges while $\sum_{n=2}^{\infty} \frac{1}{nH_n^{1+\varepsilon}}$ converges	<i>J. Marshall Ash and Ángel Plaza</i>	161

### MA 150

From the Editor-in-Chief	<i>Bill Richardson</i>	24
--------------------------	------------------------	----

<b>Feedback</b>		163
-----------------	--	-----

<b>Problem Corner</b>	<i>Nick Lord</i>	169
-----------------------	------------------	-----

<b>Student Problems</b>	<i>Stan Dolan</i>	175
-------------------------	-------------------	-----

<b>Reviews</b>		178
----------------	--	-----

## CONTENTS

### Articles

Peter Michael Neumann OBE	<i>Adam McBride and Barbara Cullingworth</i>	1
Some mathematical appreciations in the physical sciences	<i>John Mahony</i>	4
Two ways to generate monotonic sequences: convexity and ratios	<i>G. J. O. Jameson</i>	16
Ubiquitous cousins and parental slides	<i>Tony Crilly and Colin R. Fletcher</i>	27
On cardioids and Morley's theorem	<i>John R. Silvester</i>	40
Pitot's theorem, dynamic geometry and conics	<i>A. F. Beardon</i>	52
Geometrical theorems about conservation of area for use in classroom activities	<i>Moshe Stupel, Shula Weissman and Idan Tal</i>	61
Applications of the sine and cosine rules for a quadrilateral	<i>Radimir Viher, Dragutin Viher and Helena Koncul</i>	70
Why are there no infinite left-sided decimal expansions?	<i>A. C. Paseau</i>	78
A group structure on the golden triples	<i>Howard Sporn</i>	87
Visually suggestive but mathematically incorrect	<i>Prabir Kumar Paul</i>	98
<b>Notes 105.01 to 105.15</b>		
On some composite Fibonacci expressions	<i>Martin Griffiths</i>	106
Some essential properties of Farey series in one Pic(k)ture	<i>Michael Schmitz</i>	108
