

## Online Oryx

Access to the electronic version of *Oryx* is something many of our members have asked for. We are now therefore delighted to be able to offer online access to the journal. Online access provides readers with:

- electronic access to past *Oryx* issues dating from 1950
- instant access (no waiting for the post!)
- access to the *Oryx* archive search facility
- the opportunity to reduce their use of paper and packaging

Whether you are an existing *Oryx* subscriber or are considering becoming a member of Fauna & Flora International to gain access to one of conservation's foremost journals, *Oryx* online is available to all. *Oryx* is valued around the world, both by those who read the journal and by the scientists who publish in and use the journal for their conservation work.

*'Your support is much appreciated and comes as a breath of fresh air in this highly tensed academic atmosphere.'*

— Malika Virah-Sawmy, conservationist in Madagascar and *Oryx* author

*'I have read the July issue from cover to cover and find it really informative for my MSc in Wildlife Management and Conservation.'*

— Kenny Armstrong, student

Online access to *Oryx* is available to both existing and new members. Those wishing to join Fauna & Flora International as a member can do so by visiting

**[www.fauna-flora.org/membership](http://www.fauna-flora.org/membership)**

Once you have subscribed we will contact you to ask whether you would prefer to receive *Oryx* online or as a printed copy. If you change your mind later your preference can be amended at any time.

Existing members can contact Fauna & Flora International's Membership Secretary Ken Richard on +44 (0)1223 579472 or [ken.richard@fauna-flora.org](mailto:ken.richard@fauna-flora.org) to find out more and to discuss their preference. Please rest assured that if we don't hear from you we will continue to send a printed copy of *Oryx* to you.

## A LIFETIME DEDICATED TO CONSERVATION

### Our Vision

A sustainable future for the planet, where biodiversity is effectively conserved by the people who live closest to it, supported by the global community

### Our Mission

Fauna & Flora International acts to conserve threatened species and ecosystems worldwide, choosing solutions that are sustainable, based on sound science and take account of human needs

“ I have been a member of Fauna & Flora International since the 1950s... investment in the work of FFI is truly an investment in the future of our planet ”

**Sir David Attenborough**

Innovative conservation since 1903

**JOIN US TODAY

THE FUTURE  
OF LIFE  
ON EARTH**

## **SUPPORT FAUNA & FLORA INTERNATIONAL**

Please consider one of the following ways in which you can make a world of difference to the survival of species:

- **Become a Member of Fauna & Flora International at [www.fauna-flora.org/membership](http://www.fauna-flora.org/membership)**
- **Remember Fauna & Flora International in your will at [www.fauna-flora.org/leave-a-legacy](http://www.fauna-flora.org/leave-a-legacy)**
- **Make a donation today at [www.fauna-flora.org/donate](http://www.fauna-flora.org/donate)**

To find out more please see over the page.

**THANK YOU**

## CONTACT US

To find out more about how you can help **Fauna & Flora International** please get in touch in one of the following ways:

Visit our website [www.fauna-flora.org](http://www.fauna-flora.org)

By email at [info@fauna-flora.org](mailto:info@fauna-flora.org)

Contact us by **post** at one of our international offices:

**In the UK:**

Fauna & Flora International  
4th Floor, Jupiter House  
Station Road  
Cambridge

## THANK YOU

## Instructions for contributors

Before submitting material to *Oryx—The International Journal of Conservation* please carefully read and follow the journal's full Instructions for contributors (including the General instructions, Guidelines for preparation of figures and plates, and the Code of conduct for researchers contributing articles) at [oryxthejournal.org](http://oryxthejournal.org).

### How to submit a manuscript

By submitting an article to *Oryx* you join an international community of conservation practitioners, researchers and academics. Necessarily high standards mean that not all manuscripts are accepted, but following the advice in the full Instructions for contributors at [oryxthejournal.org](http://oryxthejournal.org) will facilitate your submission. To submit material to the journal you will need to create an account at [mc.manuscriptcentral.com/oryx](http://mc.manuscriptcentral.com/oryx). All article types, Letters, replies to Letters and Conservation News items must be submitted online. During the submission you will be asked to indicate that the submitted manuscript has not been published, or submitted for publication, elsewhere, that all authors have abided by the Code of conduct for researchers contributing articles, and that all authors have read the submitted manuscript and agreed to its submission. You will then be given a unique reference number that you must use in all correspondence with the Editorial Office, always including it in the subject line of any e-mail so that we can respond promptly.

### General instructions

See the full General instructions at [oryxthejournal.org](http://oryxthejournal.org) for details of the types of articles that *Oryx* considers, manuscript requirements, the prescription for the presentation of text, Tables, Figures, Plates and Appendices/Supplementary material, and other relevant matters.

### Open Access option

The Cambridge Open Option gives authors the option to make their articles freely available to everyone, immediately on publication, in exchange for a one-off charge paid either by the authors or by their associated funding body. Payment of this one-off fee entitles permanent archiving both by Cambridge University Press and by the author, and enables anyone else to view, search and download an article for personal and non-commercial use. See [oryxthejournal.org](http://oryxthejournal.org) for full details.

### Guidelines for preparation of figures and plates

For detailed guidance on designing maps and data plots, advice on the wise use of graphics formats, and video screencast demonstrations to help with drafting beautiful figures, please see the journal's online *Graphics for Conservation* manual. Figures are printed at widths of 79, 107.5 and 165 mm (3.1, 4.2 and 6.5 inches, respectively); wherever possible, design for the narrower widths. See recent issues of the journal for examples of suitably designed Figures. Plates (i.e. photographs) are usually printed at 79 mm width. On initial submission Figures and Plates can be at low to medium resolution as long as they are legible. For accepted articles we require Figures and Plates at publication quality. We welcome colour Figures and Plates but they can be printed only at the author's expense; contact the Editorial Office for a costing. Figures and Plates can, however, be published in colour online and greyscale in print at no cost to the author; in such cases authors need to ensure that any colour graphic will also reproduce well in greyscale. See [oryxthejournal.org](http://oryxthejournal.org) for the full guidelines.

### Code of conduct for researchers contributing articles

We believe it is important that conservation research conforms to the highest possible ethical and legal standards, and the journal therefore has a Code of conduct for researchers contributing articles. When you submit an article for consideration by *Oryx* you will be required to assent that all authors on the article have abided by this Code of conduct. See [oryxthejournal.org](http://oryxthejournal.org) for the full text.

### How to submit other material

*Oryx* is well known for its coverage of international conservation news and related matters, and we welcome contributions to these sections of the journal. Send all prospective Briefly news and details of Grants & Opportunities to the Editorial Office. To submit Letters, replies to Letters and Conservation News items see [oryxthejournal.org](http://oryxthejournal.org). Deadlines for material for the Briefly (news items <6 months old and <150 words in length summarizing recent conservation developments that have been published by authoritative sources, including websites), Conservation News (major recent developments, <6 months old and <700 words, in conservation or important announcements that have not been published elsewhere) and Grants & Opportunities (short descriptions, <350 words, of grants and funding opportunities for conservationists) sections are 1 October, 1 January, 1 April and 1 July for the January, April, July and October issues, respectively. See [oryxthejournal.org](http://oryxthejournal.org) for full details.

- Cover** Transboundary haze pollution as a result of indiscriminate land clearance by fire has significant health and economic impacts on member states of the Association of South-east Asian Nations, and the impact of the associated carbon emissions, ecological disturbance and biodiversity loss extends beyond South-east Asia. Although the fires are mostly in Indonesian territory (seen here close to Gunung Leuser National Park, Sumatra), the involvement of multiple hierarchies of stakeholders in Indonesia, Malaysia and Singapore adds complexity to the quest for lasting solutions. Rather than being a source of discord, however, combating haze pollution could become South-east Asia's defining environmental project. For further details, see pp. 207–213.
