## Editorial Policy

*THE BEHAVIORAL AND BRAIN SCIENCES* (BBS) is an international journal providing a special service called Open Peer Commentary\* to researchers in any area of psychology, neuroscience, behavioral biology, or cognitive science who wish to solicit, from fellow specialists within and across these BBS disciplines, multiple responses to a particularly significant and controversial piece of work. (See *Instructions for Authors and Commentators*, inside back cover.) The purpose of this service is to contribute to the communication, criticism, stimulation, and particularly the unification of research in the behavioral and brain sciences, from molecular neurobiology to artificial intelligence and the philosophy of mind.

Papers judged by the editors and referees to be appropriate for Commentary are circulated to a large number of commentators selected by the editors, referees, and author to provide substantive criticism, interpretation, elaboration, and pertinent complementary and supplementary material from a full cross-disciplinary perspective. The article, accepted commentaries, and the author's response then appear simultaneously in BBS.

The service of Open Peer Commentary is primarily devoted to original articles appearing first in BBS, but it will occasionally be extended to a recent book or already published paper widely judged to be particularly appropriate for Commentary. The editorial office will consider recommendations from the BBS readership concerning possible topics, authors or already published materials for future BBS Commentary. (Please consult the criteria for accepting manuscripts in the *Instructions*, inside back cover.)

Commentary on BBS articles may be provided by any qualified professional in the behavioral and brain sciences, but much of it is drawn from a large body of BBS Associates who have become formally affiliated with the project.

A qualified professional is eligible to become a BBS Associate if he or she has (1) been nominated by a current BBS Associate, (2) refereed for BBS, or (3) had a commentary

or article accepted for publication. Individuals interested in serving as BBS Associates are asked to write to the editor.

This publication was supported in part by NIH Grant LM 03539 from the National Library of Medicine.

## Copying

This journal is registered with the Copyright Clearance Center, (21 Congress St., Salem, MA 01970). Organizations in the U.S.A. who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright Law) subject to payment to the CCC of the per-copy fee indicated in the code on the first page of the article. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Sheet Service, 325 Chestnut Street, Philadelphia, PA 19106, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Press.
