# LIFE

## THE SCIENCE OF BIOLOGY

---

**William K. Purves** PhD *Stuart Mudd Professor of Biology, Harvey Mudd College*

and **Gordon H. Orians** PhD *Professor of Zoology, University of Washington*

This new introductory textbook examines all the major topics of contemporary biology. Emphasizing the unity of life, the book reflects current thinking in areas such as ecology and evolution in which advances have outstripped the coverage of most introductory texts.

Material on plants and animals is covered in parallel chapters and the sections on biochemistry, cellular function and genetics are written with particular attention to clarity and ease of comprehension.

1983. 1182 pages, 1200 illustrations. £19.50

### **Instructor's Manual**

This comprehensive manual is divided into five sections: Section summaries and objectives; Article references; Essay questions; Multiple choice test sets, and Answers.

1983. 290 pages. Free on request

### **Student Study Guide**

Each chapter of the guide parallels a chapter in the textbook and each of the six components serves a specific purpose. The book is divided into: Chapter at a glance; Key terms; Organizing and testing your knowledge; Practice examinations, and Integrating and reinforcing your knowledge.

1983. 356 pages. £5.95

*Published by Sinauer Associates and Willard Grant Press*

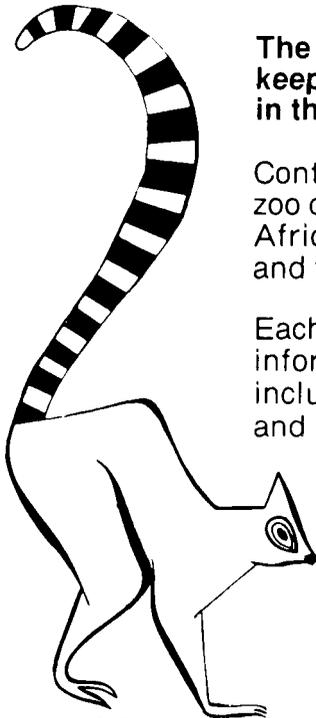

*Distributed outside North America by Blackwell Scientific Publications*

---

The magazine for those who wish to keep up-to-date with developments in the zoo world.

Contributions from distinguished zoo directors and wildlife keepers in Africa, Australasia, Asia, Europe and the USA.

Each issue contains up-to-date information from the world's zoos including records of births, deaths and breeding programmes.

Unsurpassed as a forum for information for those involved in the preservation of rare species through captive breeding.
