*Thinking and Writing About Literature* combines three books in one — a composition text, an introduction to literature, and a thematic anthology — all working together to help students become better academic writers, better literary readers.

*“The strength of Thinking and Writing About Literature lies in the fact that it puts writing first; it asks students to approach literature as writers (rather than starting first as readers and then realizing that they also need to write something).”*

— Shari Horner, *Shippensburg University*

With its unique emphasis on how authors talk about what they do, this introductory anthology lets the words of the writers guide students in their exploration of the many ways to read, think, and write about literature.

*“I not only find Literature and Its Writers to be an excellent instructional text, but I feel that my students are spending a semester with a literary gold mine. Many of them discover this and read far more selections than are assigned for the course.”*

— Jane Whorton, *Pearl River Community College*
