Laws, Outlaws, and Terrorists

LESSONS FROM THE WAR ON TERRORISM

Gabriella Blum and Philip B. Heymann

"This is an excellent work, with highly creative proposals and sensitive analysis. The most important task in the wars on terror will be the mutual adaptation of strategy and law in order to provide a legitimate basis on which such wars can be fought. It is to this end that Heymann and Blum have made a major contribution."

The Minimum Wage and Labor Market Outcomes

Christopher J. Flinn

"One of the more intriguing undercurrents in minimum wage research over the last two decades has been the reevaluation of the predicted effects of minimum wages in labor market models characterized by search frictions, rather than the standard competitive model. Flinn does an outstanding job both synthesizing this technically difficult literature and showing how the search framework can be used to evaluate not only the employment effects of minimum wages but also their welfare implications. An invaluable contribution to the research literature on minimum wages and on job search models more generally."
