

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

Studies in Second Language Acquisition

Volume 47 Number 1 March 2025

ANNOUNCEMENTS

<i>Announcing the 2025 Susan Gass Award for Impact in SLA</i>	1–1
<i>The 2024 Albert Valdman Award</i>	2–2

RESEARCH ARTICLES

<i>Why are some articles highly cited in applied linguistics? A bibliometric study</i> Sai Zhang and Vahid Aryadoust	3–25
<i>Individual differences in L2 listening proficiency revisited: Roles of form, meaning, and use aspects of phonological vocabulary knowledge</i> Kazuya Saito, Takumi Uchihara, Kotaro Takizawa, and Yui Suzukida	26–52
<i>Modulating motion event categorization through brief training: Meaning-focused versus form-focused instructional conditions</i> Yuyan Xue and John N. Williams	53–79
<i>Do they like me? Exploring the role of metaperception in L1–L2 speaker interaction</i> Chaoqun Zheng, Pavel Trofimovich, Rachael Lindberg, Kim McDonough, and Masatoshi Sato	80–103
<i>Different variables hold varying significance from childhood to adolescence: Exploring individual differences in grammar development of Japanese heritage speakers</i> Maki Kubota, Yuka Goto, Satsuki Kurokawa, Yuko Matsuoka, Masashi Otani, and Jason Rothman	104–135
<i>The role of processing goals in second language predictive processing: A visual-world eye-tracking study of Korean honorific agreement</i> Hyunwoo Kim, Kitaek Kim, and Joonhee Kim	136–156
<i>Contextual learning and retention of phrasal verbs: The effects of definition placement and typographic enhancement</i> Mojtaba Tadayonifar, Irina Elgort, and Anna Siyanova-Chanturia	157–180
<i>Embarrassment in English language classrooms: Conceptualization, antecedents, and consequences</i> Gholam Hassan Khajavy, Dávid Smid, Sarah Mercer, and Carlos Murillo-Miranda	181–204
<i>The light side of darkness? The dark triad of personality as positive and negative predictors of L2 language learning</i> Faramarz Ebn-Abbasi, Nazila Fattahi, Jean-Marc Dewaele, and Louise Botes	205–229
<i>Assessing accent anxiety: A measure of foreign English speakers' concerns about their accents</i> Qingyao Xue and Kimberly Noels	230–256
<i>Cross-language interactions of phonetic and phonological processes: Intervocalic plosive lenition in Afrikaans-Spanish bilinguals</i> Andries W. Coetzee, Nicholas Henriksen, and Lorenzo García-Amaya	257–281
<i>The relationships among L2 fluency, intelligibility, comprehensibility, and accentedness: A meta-analysis</i> Tuc Chau and Amanda Huensch	282–307
<i>Challenges in inflected word processing for L2 speakers: The role of stem allomorphy</i> Rosa Salmela, Minna Lehtonen, Seppo Vainio, and Raymond Bertram	308–335
<i>The impact of collocational proficiency features on expert ratings of L2 English learners' writing</i> Ben Naismith and Alan Juffs	336–360

STATE OF THE SCHOLARSHIP

<i>Phonological processing and the L2 mental lexicon: Looking back and moving forward</i> Isabelle Darcy, Miquel Llompart, Rachel Hayes-Harb, Joan C. Mora, Miren Adrian, Svetlana Cook, and Mirjam Ernestus	361–387
<i>A meta-analysis of the reliability of second language reading comprehension assessment tools</i> Huijun Zhao and Vahid Aryadoust	388–416

REPLICATION STUDY

<i>Optimizing distributed practice online: A conceptual replication of Cepeda et al. (2009)</i> John Rogers, Tatsuya Nakata, and Ming Ming Chiu	417–439
--	---------

RESEARCH REPORT

<i>Effects of phonetic training and cognitive aptitude on the perception and production of non-native speech contrasts</i> Susana Correia, Anabela Rato, Yuxin Ge, João Dinis Fernandes, Magdalena Kachlicka, Kazuya Saito, and Patrick Rebuschat	440–457
--	---------

RETRACTION

<i>Effects of retrieval schedules on the acquisition of explicit, automatized-explicit, and implicit knowledge of L2 collocations – CORRIGENDUM – RETRACTION</i> Nan Fang, Irina Elgort, and Zhuo Chen	458–458
---	---------

CORRIGENDUM

<i>Effects of retrieval schedules on the acquisition of explicit, automatized-explicit, and implicit knowledge of L2 collocations – CORRIGENDUM</i> Nan Fang, Irina Elgort, and Zhuo Chen	459–460
--	---------
