

# THE MATHEMATICAL GAZETTE

EDITED FOR THE MATHEMATICAL ASSOCIATION BY  
T. A. A. BROADBENT, M.A.  
ROYAL NAVAL COLLEGE, GREENWICH, LONDON, S.E. 10.

LONDON

G. BELL & SONS, LTD., PORTUGAL STREET, KINGSWAY, W.C. 2

Vol. XXIX., No. 287.      DECEMBER, 1945.      4s. Net.

## CONTENTS.

	PAGE
MATHEMATICAL MODELS AND CONSTRUCTIONS. A. P. ROLLETT,	181
DIFFERENTIALS FROM A NEW VIEWPOINT. A. BARTON,	193
SOME DIFFICULTIES IN TEACHING THE <i>D</i> METHOD IN LINEAR DIFFERENTIAL EQUATIONS. C. A. COULSON,	200
SIMPLE NOMOGRAMS. J. H. CADWELL,	203
AMPLITUDE OF TRIODE OSCILLATIONS. F. B. PIDDUCK,	206
HARMONIC POLYGONS. T. SHARE,	210
AN ASYMPTOTIC SERIES FOR COMPUTING $\pi$ . A. P. GUINAND,	214
THE LIMAÇON AND THE CARDIOID. J. P. MCCARTHY,	219
TWO TRIPOS QUESTIONS. G. N. WATSON,	221
MATHEMATICAL NOTES (1843-1849) L. CRAWFORD; R. L. GOODSTEIN; G. H. HARDY; H. V. LOWBY; R. C. LYNNESS; E. H. NEVILLE; C. E. WRIGHT,	225
REVIEWS. R. L. GOODSTEIN; R. RADO; A. P. ROLLETT; A. W. SIDDONS,	236
CORRESPONDENCE. B. M. BROWN,	192
GLEANINGS FAR AND NEAR (1466-1476),	199
"THE AUSTRALIAN MATHEMATICS TEACHER",	235
WANTED,	235
NEWS OF BRANCHES,	242

Intending members of the Mathematical Association are requested to communicate with one of the Secretaries, G. L. Parsons, Merchant Taylors' School, Sandy Lodge, Northwood, Middlesex; Mrs. E. M. Williams, Goldsmiths' College, at University College, Nottingham. The subscription is 15s. per annum, and is due on Jan. 1st. It includes the subscription to "The Mathematical Gazette".

Change of Address should be notified to Miss W. M. Lehfeldt, 82 King's Road, Richmond, Surrey. If Copies of the "Gazette" fail for lack of such notification to reach a member, duplicate copies can be supplied only at the published price.

Subscriptions should be paid to the Hon. Treasurer, Mathematical Association Gordon House, 29 Gordon Square, London, W.C.1.

# A TEXT BOOK OF **ELEMENTARY ASTRONOMY**

By **E. Agar Beet**

*24 plates, 68 text-pages. 8s. 6d. net*

This is perhaps a forward-looking book, for while it will no doubt give pleasure to many who have a desire to define their general knowledge about astronomy, the author's aim is to provide a book that can be used in actual lessons in schools. Astronomy is often recommended as a school subject but seldom taught, although the Science Masters' Association has in fact drawn up a syllabus, which this book covers.

Mr Beet's earlier book, *A Guide to the Sky*, has been in constant demand. That book was an observational introduction. The present makes an experimental and historical approach. It introduces the elementary principles of Light along with its astronomical instruction, it describes many simple experiments, and concludes with questions covering each chapter's reading. Much care has been given to the choice and preparation of photographs and drawings.
