

Winner of the New York State Historical Association's 1997 Dixon Ryan Fox Manuscript Prize

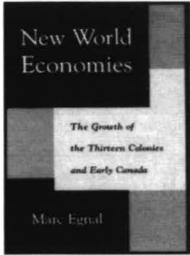

THE BIRTH OF EMPIRE

DeWitt Clinton and the American Experience, 1769-1828

EVAN CORNOG

"Active sponsor of the Erie Canal, founder of the New-York Historical Society, and devoted supporter of the cultural and industrial growth of city and state, DeWitt Clinton comes alive in this story of the origins of the greatest city in the world."—Edward I. Koch, former Mayor of New York

1998 234 pp. \$29.95

NEW WORLD ECONOMIES

The Growth of the Thirteen Colonies and Early Canada

MARC EGNAL

"This is an important and useful book, for its refinement of the existing theoretical frame, its wealth of empirical data, its breath of context, and especially for its study of synchronic change in the Atlantic world of the eighteenth century. Marc Egnal is the master of this subject."—David Hackett Fischer, author of *Albion's Seed* and *The Great Wave*

1998 256 pp. \$49.95

NO ONE WAS TURNED AWAY

The Role of Public Hospitals in New York City Since 1900

SANDRA OPDYCKE

Portraying the hospital as an urban institution that reflects the social, political, economic, demographic, and physical changes of the surrounding city, this book links the role of public hospitals to the ongoing debate about the place of public institutions in American society.

1998 264 pp. \$29.95

OXFORD
UNIVERSITY PRESS

Winner of the 1995 Allan Nevins Prize

A MOTHER'S JOB

The History of Day Care, 1890-1960

ELIZABETH ROSE

Using Philadelphia as a case study, Rose traces the transformation of day care from a charity for poor single mothers in the early 20th century to a socially accepted need of ordinary families by the 1950s.

1998 296 pp. \$45.00

FREE MARKETS AND SOCIAL JUSTICE

CASS R. SUNSTEIN

"This is a splendid book on foundational issues in public policy. Cass Sunstein's legal scholarship and originality combine well with his knowledge of the social sciences to make it a most illuminating contribution."—Amartya Sen, Master, Trinity College, Cambridge, winner of the 1998 Nobel Prize in Economic Science

1997 (paper 1999) 416 pp.
paper \$19.95 cloth \$35.00

CIGARETTE WARS

The Triumph of the "Little White Slaver"

CASSANDRA TATE

"The *New York Times* condemned nicotine's 'disastrous effects' in 1879? Anti-tobacco campaigns are more than a century old? Cigarettes were thought perilous because of their link to sex? *Cigarette Wars* surprises, informs, and shakes convictions... in prose as lucid as it is engaging."—Paul Solman, Economics Correspondent, *The NewsHour with Jim Lehrer*.

1998 224 pp. \$29.95

THE LOST WORLD OF CLASSICAL LEGAL THOUGHT

Law and Ideology in America, 1886-1937

WILLIAM M. WIECEK

"...a remarkable achievement. It has an extraordinary sweep, synthesizing with admirable clarity a transformation of enormous scope and importance."—Richard Friedman, Oxford University

The New Financial Capitalists

Kohlberg Kravis Roberts
and the Creation of Corporate Value

**George P. Baker and
George David Smith**

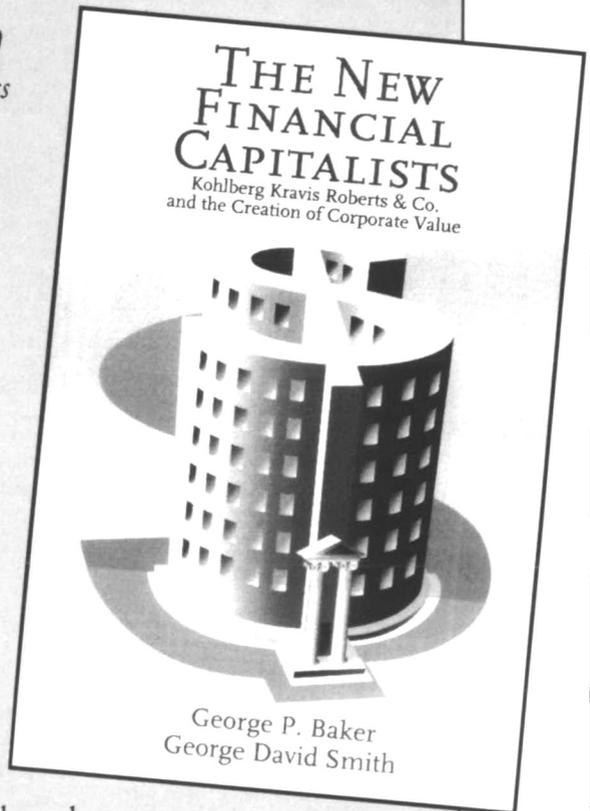

*"Economist Baker and business
historian Smith eloquently
explain KKR's success, the
political restraints and social
taboos it has overcome..."*

—Library Journal

*Featured on
The Bloomberg Forum

No one would contest the profound impact of Kohlberg Kravis Roberts and the leveraged buyout on business. But what, precisely, has that impact been? Baker and Smith demonstrate how KKR fundamentally altered the prevailing perception of the role of debt in the modern corporation. This unique book offers a close insider look at the phenomenon of the leveraged buyout, those who perfected it, and what it has meant for business.

New from Princeton

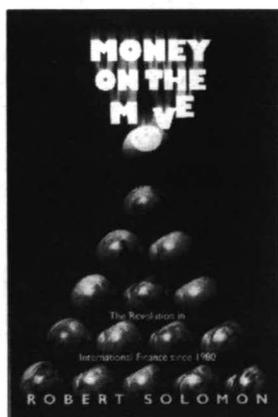

Black '47 and Beyond

The Great Irish Famine in History, Economy, and Memory
Cormac Ó Gráda

Cormac Ó Gráda is Ireland's premier economic historian and one of the leading authorities on the Great Irish Famine. Here he moves away from the traditional narrative historical approach to the catastrophe and concentrates instead on fresh insights available through interdisciplinary and comparative methods. The broad scope of this book is matched by its remarkable range of sources. It will be the starting point for all future research into the Irish famine.

The Princeton Economic History of the Western World: Joel Mokyr, Editor
Cloth \$35.00 ISBN 0-691-01550-3

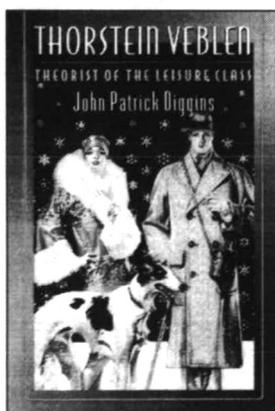

Money on the Move

The Revolution in International Finance since 1980
Robert Solomon

The international monetary system has changed radically in the last twenty years. In this book, Robert Solomon presents the first comprehensive history of this revolution in international finance. Authoritative, accessible, and elegantly written, the book will be indispensable for anyone who wishes to understand how today's international monetary system works.

"The best presentation of the topic that I have seen. The content is effectively organized and the book is exceptionally well written."
—Dominick Salvatore

Cloth \$29.95 ISBN 0-691-00444-7

New in paperback, with a new introduction Thorstein Veblen

Theorist of the Leisure Class
John Patrick Diggins

Thorstein Veblen is a baffling figure in American intellectual history. This important critical biography—originally published as *The Bard of Savagery* and now appearing in paperback for the first time—attempts both to unravel the riddles that surround his reputation and to assess his varied and important contributions to modern social theory.

"A most important, incisive, and readable study of Thorstein Veblen."—John Kenneth Galbraith

Abstracts of Working Papers in Economics

THE OFFICIAL JOURNAL OF THE AWPE DATABASE

Editor

HALBERT WHITE, *University of California, San Diego*

AWPE is the best point of access for thousands of working papers in all areas of economics, finance and econometrics. From its network of over 70 research centers worldwide, **AWPE** provides full bibliographic information including author addresses, price and availability, plus complete abstracts for these very current and often hard-to-get working papers. Each issue includes about 400 of the latest papers, all indexed by author, issuing institution, and enhanced by a unique keyword/permutated title index. This invaluable resource for economic and financial research on any level is also available as a special feature of the American Economic Association's on-line database and CD-ROM. ■

MACROECONOMIC DYNAMICS

Editor

WILLIAM A. BARNETT

Washington University, St. Louis

Macroeconomic Dynamics

publishes theoretical, empirical and quantitative research of the highest standard. Papers of high quality are welcome from all areas of advanced macroeconomics and allied fields, so long as the research is founded in a rigorous scientific approach. Major advances in macroeconomics without immediate policy applications

also are accepted, if they show potential for application in the future. Occasional book reviews, announcements, conference proceedings, and interviews are also published. An electronic version of the journal is published simultaneously with the paper version, enabling immediate access to the best current research in macroeconomics.

Quarterly (ISSN 1365-1005)

Subscription to Volume 3 (1999): Institutions \$155.00, Individuals \$75.00

For members of the Econometric Society, the Society for the Advancement of Economic Theory, the Society for Nonlinear Dynamics and Econometrics, the Society for Computational Economics, and the Society for the Promotion of Economic Theory, the subscription rate is \$49.00.

NEW

Paths of Innovation

Technological Change in 20th-Century America

**David C. Mowery and
Nathan Rosenberg**

Between discovery and application, between invention and widespread use, there is a world of innovation, of tinkering and improvements and adaptations. This is the world that David Mowery and Nathan Rosenberg map out in *Paths of Innovation*, an engaging tour of the intersecting routes

of technological change and economic growth in twentieth-century America. Throughout their book, Mowery and Rosenberg demonstrate that the simultaneous emergence of new engineering and applied science disciplines in the universities, in tandem with growth in the R&D industry and scientific research, has been a primary factor in the rapid rate of technological change. Innovation and incentives to develop new, viable processes have led to the creation of new economic resources—which will, in turn, determine the future of American technological innovation and economic growth.

War and British Society, 1688-1815

H.V. Bowen

In this book, the author draws on much new research to examine the effects of sustained warfare on eighteenth-century British society. War was a "characteristic feature" of the period, but recently the centrality of war in the development of Britain's economy and society has become increasingly apparent. The author shows that between 1688 and 1815 war touched all aspects of life in Britain, transforming a wide range of economic and social institutions, processes and structures. This book will be essential reading for all students of eighteenth-century British history, society and culture.

August Sartorius von Waltershausen

The Workers' Movement in the United States,
1879-1885

**David Montgomery and
Marcel van der Linden**

*In collaboration with Jan Gielkens and
Gregory Zieren*

August Sartorius von Waltershausen (1852-1938) was an eminent German economist who visited the United States at the beginning of the 1880s and wrote a series of articles on the U.S. labor movement. His training in the historical school of economics provided him with a different perspective from that of laissez-faire economists or socialists of his time. The articles, presented in this book with two essays, provide rich insights into the character of American workers' organizations as they recovered from the 1870s depression, before the establishment of strong national institutions.

Industrial Policy in Britain 1945-1951

Economic Planning, Nationalisation and the
Labour Governments

Martin Chick

This book is a detailed archive-based study that examines the economic planning of the Attlee governments in Britain in the period 1945-1951. In it the author discusses the workings of economic planning and its effects on business decision making. The book traces the origins of the nationalization program and asks how the decisions to form these industries into monopolies were taken. Finally, Martin Chick asks what impact, if any, economic planning had on the productivity performance of the UK economy.

FROM CAMBRIDGE

Manufacturing the Future

A History of Western Electric

**Stephen B. Adams and
Orville R. Butler**

Manufacturing the Future: A History of Western Electric is the first full-length history of the Western Electric Company, the manufacturing arm of the Bell System. As a manufacturer in the communications revolutions in the nineteenth and twentieth centuries, Western Electric made new products

such as telegraphs, telephones, an early computing machine, radios, radar, and transistors. The book demonstrates, through Western's 1882 acquisition by Bell Telephone, that vertical integration was a lengthy process rather than a single event. It also shows the coming of age of industrial psychology and describes the advent of civil rights in corporate America.

Middlemen of the Cameroon Rivers

The Duala and their Hinterland
c. 1600 – c. 1960

**Ralph A. Austen and
Jonathan M. Derrick**

This book is about the Duala "middlemen," who functioned as intermediaries between Europeans and their own hinterland for over three hundred years. Originally traders in ivory, slaves and palm products, they then became colonial-era cocoa planters, and finally took a leading role in anti-colonial politics. One of their lasting advantages was European education, which they used to develop ideas about their ethnicity and its historical basis. The authors criticize these local beliefs about the past but indicate what they reveal about power and identity in this region and elsewhere in Africa.

Wall Street to Main Street

Charles Merrill and Middle-Class Investors

Edwin J. Perkins

Wall Street to Main Street: Charles Merrill and Middle-Class Investors focuses on the spectacularly successful career of financier Charles Merrill (1885-1956), the founder of Merrill Lynch & Co., the world's largest brokerage and investment firm. Merrill was

the most innovative entrepreneur in the United States financial services sector in the twentieth century. Opening more than 100 branch offices across the nation by 1950, his firm solicited millions of middle-class households and became famous for bringing "Wall Street to Main Street" in the post-World War II era. Today, American investors hold, either directly or indirectly through mutual funds, a greater percentage of common stocks in their financial portfolios than do the citizens of any other country. Based on archival sources, this book is the first biography published about the career of this major Wall Street figure.

Sport, Economy and Society in Britain, 1750-1914

Neil Tranter

Neil Tranter draws on the recent surge of academic interest in this topic to provide a concise, up-to-date survey of a dramatic change in the cultural life of Victorian and Edwardian Britain: the radical transformation in the extent and nature of Britain's involvement in sports. Neil Tranter examines key questions such as the principal features of this new sporting culture, how and why it spread, and the economic consequences of this cultural change. He also looks at who the participants were, and to what extent women were involved in this sporting "revolution."

Winner of the APSA's Luebbert Prize for Best Book in Comparative Politics

The Politics of Oligarchy

Institutional Choice in Imperial Japan

J. Mark Ramseyer and Frances M. Rosenbluth

This book examines a key question of modern Japanese politics: why the Meiji oligarchs were unable to design institutions capable of protecting their power. The authors question why the oligarchs chose the political institutions they did, and what the consequences of those choices were for Japan's political competition, economic development, and diplomatic relations.

Mastering the Market

The State and the Grain Trade in Northern France, 1700-1860

Judith A. Miller

The grain trade, a crucial sector of the French economy, caused enormous concern throughout the eighteenth and early nineteenth centuries. Bread was the staple of French diets, so harvest shortfalls triggered unrest. Successive regimes developed hidden, but effective, strategies to dominate the baking trades, influence prices along vital supply lines, and amass emergency stocks.
