EDITORIAL POLICY

The *British Journal of Political Science* is an independent journal, whose policy is set by its editorial board. It is committed to no methodological orthodoxy over and above the normal canons of scholarship: clear and consistent use of words, logical and mathematical validity, and the use of appropriate evidence to substantiate empirical statements. Contributions are invited in all fields of political science, including political philosophy and political sociology. Work addressed to problems of general significance to students of politics will be published whatever the period(s) or place(s) drawn upon for evidence.

An Inquiry into the Nature and Causes of the Wealth of Nations

Adam Smith

Edited by R. H. Campbell, Andrew Skinner,
and W. B. Todd

In their introduction to this edition the editors show how all Smith's wide-ranging interests came together to produce in *The Wealth of Nations* the first and perhaps the most influential systematic treatise of classical economics. The text is that of the third edition (1784), the one most extensively revised by Smith. Two volumes £25 *The Glasgow Edition of the Works and Correspondence of Adam Smith*

The Theory of Moral Sentiments

Adam Smith

Edited by D. D. Raphael and A. L. Macfie

The Theory of Moral Sentiments was Smith's first book. Not only is it an important work of moral philosophy, especially for its account of sympathy and its theory of the impartial spectator, but it foreshadows the widening interests in economics, sociology, politics, and law that he took up in his later works. This is the first scholarly edition in English. £15 *The Glasgow Edition of the Works and Correspondence of Adam Smith*

Second City Politics

Democratic Processes and Decision-Making
in Birmingham

Kenneth Newton

How effective are the political institutions and processes which are supposed to guarantee the responsiveness and responsibility of political elites to citizens? This study draws on research material from Birmingham (the largest provincial city, and shown to be fairly typical of cities in Britain), using it to test some of the main theories of democracy in urban society. Paper covers £4.95

Toward a Planned Society

From Roosevelt to Nixon

Otis L. Graham, Jr.

The idea of national planning was tested in America during Franklin D. Roosevelt's New Deal, but was generally discredited. It is only in the last decade that the idea has been revived, and Professor Graham argues that the United States will be a planned society within a decade or so. He presents here the first general study of the ways in which Americans have considered public intervention to bring about national planning goals. £6.50
