Editor-in-Chief

Agneta Yngve, Karolinska Institutet, Sweden

Public Health Nutrition provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

Editor-in-chief

K. Younger, Dublin Institute of Technology, Ireland

Nutrition Research Reviews presents up-to-date, concise, critical reviews of key topics in nutritional science in order to advance new concepts and hypotheses. The journal encourages the exchange of fundamental ideas on nutritional well-being in both humans and animals.

Editor-in-chief

P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

(Contents continued from back cover)

Harrogate International Centre, Harrogate, UK, 4–5 November 2008

Conference on ‘Malnutrition matters’

Symposium 6: Young people, artificial nutrition and transitional care

Chair: M. Stroud, *Institute of Nutrition, University of Southampton, Southampton, UK*

The nutritional challenges of the young adult with cystic fibrosis: transition <i>A. M. Morton</i>	430–440
Transition in young people on home parenteral nutrition <i>S. Protheroe</i>	441–445

Proceedings of the Nutrition Society

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutritionociety.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or edoffice@nutsoc.org.uk (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235 × 177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Synopsis. Each paper must commence with a carefully prepared, accurate, informative synopsis, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Oraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

Monica Nelson
2 Leicester Road, Wanstead
London
E11 2DP
UK
email nelsononline@btinternet.com

Typescripts. The electronic version of the paper should be emailed to:

Professor C. Jamie Newbold
Proceedings Editor

10 Cambridge Court
210 Shepherd's Bush Road
London W6 7NJ
UK
email edoffice@nutsoc.org.uk

Contents

Editorial <i>C. J. Newbold</i>	339
-----------------------------------	-----

Royal Society of Edinburgh, Edinburgh, UK, 7–8 April 2009

Symposium on ‘Frontiers in adipose tissue biology’

Chair: P. Trayhurn, University of Liverpool, Liverpool, UK

Reversible physiological transdifferentiation in the adipose organ <i>S. Cinti</i>	340–349
Regulation of adipose tissue lipolysis revisited <i>V. Bézaire & D. Langin</i>	350–360
<i>n</i> -3 PUFA: bioavailability and modulation of adipose tissue function <i>J. Kopecky, M. Rossmeisl, P. Flachs, O. Kuda, P. Brauner, Z. Jilkova, B. Stankova, E. Tvrzicka & M. Bryhn</i>	361–369
Cellular hypoxia and adipose tissue dysfunction in obesity <i>I. S. Wood, F. Pérez de Heredia, B. Wang & P. Trayhurn</i>	370–377

Chair: D. Sewell, Heriot-Watt University, Edinburgh, UK

Chemotactic cytokines, obesity and type 2 diabetes: <i>in vivo</i> and <i>in vitro</i> evidence for a possible causal correlation? <i>H. Sell & J. Eckel</i>	378–384
New insights into adipose tissue atrophy in cancer cachexia <i>C. Bing & P. Trayhurn</i>	385–392
Early programming of adipose tissue function: a large-animal perspective <i>A. Mostyn & M. E. Symonds</i>	393–400
Thermogenesis challenges the adipostat hypothesis for body-weight control <i>B. Cannon & J. Nedergaard</i>	401–407

Centro de Convenções e Eventos Frei Caneca, São Paulo, Brazil, 2–4 October 2008

Symposium on ‘Early nutrition and later disease: current concepts, research and implications’

Chairs: B. S. Agostini, Núcleo, São Paulo, Brazil

New insights into nutrition and cognitive neuroscience <i>M. J. Dauncey</i>	408–415
The impact of diet during early life and its contribution to later disease: critical checkpoints in development and their long-term consequences for metabolic health <i>M. E. Symonds, S. P. Sebert & H. Budge</i>	416–421
Early nutrition and long-term health: a practical approach <i>J. Lanigan and A. Singhal</i>	422–429

(Contents continued facing inside back cover)
