

TRANSACTIONS

OF THE

ROYAL SOCIETY OF EDINBURGH.

VOLUME XLVII. PART IV.—SESSION 1910–11.

CONTENTS.

	PAGE.
XXII. <i>The Temperature Seiche.</i> Part I.—Temperature Observations in the Madiüsee, Pomerania Part II.—Hydrodynamical Theory of Temperature Oscillations in Lakes. Part III.— Calculation of the Period of the Temperature Seiche in the Madiüsee. By E. M. WEDDERBURN, W.S. Part IV.—Experimental Verification of the Hydrodynamical Theory of Temperature Seiches. By E. M. WEDDERBURN, W.S., and A. M. WILLIAMS, M.A., B.Sc. (With One Plate),	619
(Issued January 21, 1911.)	
XXIII. <i>The Jurassic Flora of Sutherland.</i> By A. C. SEWARD, F.R.S., Professor of Botany, Cam- bridge. Communicated by Dr R. KIDSTON, F.R.S. (Plates I.–X.; text-figures 1–14; sketch-maps, and views of the coast),	643
(Issued February 10, 1911.)	
XXIV. <i>On the Structure and Affinities of Diplolabis römeri (Solms).</i> By W. T. GORDON, M.A., B.Sc., B.A., Falconer Fellow of Edinburgh University, Lecturer in Palæontology, Edinburgh University. (With Four Plates),	711
(Issued February 4, 1911.)	
XXV. <i>Thermo-Electric Diagram from –200° C. to 100° C., deduced from the observations of</i> <i>Professors Dewar and Fleming.</i> By J. D. HAMILTON DICKSON, M.A., Peterhouse, Cambridge,	737
(Issued March 17, 1911.)	
XXVI. <i>The Plant Remains in the Scottish Peat Mosses.</i> Part IV. By FRANCIS J. LEWIS, M.Sc., F.L.S., Lecturer in Geographical Botany, University of Liverpool. (With Five Plates),	793
(Issued March 31, 1911.)	
XXVII. <i>On an Entoproctan Polyzoon (Barentsia benedeni) new to the British Fauna, with Remarks</i> <i>on Related Species.</i> By JAMES RITCHIE, M.A., B.Sc., Natural History Department, The Royal Scottish Museum. (With One Plate),	835
(Issued April 18, 1911.)	
XXVIII. <i>An Investigation into the Effects of Errors in Surveying.</i> By HENRY BRIGGS, B.Sc., A.R.S.M.,	849
(Issued April 18, 1911.)	

Title, Contents, and Index.

EDINBURGH:

PUBLISHED BY ROBERT GRANT & SON, 107 PRINCES STREET,
AND WILLIAMS & NORGATE, 14 HENRIETTA STREET, COVENT GARDEN, LONDON.

MDCCCXI.

Price Twenty-seven Shillings and Sevenpence.

CONTENTS.

PART I. (1908-09.)

NUMBER	PAGE
I. <i>Notes on Hydrodynamics, chiefly on Vortex Motion.</i> By Professor ANDREW GRAY, F.R.S.,	1
II. <i>The Glacial Deposits of Western Carnarvonshire.</i> By T. J. JEHU, M.D. (Edin.), M.A. (Camb.), F.G.S., Lecturer in Geology at the University of St Andrews. (With Four Plates and One Map),	17
III. <i>Scottish National Antarctic Expedition: Observations on the Anatomy of the Weddell Seal (Leptonychotes Weddelli).</i> By DAVID HEPBURN, M.D., Professor of Anatomy, University College, Cardiff (University of Wales). (With One Plate),	57
IV. <i>Supplementary Report on the Hydroids of the Scottish National Antarctic Expedition.</i> By JAMES RITCHIE, M.A., B.Sc., Natural History Department, The Royal Scottish Museum,	65
V. <i>The Meteorology of the Weddell Quadrant and Adjacent Areas.</i> By ROBERT C. MOSSMAN. (With Five Plates),	103
VI. <i>The Monsoons of the Chilian Littoral (Preliminary Note).</i> By R. C. MOSSMAN,	137
VII. <i>A Carboniferous Fauna from Nowaja Semlja, collected by Dr W. S. BRUCE.</i> By G. W. LEE, D.Sc., H.M. Geological Survey. With Notes on the Corals by R. G. CARRUTHERS. (With Two Plates),	143
VIII. <i>Scottish National Antarctic Expedition: Osteology of Antarctic Seals.</i> By ROBERT B. THOMSON, M.B., Ch.B., University of Edinburgh. (With One Plate),	187

PART II. (1909-10.)

NUMBER		PAGE
IX.	<i>Lower Palæozoic Hyolithidæ from Girvan.</i> By F. R. COWPER REED, M.A., F.G.S. (With Three Plates),	203
X.	<i>Report upon the Anatomy and Embryology of the Penguins collected by the Scottish National Antarctic Expedition, comprising: (1) Some Features in the Anatomy of the Penguin; (2) The Embryology of the Penguin: a Study in Embryonic Regression and Progression.</i> By D. WATERSTON, M.A., M.D., F.R.C.S.E., and A. CAMPBELL GEDDES, M.D. (With Three Plates),	223
XI.	<i>The Pharmacological Action of Harmaline.</i> By JAMES A. GUNN, M.A., M.D., D.Sc.,	245
XII.	<i>The Pharmacological Action of Protocatechyl-Tropeine.</i> By Professor C. R. MARSHALL,	273
XIII.	<i>The Pharmacological Action of Tutu, the Toot Plant of New Zealand.</i> By Professor C. R. MARSHALL,	287
XIV.	<i>On the Life-history of Hydrobius fuscipes, L.</i> By FRANK BALFOUR-BROWNE, M.A. (Oxon.), F.Z.S. (With Three Plates),	317
XV.	<i>Strophanthus sarmentosus: its Pharmacological Action and its Use as an Arrow-Poison.</i> By Sir THOMAS R. FRASER, M.D., F.R.S.S. L. & E., Professor of Materia Medica in the University of Edinburgh, and ALISTER T. MACKENZIE, M.A., M.B., Ch.B., Carnegie Research Scholar. (With Eleven Plates),	341

PART III. (1910-11.)

XVI.	<i>The Aborigines of Tasmania.</i> Part II.—The Skeleton. By Principal Sir WILLIAM TURNER, K.C.B., F.R.S., President of the Society. (With Two Plates),	411
XVII.	<i>On the Fossil Osmundaceæ.</i> Part IV. By R. KIDSTON, LL.D., F.R.S., F.G.S., Foreign Mem. K. Mineral. Gesell. zu St Petersburg, Hon. Sec. R.S.E.; and D. T. GWYNNE-VAUGHAN, M.A., F.L.S., Professor of Botany, Queen's University, Belfast. (Plates I.-IV.),	455

NUMBER		PAGE
XVIII.	<i>The Lamellibranchs of the Silurian Rocks of Girvan.</i> By WHEELTON HIND, M.D., B.S., F.R.C.S., F.G.S. (With Five Plates), . . .	479
XIX.	<i>The Alcyonaria of the Cape of Good Hope and Natal.</i> <i>Alcyonacea.</i> By J. STUART THOMSON, Ph.D., F.L.S. (With Four Plates), . . .	549
XX.	<i>The Phase of the Nucleus known as Synapsis.</i> By A. ANSTRUTHER LAWSON, Ph.D., D.Sc., F.L.S., F.R.S.E., Lecturer in Botany, University of Glasgow. (With Two Plates), . . .	591
XXI.	<i>Observations on the Body Temperature of the Domestic Fowl (Gallus gallus) during Incubation.</i> By SUTHERLAND SIMPSON, M.D., . . .	605

PART IV. (1910-11.)

XXII.	<i>The Temperature Seiche.</i> Part I.—Temperature Observations in the Madüsee, Pomerania. Part II.—Hydrodynamical Theory of Temperature Oscillations in Lakes. Part III.—Calculation of the Period of the Temperature Seiche in the Madüsee. By E. M. WEDDERBURN, W.S. Part IV.—Experimental Verification of the Hydrodynamical Theory of Temperature Seiches. By E. M. WEDDERBURN, W.S., and A. M. WILLIAMS, M.A., B.Sc. (With One Plate), . . .	619
XXIII.	<i>The Jurassic Flora of Sutherland.</i> By A. C. SEWARD, F.R.S., Professor of Botany, Cambridge. (Plates I.-X.; text-figures 1-14; sketch-maps, and views of the coast), . . .	643
XXIV.	<i>On the Structure and Affinities of Diplolabis römeri (Solms).</i> By W. T. GORDON, M.A., B.Sc., B.A., Falconer Fellow of Edinburgh University, Lecturer in Palæontology, Edinburgh University. (With Four Plates), . . .	711
XXV.	<i>Thermo-Electric Diagram from -200° C. to 100° C., deduced from the observations of Professors Dewar and Fleming.</i> By J. D. HAMILTON DICKSON, M.A., Peterhouse, Cambridge, . . .	737
XXVI.	<i>The Plant Remains in the Scottish Peat Mosses.</i> Part IV. By FRANCIS J. LEWIS, M.Sc., F.L.S., Lecturer in Geographical Botany, University of Liverpool. (With Five Plates), . . .	793

NUMBER	PAGE
XXVII. <i>On an Entoproctan Polyzoon (Barentsia benedeni) new to the British Fauna, with Remarks on Related Species.</i> By JAMES RITCHIE, M.A., B.Sc., Natural History Department, The Royal Scottish Museum. (With One Plate),	835
XXVIII. <i>An Investigation into the Effects of Errors in Surveying.</i> By HENRY BRIGGS, B.Sc., A.R.S.M.,	849
INDEX,	879
