

## NOTICE TO AUTHORS

Papers and short notes from contributors anywhere in the world are welcome, and may be on any aspect of lichenology. They should be typewritten in double or treble spacing. A summary should be included; exceptions may be permissible in taxonomic papers, floras, or short notes. Illustrations should be in black ink on white paper, preferably Bristol board.

Manuscripts should be in the hands of the editor by the end of January if they are to be considered for publication the same year.

In taxonomic papers dealing with a series of species it is convenient either to present them alphabetically or to number them serially in their genera.

Localities in Britain should, unless there is good reason to the contrary, follow the spelling given on the latest editions of the maps published by the Ordnance Survey.

Twenty-five reprints of original articles are supplied free. More may be purchased, as may reprints of other contributions such as reports of meetings. Reprints *must* be ordered when the author returns the final proofs of his article.

The citation of references should be based on the International Code of Botanical Nomenclature 1961 : 66.

Titles of periodicals should be abbreviated as in the *World List of Scientific Periodicals*. Titles of books should be given in full at the end of papers but may be judiciously abbreviated in lists of synonyms. Editions other than the first should be indicated.

### EXAMPLES :

In text : Watson (1932), (Watson, 1932), or Watson (1932 p. 284).

In the list at end of paper : Watson, W. (1932). The bryophytes and lichens of moorland. *J. Ecol.* 20 : 284.

Or if a book : Crombie, J. M. (1894). *A Monograph of Lichens Found in Great Britain*. London.

In list of synonyms : *Candelariella xanthostigma* (Ach.) Lett. in *Hedwigia* 52 : 196 (1912).

Or if a book : *Pyrenotea lutea* Leight., *British Species of Angiocarpous Lichens* : 68, tab. 29, fig. 4 (1851).

## MEMBERSHIP

Membership of the Society is open to all interested in lichenology. Subscriptions, due on joining and thence on 1 January each year, are : ordinary members, 30s. ; junior members, 15s. ; family members, 5s. Libraries and other institutions may purchase the *Lichenologist* at the current rate for ordinary membership. Further details may be obtained from the Secretary, Mr. J. R. Laundon, Department of Botany, British Museum (Natural History), Cromwell Road, London S.W.7.

## Referees

The function of referees is to assist members in the identification of lichens. Their names appear inside the front cover. Specimens submitted should be adequate in size and well documented, including details of habitat, precise locality, county or vice-county, date of collecting, and name of collector. The person sending the material should attempt to identify the specimens before sending them to a referee and should enclose details of spore sizes and chemical reactions where appropriate. Return postage should be included.

# THE LICHENOLOGIST

Vol. 3 Part 1

1965

WADE, A. E.—The Genus <i>Caloplaca</i> Th. Fr. in the British Isles	1– 28
HENSSEN, AINO.—A Review of the Genera of the Collemataceae with Simple Spores (excluding <i>Physma</i> )	29– 41
MORGAN-JONES, G., and SWINSCOW, T. D. V.—On the Genus <i>Microglæna</i> Körb.	42– 54
SWINSCOW, T. D. V.—The Marine Species of <i>Arthopyrenia</i> in the British Isles. Pyrenocarpous Lichens : 8	55– 64
LAUNDON, J. R.—Lichens New to the British Flora : 3	65– 71
SWINSCOW, T. D. V.—Pyrenocarpous Lichens : 9	72– 83
AHTI, TEUVO.—Some Notes on British Cladoniae	84– 88
RICHARDSON, D. H. S., and GREEN, B. H.—A Subfossil Lichen	89– 90
AHTI, TEUVO.—Notes on the Distribution of <i>Lecanora conizaeoides</i>	91– 92
SHEARD, J. W.— <i>Lecanora</i> (Sect. <i>Aspicilia</i> ) <i>leproscens</i> Sandst.	93– 94
JAMES, P. W.—A New Check-list of British Lichens	95–153
