International Law, the International Court of Justice and Nuclear Weapons

Laurence Boisson de Chazournes and Philippe Sands, Editors

On July 8, 1996 the International Court of Justice handed down two Advisory Opinions on the legality of nuclear weapons. This book offers a comprehensive study of those opinions. More than thirty internationally respected experts contribute their analyses of the status of nuclear weapons in international law across all its sectors: use of force, humanitarian law, environment and human rights. Fundamentalism, Sectarianism, and Revolution

The Jacobin Dimension of Modernity

S. N. Eisenstadt

This book is a major comparative analysis of fundamentalist movements in historical and cultural context, spanning revolutionary France, America and Japan, with an emphasis on the contemporary scene. Leading sociologist S. N. Eisenstadt examines the protofundamentalist movements that arose in the great "axial civilizations" in premodern times in order to illuminate the meaning of the global rise of fundamentalism that is shown to be an important current in modernity. The central theme of the book is the distinctively Jacobin features of fundamentalist movements and their ambivalent attitude to tradition.

Leaders in

Democratic Politics and Economic Reform in India

Rob Jenkins

Successive Indian governments have remained committed to market-oriented reform since its introduction in 1991. In a well-argued and controversial examination of the political dynamics that underlie that commitment, Jenkins challenges existing theories of the relationship between democracy and economic liberalization. He contends that while democracy and liberalization are no longer considered incompatible, the new thinking emphasizes the wholesome aspects of democracy, downplaying the temptations of populism and its reliance on obfuscatory tactics in defusing political resistance. In fact, the author argues, it is through such political maneuvering that democracy survives.

Sources of Industrial Leadership

Studies of Seven Industries

David C. Mowery and Richard R. Nelson, Editors

This book describes and analyzes how seven major high-tech industries evolved in the United States, Japan, and Western Europe. The industries covered are machine tools, organic chemical products, pharmaceuticals, medical devices, computers, semiconductors, and software. In each of these industries, firms located in one or a very few countries became the clear technological and commercial leaders. In a number of cases, the locus of leadership changed, sometimes more than once, over the course of the histories studied. The focus of the book is on the key factors that supported the emergence of national leadership in each industry, and the reasons behind the shifts when they occurred. Special attention is given to the national policies that helped to create or sustain industrial leadership.

Organizing Democracy in Eastern Germany

Interest Groups in Post-Communist Society

Stephen Padgett

This book examines the emergence and functioning of interest groups in post-communist society, an issue central to democratic transformation. Although the focus is on eastern Germany, comparisons are made throughout with the other countries of eastern and central Europe. Analysis of a number of interest groups, notably trade unions, business groups and professional associations, is set against the background of pluralist political theory. Stephen Padgett argues that the pattern of collective action in post-communist society falls short of the pluralist ideal, and examines the implications for both East and West.

International Organizations before National Courts

August Reinisch

This book presents a radical, empirical investigation of how national courts "react" to disputes involving international organizations, analyzing in particular whether such organizations should be immune to national jurisdictions. Under the headings "domestic legal personality" and "immunity" of international organizations, some of the issues covered have already been treated in international legal scholarship, mostly in the form of short articles or case notes. This study, however, provides a thorough comparative analysis and the largest compilation of relevant decisions on the subject, making it indispensable for practitioners as well as academics in the field.

Politics and the Law

Politicians Don't Pander

Political Manipulation and the Loss of Democratic Responsiveness

Lawrence R. Jacobs and Robert Y. Shapiro

"*Politicians Don't Pander* is an important addition to the debate about how public opinion is or should be used in a political democracy. Unlike many commentators on this subject Jacobs and Shapiro not only comprehend how polling is used, but recognize how that properly fits with democratic practice. Jacobs and Shapiro's depiction of 'crafted talk' is a genuine contribution to our political education, and is one that unquestioning journalists and manipulative politicians will surely resist."

The Federal Impeachment Process

A Constitutional and Historical Analysis
Second Edition

Michael J. Gerhardt

Impeachment, Michael Gerhardt shows, is an inherently political process designed to expose and remedy political crimes. Subject neither to judicial review nor to presidential veto, it is a unique congressional power that involves both political and constitutional considerations, including the gravity of the offense charged, the harm to the constitutional order, and the link between an official's misconduct and duties. Significantly updated, this book will be the standard work on the federal impeachment process for years to come.

Thirteen leading scholars and world leaders reflect upon the significance of democracy as a system of government and its consequences both within individual countries and internationally.  WITH A FOREWORD BY ISTVÁN DEÁK

One of the most terrible legacies of our century is the concentration camp. Countless men and women have passed through camps in Nazi Germany, Communist China, and the Soviet bloc countries. In *Voices from the Gulag*, Tzvetan Todorov singles out the experience of one country where the concentration camps were particularly brutal and emblematic of the horrors of totalitarianism—communist Bulgaria.

Democracy, Justice, and the Welfare State

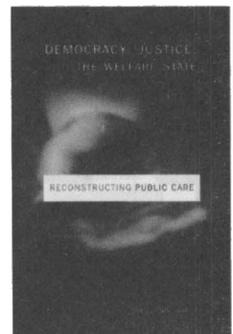

Reconstructing Public Care

JULIE ANNE WHITE

"This is an extremely clear, thoughtful, and sophisticated treatment of a range of issues surrounding the relationships among care, needs, justice, and democracy. Julie Anne White seeks to relocate the idea of care (away from the 'independent' rights-bearing individual) upon terrain where it is not vulnerable to the critique of neo-liberals. But, at the same time, she resists certain conventional formulations of needs and of justice as (impartial) fairness—formulations that tend to devalue actors' own accounts of their needs and, with it, their autonomy. Her appeal is to reconstruct care on the model of dialogic and discursive democracy."

Obstacles to Building the Rule of Law in El Salvador

MARGARET L. POPKIN

"This is a fascinating book. It is an excellent study of judicial reform and the transition to democracy in El Salvador. Popkin shows in convincing fashion the enormous difficulties involved in attempting to reform El Salvador's judiciary. In the process, she often makes helpful comparisons to Argentina, Chile, and Haiti. The book makes a very significant contribution to the extensive literature on the protection of human rights in Latin America, as well as on judicial reform and judicial independence."

Institutional Constraints to Democratic Consolidation

PETER SIAVELIS

"Siavelis provides an insightful and detailed analysis of the Chilean constitutional and party system in the post-authoritarian era. As part of his outstanding contribution he highlights those institutional features that are likely to cause serious problems for the functioning of the Chilean democratic system in the near future as well as offers several thoughtful suggestions for constitutional reforms. Students of democratic institutions will benefit immensely from this excellent study as will anyone concerned with democracy in Chile."

Feminist Interpretations of David Hume

This book is the first collection of feminist essays on David Hume. Besides providing a rich variety of feminist viewpoints on a wide range of Hume's writings, the contributors introduce new themes into the scholarship on Hume, including gendered metaphors in his metaphysical texts, the role of society in the conception of the human mind, and his conception of human nature in relation to recent rejections of essentialism.

Veto Bargaining

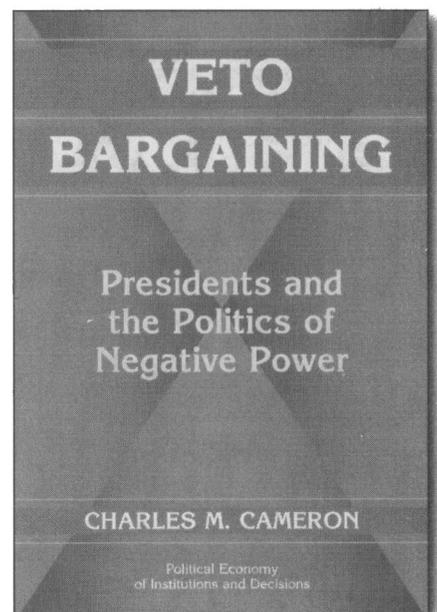

Presidents and the Politics of Negative Power

Charles M. Cameron

With one party controlling the presidency and the opposing party controlling Congress, the veto has inevitably become a critical tool of presidential power. Combining sophisticated game theory with unprecedented data, this book analyzes how divided party presidents use threats and vetoes to wrest policy concessions from a hostile Congress. Case studies of the most important vetoes in recent history add texture to the analysis, detailing how President Clinton altered the course of Newt Gingrich's Republican Revolution. Offering the first book-length analysis to bring rational choice theory to bear on the presidency, *Veto Bargaining* is a major contribution to our understanding of American politics in an age of divided party government.

Disaffected Democracies

What's Troubling the Trilateral Countries?

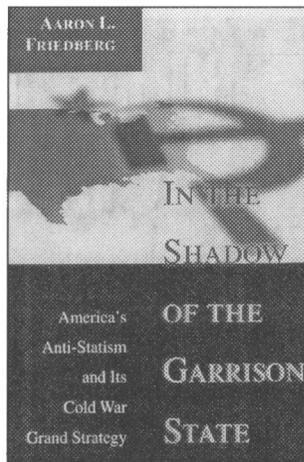

Edited by Susan J. Pharr and Robert D. Putnam

It is a notable irony that, as democracy replaces other forms of governing throughout the world, citizens of the most established democracies increasingly report dissatisfaction with their governments. Here, some of the most influential political scientists at work today examine why this is so.

"Anyone who wants to understand the state of the art on this matter should, and I hope will, read this book. There is simply no other work like it."

In the Shadow of the Garrison State

America's Anti-Statism and Its Cold War Grand Strategy

Aaron L. Friedberg

War—or the threat of war—usually strengthens states. The United States, however, was founded on the suspicion of state power. Aaron Friedberg convincingly argues that anti-statist inclinations prevented Cold War anxieties from transforming the United States into the garrison state it might have become in their absence.

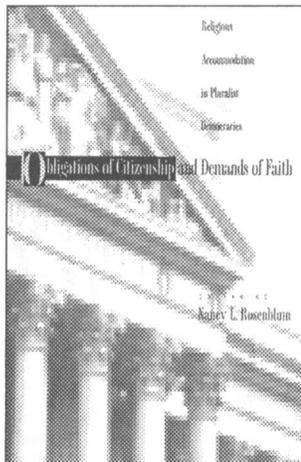

"This is one of the most exciting books I've read in years. . . . Aaron Friedberg will emerge, with this book, as one of those rare scholars whose work redefines an entire field."

Obligations of Citizenship and Demands of Faith

Religious Accommodation in Pluralist Democracies

Edited by

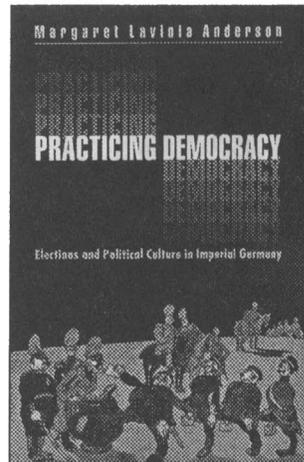

Nancy L. Rosenblum

Of the many challenges facing liberal democracy, none is as powerful and pervasive today as those posed by religion. These are the challenges taken up in this exploration of the place of religion in contemporary public life.

"This book makes a powerful and important case for a greater presence of religion in contemporary democratic life and does this while insisting that this is consistent with the liberal ideals of a pluralist society. It is an important and distinguished volume."

Practicing Democracy

Elections and Political Culture in Imperial Germany

Margaret Lavinia Anderson

What happens when manhood suffrage, a radically egalitarian institution, gets introduced into a deeply hierarchical society? Margaret Anderson shows how the sudden opportunity to "practice" democracy in 1867 affected Germany.

"The very best, most detailed and most comprehensible picture of political life in Imperial Germany available in any language. It marks a new stage in the development of our knowledge about the practice and culture of popular politics in the nineteenth century—not just in Germany, but in the entire European and North American world."

The Strategic Constitution

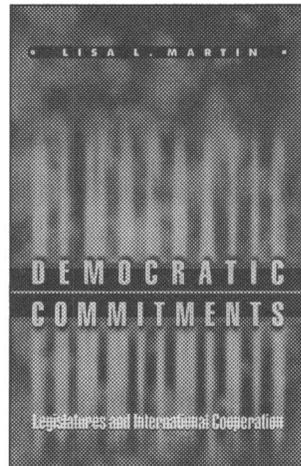

Robert D. Cooter

Robert Cooter argues that constitutional theory should focus on the real-world consequences of various constitutional provisions and choices. Pooling the best available theories from economics and political science, particularly those developed from game theory, Cooter's economic analysis of constitutions fundamentally recasts a field of growing interest and dramatic international importance.

"This is a superb synthesis, application, and extension of four decades of research in economics and political science on the effects of formal political institutions on economics, law, and politics. . . . The scope of the book is simply breathtaking."

Democratic Commitments

Legislatures and International Cooperation

Lisa L. Martin

Legislatures often interfere with national leaders' efforts to reach and implement predictable international agreements. In this thoughtful, empirically grounded challenge to the assumption that messy domestic politics undermine democracies' ability to conduct international relations, Lisa Martin argues that legislatures actually serve foreign policy well by giving credibility to the international commitments that are made. She concludes that—if institutionalized—even rancorous domestic conversations between executives and legislatures augment rather than impede states' international dealings.

Ruling the World

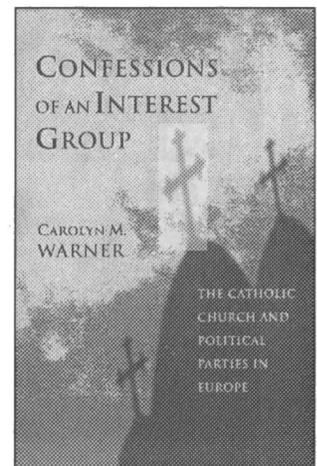

Power Politics and the Rise of Supranational Institutions

Lloyd Gruber

The last few decades have witnessed an extraordinary transfer of policy-making prerogatives from individual nation-states to supranational institutions. The notion that political institutions are mutually beneficial—that they would never come into existence, much less grow in size and assertiveness, were they not "Pareto-improving"—is today's conventional wisdom. But is it true?

In this richly detailed and strikingly original study, Lloyd Gruber suggests that this emphasis on cooperation's positive-sum consequences may be leading scholars of international relations down the wrong theoretical path.

Confessions of an Interest Group

The Catholic Church and Political Parties in Europe

Carolyn M. Warner

Following World War II, the Catholic Church in Europe faced the challenge of establishing political influence with newly emerging democratic governments. The Church became, as Carolyn Warner pointedly argues, an interest group like any other. The author analyzes the Church's differing strategies in Italy, France, and Germany using microeconomic theories of the firm and historical institutionalism.

Reform in the Making

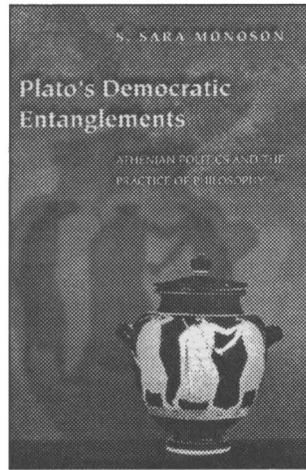

The Implementation of Social Policy in Prison

Ann Chih Lin

Is it time to give up on rehabilitating criminals? Record numbers of Americans are going to prison, and most of them will eventually return to society with a high chance of becoming repeat offenders. But a decision to abandon rehabilitation programs now would be premature warns Ann Chih Lin.

By offering an in-depth look at common rehabilitation programs currently in operation—education, job training, and drug treatment—and examining how they are used or misused, Lin offers a practical approach to understanding their high failure rate and how they could be improved.

Plato's Democratic Entanglements

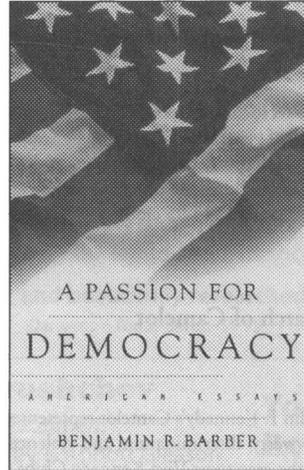

Athenian Politics and the Practice of Philosophy

S. Sara Monoson

Sara Monoson challenges the widely held view that Plato is a virulent opponent of all things democratic. She does not, however, offer the equally mistaken idea that he is a partisan of democracy. Instead, she argues that we should attend more closely to Plato's suggestion that democracy is horrifying and exciting, and she seeks to explain why he found it morally and politically intriguing.
