

ADVANCES IN APPLIED PROBABILITY

INCLUDING A SECTION ON

STOCHASTIC GEOMETRY AND
STATISTICAL APPLICATIONS

VOLUME 37

NUMBER 4

DECEMBER 2005

CO-EDITORS-IN-CHIEF **C. C. HEYDE**
S. ASMUSSEN

FOUNDING EDITOR (1964–1989) **J. GANI**

ADVANCES IN APPLIED PROBABILITY

This is a companion publication to the *Journal of Applied Probability* published by the Applied Probability Trust. It contains reviews and expository papers in applied probability, as well as mathematical and scientific papers of interest to probabilists, letters to the editor and a section devoted to stochastic geometry and statistical applications (SGSA). An annual volume of up to 1200 pages is published in four issues appearing in March, June, September and December.

EDITORIAL BOARD

- Co-Editors-in-Chief* C. C. HEYDE (Columbia University and Australian National University)
S. ASMUSSEN (Aarhus Universitet)
- Coordinating Editors* N. H. BINGHAM (University of Sheffield)
I. MOLCHANOV SGSA (Universität Bern)
- Editors* R. J. ADLER (Technion, Haifa)
R. AMBARTZUMIAN SGSA (National Academy of Sciences of Armenia)
A. J. BADDELEY SGSA (University of Western Australia)
P. BRÉMAUD (ENS, Paris, and EPFL, Lausanne)
C. CANNINGS (University of Sheffield)
E. ÇINLAR (Princeton University)
R. COWAN SGSA (University of Sydney)
D. J. DALEY (Australian National University)
P. J. DONNELLY (University of Oxford)
P. EMBRECHTS (ETH, Zürich)
A. HORDIJK (Universiteit Leiden)
P. JAGERS (Chalmers University of Technology and Göteborgs Universitet)
S. JANSON (Uppsala Universitet)
W. S. KENDALL SGSA (University of Warwick)
G. KERSTING (Johann Wolfgang Goethe-Universität, Frankfurt am Main)
J. F. C. KINGMAN (Isaac Newton Institute, Cambridge)
C. KLÜPPELBERG (Technische Universität München)
T. MIKOSCH (Københavns Universitet)
S. I. RESNICK (Cornell University)
L. C. G. ROGERS (University of Cambridge)
M. SCARSINI (Università di Torino)
A. L. STOLYAR (Lucent Technologies)
D. STOYAN SGSA (Bergakademie Freiberg)
J. L. TEUGELS (Katholieke Universiteit Leuven)
E. B. VEDEL JENSEN SGSA (Aarhus Universitet)
D. VERE-JONES SGSA (Victoria University of Wellington)
R. A. VITALE SGSA (University of Connecticut)
R. R. WEBER (University of Cambridge)
W. WEIL SGSA (Universität Karlsruhe)
W. WHITT (Columbia University)

EDITORIAL OFFICE

- Executive Editor* L. J. NASH (University of Sheffield)
Production Editor D. J. WINTERS (University of Sheffield)

All correspondence relating to the submission of papers should be sent to: The Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK. Subscription rates and notes for contributors are to be found on the inside back cover.

CONTENTS

Volume 37 **Number 1**

Stochastic Geometry and Statistical Applications

- 1 PAUL BALISTER, BÉLA BOLLOBÁS, AMITES SARKAR AND MARK WALTERS. Connectivity of random k -nearest-neighbour graphs
- 25 LOTHAR HEINRICH, HENDRIK SCHMIDT AND VOLKER SCHMIDT. Limit theorems for stationary tessellations with random inner cell structures
- 48 JESPER MØLLER AND GIOVANNI LUCA TORRISI. Generalised shot noise Cox processes

General Applied Probability

- 75 LAURA PONTIGGIA. Two-person red-and-black with bet-dependent win probabilities
- 90 S. N. ETHIER AND DAVID A. LEVIN. On the fundamental theorem of card counting, with application to the game of trente et quarante
- 108 M. YA. KELBERT, N. N. LEONENKO AND M. D. RUIZ-MEDINA. Fractional random fields associated with stochastic fractional heat equations
- 134 J.-P. LEPELTIER, A. MATOUSSI AND M. XU. Reflected backward stochastic differential equations under monotonicity and general increasing growth conditions
- 160 JUAN ALVAREZ AND BRUCE HAJEK. A queue with semiperiodic traffic
- 185 ANTONIS ECONOMOU. Generalized product-form stationary distributions for Markov chains in random environments with queueing applications
- 212 FRANCISCO J. PIERA, RAVI R. MAZUMDAR AND FABRICE M. GUILLEMIN. On product-form stationary distributions for reflected diffusions with jumps in the positive orthant
- 229 NARIYUKI MINAMI. On the number of vertices with a given degree in a Galton–Watson tree
- 265 NICOLAS LANCHIER. Phase transitions and duality properties of a successional model

Stochastic Geometry and Statistical Applications

- 279 L. MUCHE. The Poisson–Voronoi tessellation: relationships for edges
297 DANIEL HUG AND MATTHIAS REITZNER. Gaussian polytopes: variances and limit theorems

General Applied Probability

- 321 MICHAEL DRMOTA AND HSIEN-KUEI HWANG. Profiles of random trees: correlation and width of random recursive trees and binary search trees
342 C. C. HEYDE AND N. N. LEONENKO. Student processes
366 J. M. ANGULO, V. V. ANH, R. McVINISH AND M. D. RUIZ-MEDINA. Fractional kinetic equations driven by Gaussian or infinitely divisible noise
393 JANET HEFFERNAN AND SIDNEY RESNICK. Hidden regular variation and the rank transform
415 KAIS HAMZA, SAUL JACKA AND FIMA KLEBANER. The equivalent martingale measure conditions in a general model for interest rates
435 VADIM LINETSKY. On the transition densities for reflected diffusions
461 A. C. BROOMS. On the Nash equilibria for the FCFS queueing system with load-increasing service rate
482 QUAN-LIN LI AND YIQIANG Q. ZHAO. Heavy-tailed asymptotics of stationary probability vectors of Markov chains of GI/G/1 type
510 YIQING CHEN, KAI W. NG AND QIHE TANG. Weighted sums of subexponential random variables and their maxima
523 M. ISPÁNY, G. PAP AND M. C. A. VAN ZUIJLEN. Fluctuation limit of branching processes with immigration and estimation of the means
539 A. B. DIEKER AND M. MANDJES. On asymptotically efficient simulation of large deviation probabilities
553 JEAN BERTOIN AND SERVET MARTÍNEZ. Fragmentation energy

Stochastic Geometry and Statistical Applications

- 571 ERY ARIAS-CASTRO, DAVID L. DONOHO, XIAOMING HUO AND CRAIG A. TOVEY. Connect the dots: how many random points can a regular curve pass through?
- 604 DARYL J. DALEY AND GÜNTER LAST. Descending chains, the lilypond model, and mutual-nearest-neighbour matching
- 629 JESPER MØLLER AND JAKOB G. RASMUSSEN. Perfect simulation of Hawkes processes

General Applied Probability

- 647 MICHAEL G. B. BLUM AND OLIVIER FRANÇOIS. Minimal clade size and external branch length under the neutral coalescent
- 663 VICTOR F. ARAMAN AND PETER W. GLYNN. Diffusion approximations for the maximum of a perturbed random walk
- 681 J. D. BIGGINS AND A. RAHIMZADEH SANI. Convergence results on multitype, multivariate branching random walks
- 706 CHUNSHENG MA. Spatio-temporal variograms and covariance models
- 726 HARRI NYRHINEN. Power estimates for ruin probabilities
- 743 BORIS BUCHMANN AND CLAUDIA KLÜPPELBERG. Maxima of stochastic processes driven by fractional Brownian motion
- 765 N. BALAKRISHNAN, A. G. PAKES AND A. STEPANOV. On the number and sum of near-record observations
- 781 RAUL GOUET, F. JAVIER LÓPEZ AND GERARDO SANZ. Central limit theorems for the number of records in discrete models
- 801 RICHARD F. SERFOZO. Reversible Markov processes on general spaces and spatial migration processes
- 819 JUN CAI AND HAILIANG YANG. Ruin in the perturbed compound Poisson risk process under interest force
- 836 SHUANMING LI AND JOSÉ GARRIDO. On a general class of renewal risk process: analysis of the Gerber–Shiu function

Letter to the Editor

- 857 RICHARD COWAN AND S. N. CHIU. Extension of Deltheil's study on random points in a convex quadrilateral

Stochastic Geometry and Statistical Applications

- 859 WERNER NAGEL AND VIOLA WEISS. Crack STIT tessellations: characterization of stationary random tessellations stable with respect to iteration
- 884 TOMASZ SCHREIBER. Random dynamics and thermodynamic limits for polygonal Markov fields in the plane
- 908 DAVID VERE-JONES. A class of self-similar random measure

General Applied Probability

- 915 E. L. ÖRMECİ AND A. BURNETAS. Dynamic admission control for loss systems with batch arrivals
- 938 SERGIO ALBEVERIO AND SHUJI KAWASAKI. On a localization property of wavelet coefficients for processes with stationary increments, and applications. I. Localization with respect to shift
- 963 MARTIN JACOBSEN. The time to ruin for a class of Markov additive risk process with two-sided jumps
- 993 VICKY FASEN. Extremes of regularly varying Lévy-driven mixed moving average processes
- 1015 SAUL D. JACKA, ZORANA LAZIC AND JON WARREN. Conditioning an additive functional of a Markov chain to stay nonnegative. I. Survival for a long time
- 1035 SAUL D. JACKA, ZORANA LAZIC AND JON WARREN. Conditioning an additive functional of a Markov chain to stay nonnegative. II. Hitting a high level
- 1056 ANYUE CHEN, PHIL POLLETT, HANJUN ZHANG AND BEN CAIRNS. Uniqueness criteria for continuous-time Markov chains with general transition structures
- 1075 QUAN-LIN LI AND YIQIANG Q. ZHAO. Light-tailed asymptotics of stationary probability vectors of Markov chains of GI/G/1 type
- 1094 DAVID ALDOUS AND LEA POPOVIC. A critical branching process model for biodiversity
- 1116 PIERRE BRÉMAUD, LAURENT MASSOULIÉ AND ANDREA RIDOLFI. Power spectra of random spike fields and related processes
- 1147 Index (General Applied Probability)
- 1150 Index (Stochastic Geometry and Statistical Applications)
