

Index of Subjects

Small roman numerals refer to pages in Abstracts of Communications read at Open Scientific Meetings of The Nutrition Society.

- Adrenal cortex, intracellular distribution of vitamin C (Bourne) xii
- Age and energy expenditure, man (Durnin) 89, (Passmore) 83
- Agene metabolism, and toxic effects (Barnes) 148
- Agenized flour, toxic effects for various animals and man compared (Barnes) 148
- Algae, possible technological production of food protein from (Pirie) 154
- Ammonia, rumen concentration, and dietary supplement of groundnut meal or herring meal, sheep (Chalmers & Marshall) vi
- Anaemia, Addisonian pernicious, and folic-acid deficiency and vitamin B₁₂, man (Spray) 119
- Anaemia, and diet and intestinal bacteria, man (Platt & Wadsworth) 103
- Anaemia and diet, man (Davidson) 101, (Evans) 126, (Gatenby) 115, (Platt & Wadsworth) 103, (Wokes) 134, (Woodruff) 110
- Anaemia, and dietary factors, infection, injury, cancer, intestinal bacteria and parasites, man (Platt & Wadsworth) 103
- Anaemia incidence, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Anaemia, iron-deficiency, and diet, season, parity, iron therapy, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Anaemia and iron deficiency, protein deficiency, parasitic infection in the tropics, man (Woodruff) 110
- Anaemia, macrocytic, suggested interrelationships of haematopoietic factors, man (Spray) 119
- Anaemia, megaloblastic, associated with gastric surgery, intestinal structural abnormality or steatorrhoea, labelled-vitamin B₁₂ absorption, effect of intrinsic factor, antibiotics, man (Evans) 126
- Anaemia, megaloblastic, and diet, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Anaemia(s), megaloblastic, in the tropics, and therapy with Marmite, liver extracts, folic acid, vitamin B₁₂, man (Woodruff) 110
- Anaemia(s), nutritional, incidence in Great Britain, 1920 and 1956 compared, man (Davidson) 101
- Anaemia, pernicious, labelled-vitamin B₁₂ absorption, effect of intrinsic factor, antibiotics, man (Evans) 126
- Anaemia and protein deficiency and haematopoiesis, dog, man, rat (Platt & Wadsworth) 103
- Anaemia and protein deficiency and serum-protein values, man (Woodruff) 110
- Anaemia(s) and pteroylglutamic-acid therapy, man (Spray) 119
- Animal(s) *see also under* Cow, Dog, Goat, Guinea-pig, Lamb, Monkey, Mouse, Pig, Rabbit, Rat, Ruminant(s) and Sheep
- Animal(s), absorption of sterols (Cook) 41
- Animal(s), nutrition and food technology (Duckworth) 160, (Pirie) 154
- Antibiotic(s) *see also under* Aureomycin and Oxytetracycline
- Antibiotic, dietary content, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Antibiotic(s), effect on absorption of labelled vitamin B₁₂ in pernicious anaemia and in megaloblastic anaemia associated with gastric surgery, intestinal structural abnormality or steatorrhoea, man (Evans) 126
- Appetite and energy expenditure and obesity, man (Passmore) 83
- Architecture, cell, and sterols (Cook) 41
- Ascorbic acid *see under* Vitamin C
- Atherosclerosis, and alimentary lipaemia and fibrin deposition, man (Fullerton) 66
- Atherosclerosis, cholesterol, and heparin, rabbit (Rannie) 61
- Atherosclerosis, and distribution of cholesterol in plasma-lipoprotein fractions, man, rabbit, rat (Boyd & Oliver) 52
- Atherosclerosis, experimental, in rabbit, produced by cholesterol feeding, and human atherosclerosis compared (Rannie) 61
- Atherosclerosis, and fat intake, sex, occupation, man (Fullerton) 66
- Atherosclerosis, incidence of, and animal- and vegetable-fat consumption, man (Fullerton) 66
- Athletic activities *see also under* Running and Walking
- Athletic activities, various, oxygen uptake and energy expenditure in, man (Noltie) 93
- Aureomycin *see also under* Antibiotic(s)
- Aureomycin dietary supplement, and liver and gut weight, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Aureomycin, oxytetracycline or copper-sulphate dietary supplement, and growth, food utilization, carcass quality, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Bacteria *see also under* Microflora
- Bacteria, intestinal, and diet and anaemia, man (Platt & Wadsworth) 103
- Balance *see under* Metabolism

- Biological value *see under* Nutritive value
- Biosynthesis, cholesterol, in animal tissues and organs, studies with labelled compounds, suggested mechanism (Boyd & Oliver) 52
- Biosynthesis, cholesterol, in liver, and cholesterol feeding, fasting, available tissue carbohydrate, rat (Boyd & Oliver) 52
- Biotin deficiency and hair growth, mouse (Montagna) xii
- Blood *see also under* Haematopoiesis, Plasma and Serum
- Blood, clotting time at different periods after high-fat and ordinary meal compared, man (Fullerton) 66
- Blood urea, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Body-weight *see also under* Growth
- Body-weight and energy expenditure, man (Passmore) 83
- Bread *see under* Flour and Food(s)
- Burma, nutrition work of FAO, WHO and UNICEF (Postmus) 35
- Burma, nutritional condition and incidence of deficiency signs, schoolchild (Postmus) 35
- Burma, wrong food habits and dietary deficiencies and nutritional diseases, different districts compared (Postmus) 35
- Calciferol *see under* Vitamin D
- Calcium in modern infant diets, and hypercalcaemia (Sinclair) xviii
- Calorie(s) *see also under* Energy
- Calorie(s) derived from protein, vegan (Wokes) 134
- Calorie(s), sources, vegetarian and vegan diets compared (Wokes) 134
- Cancer, lung, nervous complications in, and essential fatty acids in modern diets (Sinclair) xviii
- Cancer and protein metabolism and anaemia, man (Platt & Wadsworth) 103
- Carbohydrate, tissue, available, and liver cholesterol biosynthesis, rat (Boyd & Oliver) 52
- Carcass grading and hexoestrol implantation, lamb (Gill) iii
- Carcass quality and dietary supplement of aureomycin, oxytetracycline or copper sulphate, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Casein in diet in experimental nutritional hepatic fibrosis, lack of effect of change in type, rabbit (Macdonald & Thomas) xiv
- Cell architecture, and sterols (Cook) 41
- Cereal(s) *see under* Food(s)
- Citral poisoning, effective dose, suggested mechanism, protective action of vitamin A, monkey, rabbit (Leach & Lloyd) xv
- Child *see also under* Human and Man
- Child, growth on vegetarian diet (Wokes) 134
- Child nutrition and FAO (Aykroyd) 4
- Child nutrition, and FAO home-economics programme in Egyptian villages (Ross) 30
- Child nutrition, feeding programmes, dried-milk distribution, and prevention of nutritional disease, work of UNICEF (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Child nutrition and UNICEF (Dorolle) 1, (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Child, prevention of kwashiorkor, and development of vegetable protein-rich foods and use of locally available foods, work of WHO (Burgess) 13
- Child, school-, nutritional condition and incidence of deficiency signs, Burma (Postmus) 35
- Chlorotetracycline *see under* Aureomycin and Antibiotic(s)
- Cholesterol *see also under* Fat(s), Lipid(s) and Sterol(s)
- Cholesterol biosynthesis, liver, and cholesterol feeding, fasting, available tissue carbohydrate, rat (Boyd & Oliver) 52
- Cholesterol, determination of (Lovern) 46
- Cholesterol, dietary, disposal of, guinea-pig, rabbit and rat compared (Rannie) 61
- Cholesterol, dietary, metabolism, various mammals (Boyd & Oliver) 52
- Cholesterol distribution in plasma-lipoprotein fractions, and atherosclerosis, man, rabbit, rat (Boyd & Oliver) 52
- Cholesterol, exogenous and endogenous, inter-relationships (Boyd & Oliver) 52
- Cholesterol feeding, effects, guinea-pig, rabbit and rat compared (Rannie) 61
- Cholesterol feeding, experimental atherosclerosis produced by, rabbit (Rannie) 61
- Cholesterol, metabolic function, function in nervous tissue (Cook) 41
- Cholesterol synthesis in animal organs and tissues, studies with labelled compounds; suggested mechanism of biosynthesis (Boyd & Oliver) 52
- Climate and energy expenditure, man (Passmore) 83
- Clotting time, blood, at different periods after high-fat and ordinary meal compared, man (Fullerton) 66
- Copper in liver, kidneys, spleen, muscle and fat, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Copper-sulphate, aureomycin or oxytetracycline dietary supplement, and growth, food utilization, carcass quality, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Coronary thrombosis and essential fatty acids in modern diets (Sinclair) xviii
- Cortex, adrenal, intracellular distribution of vitamin C (Bourne) xii
- Cottonseed meals *see under* Protein concentrates
- Cow *see also under* Ruminant
- Cow, grazing, faecal-output estimation with polyethylene glycol (Corbett, Miller, Clarke & Florence) v

- Cow, lactating, effect on magnesium metabolism of addition of young spring herbage to winter feed (Balch, Head, Line, Rook & Rowland) x
- Cow, milk yield on diet with groundnut meal or herring meal (Chalmers & Marshall) vi
- Crop(s), insecticides used on, possible toxicity, man (Barnes) 148
- Cyanocobalamin *see under* Vitamin B₁₂
- Deficiency *see also under* Biotin, Dietary, Folic acid, Iron, Protein, Riboflavin, Vitamin A and Vitamin B₁₂
- Deficiency signs, incidence of, and nutritional condition, schoolchild, Burma (Postmus) 35
- Diet *see also under* Feeding and Food(s)
- Diet and anaemia, man (Davidson) 101, (Evans) 126, (Gatenby) 115, (Platt & Wadsworth) 103, (Wokes) 134, (Woodruff) 110
- Diet and anaemia, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Diet, content of protein, sucrose, fat, antibiotic, trace minerals, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Diet in experimental nutritional hepatic fibrosis, lack of effect of change in type of casein or substitution of lactose for sucrose, rabbit (Macdonald & Thomas) xiv
- Diet and intestinal bacteria and anaemia, man (Platt & Wadsworth) 103
- Diet(s), modern, and hypercalcaemia, nervous complications in lung cancer, coronary thrombosis (Sinclair) xviii
- Diet, vegan, vitamin values (Wokes) 134
- Diet(s), vegetarian and vegan, compared, sources of calories and protein (Wokes) 134
- Dietary deficiencies, wrong food habits, and nutritional diseases, different districts compared, Burma (Postmus) 35
- Dietary factors causing anaemia, man (Platt & Wadsworth) 103
- Dietary factors and hair growth, mouse (Montagna) xii
- Disease(s), nutritional, and wrong food habits and dietary deficiencies, different districts compared, Burma (Postmus) 35
- Dog, protein deficiency and haematopoiesis and anaemia (Platt & Wadsworth) 103
- Dublin, 1953-5, incidence of anaemia; iron-deficiency anaemia and diet, season, parity, iron therapy; megaloblastic anaemia and diet, pregnant woman (Gatenby) 115
- Egg(s), herring, unusual form of vitamin A activity in (Fisher, Harrison, Kon, Plack, Thompson & Todd) xi
- Egg(s), quail's, nutrients in (Simpson & Soh Chin Chai) xi
- Egypt, FAO home-economics programme, aims and methods, care of children (Ross) 30
- Egypt, food habits of villagers (Ross) 30
- Energy *see also under* Calorie(s)
- Energy expenditure and age, man (Durnin) 89, (Passmore) 83
- Energy expenditure and appetite and obesity, man (Passmore) 83
- Energy expenditure and body-weight, climate, occupation, man (Passmore) 83
- Energy expenditure, development of experimental methods of determination, man (Douglas) 72
- Energy expenditure in different exercises, young and old man compared (Durnin) 89
- Energy expenditure, man (Douglas) 72, (Durnin) 89, (Edholm) 80, (Noltie) 93, (Passmore) 83, (Wolff) 77
- Energy expenditure, modern techniques for determination, man (Wolff) 77
- Energy expenditure and nutrition, man (Edholm) 80
- Energy expenditure and oxygen uptake in various athletic activities, man (Noltie) 93
- Energy expenditure and oxygen uptake and speed in walking and running, man (Noltie) 93
- Energy utilization and frequency of feeding, sheep (Blaxter, Graham & Wainman) ii
- Epilepsy, anaemia associated with, and pteroyl-glutamic-acid therapy (Spray) 119
- Epilepsy, megaloblastic anaemia associated with, labelled-vitamin B₁₂ absorption, man (Evans) 126
- Excretion, faecal, of labelled vitamin B₁₂ in pernicious anaemia, man (Evans) 126
- Excretion, nitrogen, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Excretion, urinary and faecal magnesium, effect of addition of young spring herbage to winter feed, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Faecal excretion, labelled vitamin B₁₂, in pernicious anaemia, man (Evans) 126
- Faecal magnesium excretion, effect of addition of young spring herbage to winter feed, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Faecal-output estimation with polyethylene glycol, grazing cow (Corbett, Miller, Clarke & Florence) v
- FAO, aims and methods in nutrition work; education of nutrition workers; child nutrition and school-feeding programmes; work on enrichment of rice and maize (Aykroyd) 4
- FAO, home-economics programme in Egyptian villages, aims and methods, care of children (Ross) 30
- FAO and human nutrition (Aykroyd) 4, (Burgess) 13, (Dorolle) 1, (Postmus) 35
- FAO, nutrition work in Burma (Postmus) 35
- Fasting, and liver cholesterol biosynthesis, rat (Boyd & Oliver) 52
- Fasting sheep, heat increment of mixture of steam-volatile fatty acids or glucose (Armstrong & Blaxter) i
- Fat(s), *see also under* Cholesterol, Lipid(s) and Sterol(s)
- Fat(s), animal and vegetable, consumption, and incidence of atherosclerosis, man (Fullerton) 66

- Fat content of milk from right and left breasts compared, woman (Hyttén) vi
- Fat, copper content, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Fat, dietary content, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Fat(s), effect of food processing on nutritive value, man (Barnell & Hollingsworth) 142
- Fat, high-, meal and ordinary meal compared, blood clotting time at different periods after, man (Fullerton) 66
- Fat, total dietary supplies; proportion from vegetable sources, proportion hydrogenated, Great Britain, various periods between 1909 and 1952 (Hollingsworth, Vaughan & Warnock) xvii
- Fatty acids, essential, fallacy of chemical estimation in foods (Sinclair) xviii
- Fatty acids, essential, in modern diets, and calcaemia, nervous complications in lung cancer, coronary thrombosis (Sinclair) xviii
- Fatty acids, essential, total dietary supplies; amounts supplied by dairy foods, eggs, meat, cereals, fish and margarine, Great Britain, 1909-13, 1950's (Hollingsworth, Vaughan & Warnock) xvii
- Fatty acids, steam-volatile, glucose, heat increment, fasting sheep (Armstrong & Blaxter) i
- Feeding, frequency of, and energy utilization, sheep (Blaxter, Graham & Wainman) ii
- Fibrin deposition and alimentary lipaemia, and atherosclerosis, man (Fullerton) 66
- Fibrosis, experimental nutritional hepatic, appearance of liver, lack of effect of change in type of casein or substitution of lactose for sucrose in diet, rabbit (Macdonald & Thomas) xiv
- Fish by-products *see under* Protein concentrates
- Fish meals, home-produced and imported supplies, United Kingdom, 1953-5 (Duckworth) 160
- Flora *see under* Bacteria and Microflora
- Flour *see also under* Food(s)
- Flour, azenized, toxic effects for various animals and man compared (Barnes) 148
- Folic acid *see also under* Pteroylglutamic acid
- Folic-acid deficiency and vitamin B₁₂ and Addisonian pernicious anaemia, man (Spray) 119
- Folic-acid metabolism and vitamin B₁₂, man (Spray) 119
- Folic acid, suggested interrelationships with vitamin B₁₂, and macrocytic anaemia, man (Spray) 119
- Food additives and contaminants, and anaemia, man (Platt & Wadsworth) 103
- Food-conversion efficiency and growth, effect of dietary content of protein, sucrose, fat, antibiotic, trace minerals, weanling pig (Smith & Lucas) iv
- Food(s), essential fatty acids in, fallacy of chemical estimation (Sinclair) xviii
- Food habits in Egyptian villages (Ross) 30
- Food habits, wrong, and dietary deficiencies and nutritional diseases, different districts compared, Burma (Postmus) 35
- Food processing, effect on nutritive value, man (Barnell & Hollingsworth) 142
- Food protein, possible technological production from leaves, algae, marine microflora (Pirie) 154
- Food restriction and hair growth, mouse (Montagna) xii
- Food technology and nutrition (Barnell & Hollingsworth) 142, (Barnes) 148, (Duckworth) 160, (Pirie) 154
- Food technology and plastics (Worrall) xvi
- Food technology, tests for toxicity of chemicals used (Barnes) 148
- Food utilization, and dietary supplement of aureomycin, oxytetracycline or copper sulphate, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Food(s), vegetable, daily intakes and protein values, vegan (Wokes) 134
- Gastric surgery associated with megaloblastic anaemia, labelled-vitamin B₁₂ absorption, effect of intrinsic factor, antibiotics, man (Evans) 126
- Goat, lactating, nitrogen utilization, and dietary supplement of groundnut meal or herring meal (Chalmers & Marshall) vi
- Goitre, prevention with iodized salt; work and recommendations of WHO, man (Burgess) 13
- Glucose, effect on protein metabolism studied with labelled methionine or glycine, rat (Black, Munro & Thomson) vii
- Glucose, steam-volatile fatty acids, heat increment, fasting sheep (Armstrong & Blaxter) i
- Glycine, labelled, in study of effect of glucose on protein metabolism, rat (Black, Munro & Thomson) vii
- Grain, insecticides used on, possible toxicity, man (Barnes) 148
- Grass *see under* Herbage
- Great Britain *see also under* United Kingdom
- Great Britain, incidence of nutritional anaemia, 1920 and 1956 compared (Davidson) 101
- Great Britain, trends in dietary supplies of fat, essential fatty acids, pyridoxin, 1909-52 (Hollingsworth, Vaughan & Warnock) xvii
- Groundnut meal *see also under* Protein concentrates
- Groundnut meal and herring meal compared for milk production, cow (Chalmers & Marshall) vi
- Groundnut-meal or herring-meal dietary supplement, and nitrogen utilization, lactating goat (Chalmers & Marshall) vi
- Groundnut-meal or herring-meal dietary supplement, and rumen ammonia concentration, sheep (Chalmers & Marshall) vi
- Growth *see also under* Body-weight

- Growth, and dietary supplement of aureomycin, oxytetracycline or copper sulphate, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Growth and food-conversion efficiency, effect of dietary content of protein, sucrose, fat, antibiotic, trace minerals, weanling pig (Smith & Lucas) iv
- Growth and hexoestrol implantation, lamb (Gill) iii
- Growth and sterols (Cook) 41
- Growth, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Growth and vegetarian diet, child (Wokes) 134
- Guinea-pig, rabbit and rat compared, effects of cholesterol feeding, and disposal of dietary cholesterol (Rannie) 61
- Gut weight and aureomycin dietary supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Haematopoiesis and protein deficiency and anaemia, dog, man, rat (Platt & Wadsworth) 103
- Haematopoietic factors, suggested interrelationships in macrocytic anaemia, man (Spray) 119
- Haemoglobin *see under* Haematopoiesis
- Hair growth, and food restriction, vitamin A, biotin or riboflavin deficiency, skin application of vitamin A, mouse (Montagna) xii
- Heat increment of mixture of steam-volatile fatty acids or glucose, fasting sheep (Armstrong & Blaxter) i
- Heat treatment *see under* Processing
- Heparin and cholesterol atherosclerosis, rabbit (Rannie) 61
- Herbage, young spring, effect on magnesium metabolism, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Herring eggs, unusual form of vitamin A activity in (Fisher, Harrison, Kon, Plack, Thompson & Todd) xi
- Herring meal and groundnut meal compared for milk production, cow (Chalmers & Marshall) vi
- Herring-meal or groundnut-meal dietary supplement, and nitrogen utilization, lactating goat (Chalmers & Marshall) vi
- Herring-meal or groundnut-meal dietary supplement, and rumen ammonia concentration, sheep (Chalmers & Marshall) vi
- Herring meals, home-produced and imported supplies, United Kingdom, 1953-5 (Duckworth) 160
- Hexoestrol implantation, and growth, carcass grading, lamb (Gill) iii
- Hormone *see under* Hexoestrol
- Human nutrition and FAO (Aykroyd) 4, (Burgess) 13, (Dorolle) 1, (Postmus) 35
- Human nutrition and WHO (Burgess) 13, (Dorolle) 1, (Postmus) 35, (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Human nutrition, work of international co-operative agencies, aims, methods, finance (Dorolle) 1
- Hypercalcaemia, and vitamin D and calcium in modern infant diets (Sinclair) xviii
- Hypomagnesaemia, and young spring herbage, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Infection, parasitic, and iron deficiency and anaemia in the tropics, man (Woodruff) 110
- Infection and protein metabolism and anaemia, man (Platt & Wadsworth) 103
- Injury and protein metabolism and anaemia, man (Platt & Wadsworth) 103
- Insecticide(s) used on grain and crops, possible toxicity, man (Barnes) 148
- Intestinal abnormality, structural, associated with megaloblastic anaemia, labelled-vitamin B₁₂ absorption, effect of intrinsic factor, antibiotics, man (Evans) 126
- Intestinal bacteria and diet and anaemia, man (Platt & Wadsworth) 103
- Intestinal parasites and anaemia, man (Platt & Wadsworth) 103
- Intrinsic factor, effect on absorption of labelled vitamin B₁₂ in pernicious anaemia and in megaloblastic anaemia associated with gastric surgery, intestinal structural abnormality or steatorrhoea, man (Evans) 126
- Iodate(s) and iodides in salt compared, toxicity, availability to thyroid gland, work of WHO, man (Burgess) 13
- Iodide(s) and iodates in salt compared, toxicity, availability to thyroid gland, work of WHO, man (Burgess) 13
- Iodized salt and prevention of goitre, work and recommendations of WHO, man (Burgess) 13
- Iron-deficiency anaemia and diet, season, parity, iron therapy, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Katabolism, nitrogen, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Kidney(s), copper content, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Kwashiorkor prevention, and development of vegetable protein-rich foods and use of locally available foods, work of WHO (Burgess) 13
- Lactation, differences in yield and composition of milk from right and left breasts, woman (Hytten) vi
- Lactose *see also under* Sugar(s)
- Lactose content of milk from right and left breasts compared, woman (Hytten) vi
- Lamb *see also under* Ruminant(s)
- Lamb, hexoestrol implantation and growth, carcass grading (Gill) iii
- Leaves, various edible, suggested process for extracting proteins for use as food (Pirie) 154
- Lipaemia, alimentary, and fibrin deposition, and atherosclerosis, man (Fullerton) 66

- Lipid(s) *see also under* Cholesterol, Fat and Sterol(s)
- Lipid(s), extraction, separation, purification (Lovern) 46
- Lipid(s), metabolic rates and routes, studies with labelled compounds (Lovern) 46
- Lipoprotein fractions, plasma, distribution of cholesterol in, and atherosclerosis, man, rabbit, rat (Boyd & Oliver) 52
- Liver, appearance in experimental nutritional hepatic fibrosis, lack of effect of change in type of casein or substitution of lactose for sucrose in diet, rabbit (Macdonald & Thomas) xiv
- Liver cholesterol biosynthesis, and cholesterol feeding, fasting, available tissue carbohydrate, rat (Boyd & Oliver) 52
- Liver, copper content, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Liver weight and aureomycin dietary supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Lung cancer, nervous complications in, and essential fatty acids in modern diets (Sinclair) xviii
- Magnesium metabolism, effect of addition of young spring herbage to winter feed, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Maize enrichment, work of FAO (Aykroyd) 4
- Malnutrition *see also under* Anaemia, Dietary deficiency, Kwashiorkor, Nutrition and Protein deficiency
- Malnutrition and anaemia in the tropics, man (Woodruff) 110
- Man *see also under* Child, Human, Vegan and Woman
- Man, Addisonian pernicious anaemia and folic-acid deficiency and vitamin B₁₂ (Spray) 119
- Man, alimentary lipaemia and fibrin deposition and atherosclerosis (Fullerton) 66
- Man, anaemia and dietary factors, infection, injury, cancer, intestinal bacteria and parasites (Platt & Wadsworth) 103
- Man, anaemia and iron deficiency, protein deficiency, parasitic infection, in the tropics (Woodruff) 110
- Man, anaemia and protein deficiency and serum-protein values (Woodruff) 110
- Man, animal- and vegetable-fat consumption, and incidence of atherosclerosis (Fullerton) 66
- Man, appetite and energy expenditure and obesity (Passmore) 83
- Man, atherosclerosis, compared with experimental atherosclerosis in rabbit produced by cholesterol feeding (Rannie) 61
- Man, vitamin B₁₂ absorption measured with labelled vitamin B₁₂ (Evans) 126
- Man, blood clotting time at different periods after high-fat and ordinary meal compared (Fullerton) 66
- Man, determination of energy expenditure, development of experimental methods (Douglas) 72
- Man, diet and anaemia (Davidson) 101, (Evans) 126, (Gatenby) 115, (Platt & Wadsworth) 103, (Wokes) 134, (Woodruff) 110
- Man, distribution of cholesterol in plasma-lipoprotein fractions, and atherosclerosis (Boyd & Oliver) 52
- Man, Egyptian villager, food habits (Ross) 30
- Man, energy expenditure (Douglas) 72, (Durnin) 89, (Edholm) 80, (Noltie) 93, (Passmore) 83, (Wolff) 77
- Man, energy expenditure and age (Durnin) 89, (Passmore) 83
- Man, energy expenditure and body-weight, climate, occupation (Passmore) 83
- Man, energy expenditure and nutrition (Edholm) 80
- Man, folic-acid metabolism and vitamin B₁₂ (Spray) 119
- Man, food for, tests for toxicity of chemicals used in food technology (Barnes) 148
- Man, incidence of nutritional anaemia in Great Britain, 1920 and 1956 compared (Davidson) 101
- Man, labelled-vitamin B₁₂ absorption in pernicious anaemia and in megaloblastic anaemia associated with gastric surgery, intestinal structural abnormality or steatorrhoea, effect of intrinsic factor, antibiotics (Evans) 126
- Man, megaloblastic anaemias in the tropics, and therapy with Marmite, liver extracts, folic acid, vitamin B₁₂, man (Woodruff) 110
- Man, modern techniques for determination of energy expenditure (Wolff) 77
- Man, nutrition and food technology (Barnell & Hollingsworth) 142, (Barnes) 148, (Pirie) 154
- Man, nutritive value of foods, effects of processing (Barnell & Hollingsworth) 142
- Man, oxygen uptake and energy expenditure in various athletic activities (Noltie) 93
- Man, oxygen uptake and energy expenditure and speed in walking and running (Noltie) 93
- Man, prevention of goitre with iodized salt, work and recommendations of WHO (Burgess) 13
- Man, protein deficiency and haematopoiesis and anaemia (Platt & Wadsworth) 103
- Man, sex, occupation and atherosclerosis (Fullerton) 66
- Man, suggested interrelationships of haematopoietic factors in macrocytic anaemia (Spray) 119
- Man, therapeutic effects of pteroylglutamic acid in anaemia (Spray) 119
- Man, wrong food habits and dietary deficiencies and nutritional diseases, different districts compared, Burma (Postmus) 35
- Man, young and old compared, energy expenditure in different exercises (Durnin) 89
- Marine microflora, possible technological production of food protein from (Pirie) 154

- Meat meals *see also under* Protein concentrates
- Meat meals, home-produced and imported supplies, United Kingdom, 1953-5 (Duckworth) 160
- Megaloblastic anaemia and diet, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Megaloblastic anaemias in the tropics, and therapy with Marmite, liver extracts, folic acid, vitamin B₁₂, man (Woodruff) 110
- Metabolic function of cholesterol (Cook) 41
- Metabolic rates and routes of lipids, studies with labelled compounds (Lovern) 46
- Metabolism, dietary cholesterol, various mammals (Boyd & Oliver) 52
- Metabolism, folic-acid, and vitamin B₁₂, man (Spray) 119
- Metabolism, magnesium, effect of addition of young spring herbage to winter feed, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Metabolism, protein, and cancer, injury, infection and anaemia, man (Platt & Wadsworth) 103
- Metabolism, protein, effect of glucose studied with labelled methionine or glycine, rat (Black, Munro & Thomson) vii
- Methionine, labelled, in the study of effect of glucose on protein metabolism, rat (Black, Munro & Thomson) vii
- Methionine sulfoximine *see under* Agene
- Microflora, marine, possible technological production of food protein from (Pirie) 154
- Micro-organism(s) *see under* Bacteria and Microflora
- Milk, dried, distribution to children, work of UNICEF (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Milk, dried skim, use by FAO in child-nutrition work (Aykroyd) 4
- Milk from right and left breasts, differences in yield and composition, woman (Hyttén) vi
- Milk yield on diet with groundnut meal or herring meal, cow (Chalmers & Marshall) vi
- Mineral(s), trace, dietary content, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Monkey, citral poisoning, effective dose, suggested mechanism, protective action of vitamin A (Leach & Lloyd) xv
- Mouse, hair growth, and food restriction, vitamin A, biotin or riboflavin deficiency, skin application of vitamin A (Montagna) xii
- Muscle, copper content, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Nervous tissue, function of cholesterol in (Cook) 41
- Nitrogen content of milk from right and left breasts compared, woman (Hyttén) vi
- Nitrogen katabolism and excretion, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Nitrogen utilization, and dietary supplement of groundnut meal or herring meal, lactating goat (Chalmers & Marshall) vi
- Nut(s) *see under* Food(s)
- Nutrient(s) in quail's eggs (Simpson & Soh Chin Chai) xi
- Nutrition, child, and FAO home-economics programme in Egyptian villages (Ross) 30
- Nutrition, child, and FAO (Aykroyd) 4
- Nutrition, child, and UNICEF (Dorolle) 1, (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Nutrition and energy expenditure, man (Edholm) 80
- Nutrition and food technology (Barnell & Hollingsworth) 142, (Barnes) 148, (Duckworth) 160, (Pirie) 154
- Nutrition, human, and FAO (Aykroyd) 4, (Burgess) 13, (Dorolle) 1, (Postmus) 35
- Nutrition, human, and WHO (Burgess) 13, (Dorolle) 1, (Postmus) 35, (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- Nutrition, human, work of international co-operative agencies, aims, methods, finance (Dorolle) 1
- Nutrition workers, education, and FAO (Aykroyd) 4
- Nutritional anaemias, incidence in Great Britain, 1920 and 1956 compared, man (Davidson) 101
- Nutritional condition and incidence of deficiency signs, schoolchild, Burma (Postmus) 35
- Nutritional diseases and wrong food habits and dietary deficiencies, different districts compared, Burma (Postmus) 35
- Nutritive value of foods, effects of processing, man (Barnell & Hollingsworth) 142
- Nutritive value of protein concentrates, and processing (Duckworth) 160
- Obesity and appetite and energy expenditure, man (Passmore) 83
- Oil(s) *see under* Fat(s)
- Oilseed meals, home-produced and imported supplies, United Kingdom, 1953-5 (Duckworth) 160
- Orange *see under* Citral
- Organ(s), various animal, cholesterol biosynthesis, studies with labelled compounds, suggested mechanism (Boyd & Oliver) 52
- Oxygen uptake and energy expenditure in various athletic activities, man (Noltie) 93
- Oxygen uptake and energy expenditure and speed in walking and running, man (Noltie) 93
- Oxytetracycline *see also under* Antibiotic(s)
- Oxytetracycline, aureomycin or copper-sulphate dietary supplement, and growth, food utilization, carcass quality, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Parasites, intestinal, and anaemia, man (Platt & Wadsworth) 103

- Parasitic infection and iron deficiency and anaemia in the tropics, man (Woodruff) 110
- Parity, and iron-deficiency anaemia, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Pasture *see under* Herbage
- Pernicious anaemia *see under* Anaemia
- Pig, aureomycin dietary supplement, and liver and gut weight (Barber, Braude, Mitchell, Rook & Rowell) ix
- Pig, effect of dietary copper-sulphate supplement on copper in liver, kidneys, spleen, muscle and fat (Barber, Braude, Mitchell, Rook & Rowell) ix
- Pig, growth, food utilization, carcass quality, and dietary supplement of aureomycin, oxytetracycline or copper sulphate (Barber, Braude, Mitchell, Rook & Rowell) ix
- Pig(s), suckling-, given sow's milk or water compared, growth, nitrogen katabolism, blood urea, nitrogen excretion (Widdowson & McCance) xv
- Pig, weanling, growth and food-conversion efficiency, effect of dietary content of protein, sucrose, fat, antibiotic, trace minerals (Smith & Lucas) iv
- Plasma-lipoprotein fractions, distribution of cholesterol in, and atherosclerosis, man, rabbit, rat (Boyd & Oliver) 52
- Plastic(s) and food technology (Worall) xvi
- Poisoning *see also under* Toxicity
- Poisoning, citral, effective dose, suggested mechanism, protective action of vitamin A, monkey, rabbit (Leach & Lloyd) xv
- Polyethylene glycol, use in estimating faecal output, grazing cow (Corbett, Miller, Clarke & Florence) v
- Potato(es) *see also under* Food(s)
- Potato(es), possible toxicity of sprout depressants, man (Barnes) 148
- Pregnancy, anaemia of, and pteroylglutamic-acid therapy, woman (Spray) 119
- Pregnancy, megaloblastic anaemia of, labelled-vitamin B₁₂ absorption, woman (Evans) 126
- Pregnant woman, incidence of anaemia; iron-deficiency anaemia and diet, season, parity, iron therapy; megaloblastic anaemia and diet, Dublin, 1953-5 (Gatenby) 115
- Processing of foods, effect on nutritive value, man (Barnell & Hollingsworth) 142
- Processing, and nutritive value of protein concentrates (Duckworth) 160
- Protein concentrates, nutritional characteristics for ruminants and non-ruminants (Duckworth) 160
- Protein concentrates, nutritive value, and processing (Duckworth) 160
- Protein deficiency and anaemia and serum-protein values, man (Woodruff) 110
- Protein deficiency and anaemia in the tropics, man (Woodruff) 110
- Protein deficiency and haematopoiesis and anaemia, dog, man, rat (Platt & Wadsworth) 103
- Protein, dietary content, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Protein, effect of food processing on nutritive value, man (Barnell & Hollingsworth) 142
- Protein intake, calories derived from, vegan (Wokes) 134
- Protein from leaves as food, suggested process for extraction (Pirie) 154
- Protein metabolism and cancer, injury, infection and anaemia, man (Platt & Wadsworth) 103
- Protein metabolism, effect of glucose studied with labelled methionine or glycine, rat (Black, Munro & Thomson) vii
- Protein-rich foods, vegetable, and prevention of kwashiorkor, work of WHO (Burgess) 13
- Protein sources, vegetarian and vegan diets compared (Wokes) 134
- Protein values of vegetable foods (Wokes) 134
- Pteroylglutamic acid *see also under* Folic acid
- Pteroylglutamic acid, nomenclature, chemistry, isolation, therapeutic effects in anaemia (Spray) 119
- Pulse(s) *see under* Food(s)
- Puerperium, megaloblastic anaemia of, labelled-vitamin B₁₂ absorption, woman (Evans) 126
- Pyridoxin dietary supplies, Great Britain, 1909-13, 1950's (Hollingsworth, Vaughan & Warnock) xvii
- Quail(s) eggs, nutrients in (Simpson & Soh Chin Chai) xi
- Rabbit, citral poisoning, effective dose, suggested mechanism, protective action of vitamin A (Leach & Lloyd) xv
- Rabbit, distribution of cholesterol in plasma-lipoprotein fractions, and atherosclerosis (Boyd & Oliver) 52
- Rabbit, experimental atherosclerosis, mechanism of production of arterial lesions, disposal of dietary cholesterol (Rannie) 61
- Rabbit, experimental atherosclerosis produced by cholesterol feeding (Rannie) 61
- Rabbit, experimental nutritional hepatic fibrosis, appearance of liver, lack of effect of change in type of casein or substitution of lactose for sucrose in diet (Macdonald & Thomas) xiv
- Rabbit, heparin and cholesterol atherosclerosis (Rannie) 61
- Rabbit, rat and guinea-pig compared, effects of cholesterol feeding, and disposal of dietary cholesterol (Rannie) 61
- Radiation *see under* Processing
- Radioactive cobalt, use in measuring vitamin B₁₂ absorption, man (Evans) 126
- Radioactive compounds in studies of metabolic rates and routes of lipids (Lovern) 46
- Rat, distribution of cholesterol in plasma-lipoprotein fractions, and atherosclerosis (Boyd & Oliver) 52

- Rat, effect of glucose on protein metabolism studied with labelled methionine or glycine (Black, Munro & Thomson) vii
- Rat, guinea-pig and rabbit compared, effects of cholesterol feeding, and disposal of dietary cholesterol (Rannie) 61
- Rat, liver cholesterol biosynthesis, and cholesterol feeding, fasting, available tissue carbohydrate (Boyd & Oliver) 52
- Rat, protein deficiency and haematopoiesis and anaemia (Platt & Wadsworth) 103
- Rat, toxic effects of surface-active agents added to bread (Barnes) 148
- Riboflavin deficiency and hair growth, mouse (Montagna) xii
- Rice enrichment, work of FAO (Aykroyd) 4
- Roe(s) *see under* Herring egg(s)
- Rowing *see under* Athletic activities
- Rumen ammonia concentration, and dietary supplement of groundnut meal or herring meal, sheep (Chalmers & Marshall) vi
- Ruminant(s) *see also under* Cow, Goat and Sheep
- Ruminant(s), nutritive value of protein concentrates (Duckworth) 160
- Running, oxygen uptake and energy expenditure and speed, man (Noltie) 93
- Salt, iodized, and prevention of goitre, work and recommendations of WHO, man (Burgess) 13
- School-feeding programmes and FAO (Aykroyd) 4
- Season, and iron-deficiency anaemia, pregnant woman, Dublin, 1953-5 (Gatenby) 115
- Seaweed(s) *see under* Algae
- Serum-protein values and protein deficiency and anaemia, man (Woodruff) 110
- Serum vitamin B₁₂ level and length of period of veganism, man (Wokes) 134
- Sex and atherosclerosis, man (Fullerton) 66
- Sheep *see also under* Lamb and Ruminant(s)
- Sheep, energy utilization and frequency of feeding (Blaxter, Graham & Wainman) ii
- Sheep, fasting, heat increment of mixture of steam-volatile fatty acids or glucose (Armstrong & Blaxter) i
- Sheep, rumen ammonia concentration and dietary supplement of groundnut meal or herring meal (Chalmers & Marshall) vi
- Ski-ing *see under* Athletic activities
- Skin lubrication and sterols (Cook) 41
- Soya-bean meal *see under* Protein concentrates
- Spleen, copper content, effect of dietary copper-sulphate supplement, pig (Barber, Braude, Mitchell, Rook & Rowell) ix
- Sprue *see also under* Steatorrhoea
- Sprue and pteroylglutamic-acid therapy, man (Spray) 119
- Sprout depressants, potato, possible toxicity, man (Barnes) 148
- Starch, effect of food processing on nutritive value, man (Barnell & Hollingsworth) 142
- Steatorrhoea *see also under* Sprue
- Steatorrhoea, idiopathic, associated with megaloblastic anaemia, labelled-vitamin B₁₂ absorption, effect of intrinsic factor, antibiotics, man (Evans) 126
- Sterol(s) and growth, skin lubrication, cell architecture (Cook) 41
- Sterol(s), occurrence, method of combination, functions, absorption by animals (Cook) 41
- Stomach *see under* Gastric
- Sucrose *see also under* Sugar(s)
- Sucrose, dietary content, and growth and food-conversion efficiency, weanling pig (Smith & Lucas) iv
- Sugar(s) *see also under* Lactose and Sucrose
- Sugar(s) in diet in experimental nutritional hepatic fibrosis, lack of effect of substitution of lactose for sucrose, rabbit (Macdonald & Thomas) xiv
- Sugar(s), effect of food processing on nutritive value, man (Barnell & Hollingsworth) 142
- Sunflower-seed meal *see under* Protein concentrates
- Surface-active agents added to bread, toxic effects, rabbit, rat (Barnes) 148
- Swimming *see under* Athletic activities
- Technique(s), modern, for energy determination, man (Wolff) 77
- Technology, food, and nutrition (Barnell & Hollingsworth) 142, (Barnes) 148, (Duckworth) 160, (Pirie) 154
- Terramycin *see under* Oxytetracycline
- Thrombosis, coronary, and essential fatty acids in modern diets (Sinclair) xviii
- Tissue, nervous, function of cholesterol in (Cook) 41
- Tissue(s), various animal, cholesterol biosynthesis, studies with labelled compounds, suggested mechanism (Boyd & Oliver) 52
- Toxicity *see also under* Poisoning
- Toxicity of chemicals used in food technology, simple tests for (Barnes) 148
- Toxicity of iodates and iodides in salt compared, work of WHO, man (Burgess) 13
- Trauma *see under* Injury
- Tropics, anaemia and iron deficiency, protein deficiency, parasitic infection, man (Woodruff) 110
- Tropics, megaloblastic anaemia and therapy with Marmite, liver extracts, folic acid, vitamin B₁₂ man (Woodruff) 110
- UNICEF, nutrition work in Burma (Postmus) 35
- UNICEF, work in underdeveloped countries, prevention of child nutritional disease, distribution of dried milk, founding of school-feeding programmes and maternal- and child-welfare centres (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- United Kingdom *see also under* Great Britain
- United Kingdom, home-produced and imported supplies of protein-rich animal and vegetable by-products, 1953-5 (Duckworth) 160

- Urea, blood, sucking-pigs given sow's milk or water compared (Widdowson & McCance) xv
- Urinary magnesium excretion, effect of addition of young spring herbage to winter feed, lactating cow (Balch, Head, Line, Rook & Rowland) x
- Vegan, daily intakes and protein values of different foods (Wokes) 134
- Vegan, extradietary sources of vitamin B₁₂ (Wokes) 134
- Vegan, intake of protein, calories derived from protein (Wokes) 134
- Vegan, length of period of veganism and vitamin B₁₂ serum level and clinical signs of vitamin B₁₂ deficiency (Wokes) 134
- Vegan and vegetarian diets compared, sources of calories and protein (Wokes) 134
- Vegan diet, vitamin values (Wokes) 134
- Vegetable(s) *see also under* Food(s)
- Vegetable protein-rich foods and prevention of kwashiorkor, work of WHO (Burgess) 13
- Vegetarian diets and growth, child (Wokes) 134
- Vegetarian and vegan diets compared, sources of calories and protein (Wokes) 134
- Vitamin(s) effect of food processing on (Barnell & Hollingsworth) 142
- Vitamin(s) in quail's eggs (Simpson & Soh Chin Chai) xi
- Vitamin values, vegan diet (Wokes) 134
- Vitamin A activity in herring eggs, unusual form (Fisher, Harrison, Kon, Plack, Thompson & Todd) xi
- Vitamin A application to skin, and hair growth, mouse (Montagna) xii
- Vitamin A deficiency and hair growth, mouse (Montagna) xii
- Vitamin B₂ *see under* Riboflavin
- Vitamin B₆ *see under* Pyridoxin
- Vitamin B₁₂ absorption measured with labelled vitamin B₁₂, man (Evans) 126
- Vitamin B₁₂ deficiency, clinical signs of, and length of period of veganism, man (Wokes) 134
- Vitamin B₁₂, extradietary sources, vegan (Wokes) 134
- Vitamin B₁₂ and folic-acid deficiency and Addisonian pernicious anaemia, man (Spray) 119
- Vitamin B₁₂ and folic-acid metabolism, man (Spray) 119
- Vitamin B₁₂, labelled, absorption in pernicious anaemia and in megaloblastic anaemia associated with gastric surgery, intestinal structural abnormality or steatorrhoea, effect of intrinsic factor, antibiotics, man (Evans) 126
- Vitamin B₁₂, suggested interrelationships with folic acid, and macrocytic anaemia, man (Spray) 119
- Vitamin C, intracellular distribution in adrenal cortex (Bourne) xii
- Vitamin D in modern infant diets and hypercalcaemia (Sinclair) xviii
- Walking, oxygen uptake and energy expenditure and speed, man (Noltie) 93
- Water, addition or removal during processing of food, effect on nutritive value, man (Barnell & Hollingsworth) 142
- Weight *see under* Body-weight and Growth
- Whale by-products *see under* Protein concentrates
- Whale meals, home-produced and imported supplies, United Kingdom, 1953-5 (Duckworth) 160
- WHO and child nutrition and milk substitutes, locally available foods, goitre, kwashiorkor (Burgess) 13
- WHO and human nutrition (Burgess) 13, (Dorolle) 1, (Postmus) 35, (Secretariat of The United Nations Children's Fund (UNICEF)) 22
- WHO, nutrition work in Burma (Postmus) 35
- Woman *see also under* Human, Man and Vegan
- Woman, differences in yield and composition of milk from right and left breasts (Hyttén) vi
- Woman, pregnant, incidence of anaemia; iron-deficiency anaemia and diet, season, parity, iron therapy; megaloblastic anaemia and diet, Dublin, 1953-5 (Gatenby) 115
- Zymotic *see under* Infection
