"All researchers working in the tropics or who attempt to follow tropical literature will find it essential reading."

GH Orians, Nature

Journal of Tropical Ecology

Editor: David M. Newbery, *University of Stirling*

Journal of Tropical Ecology, first published in 1985, has now become a major international ecological journal. Attractively printed with excellent quality illustrations and tables, it examines the special problems of tropical environments and their proper management. The breadth and quality of papers, the format and price, are also aimed to stimulate the research activities of young ecologists in tropical nations.

Published quarterly by Cambridge University Press, the journal is for all those interested in the biology of the tropics – agriculturalists, foresters, developmental planners, conservationists, and wildlife biologists.

Subscription Information

Journal of Tropical Ecology is published quarterly in February, May, August and November. Volume 11 in 1995: £96 for institutions; £40 for individuals; £25 for individuals from less developed countries (except Mexico); delivery by airmail £18 per year extra. ISSN 0266-4674.

Experimental Agriculture

Experimental Agriculture publishes the results of analytical research into the agronomy of crops, particularly the food, forage and industrial crops of the warmer regions of the earth. International in scope, it is especially concerned with experimental work conducted in the field and is designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new methods of agricultural crop production and discussions of problems arising from the rapid expansion of agricultural production. Particular emphasis is placed on papers covering farming systems and sustainability in tropical regions. There are also regular book reviews.

A selection of recent articles

Farming systems research in India: a historical perspective
KANWAR, J. S., VIRMANI, S. M. and DAS, S. K.

Plant genetic resources and plant improvement as tools to develop sustainable agriculture
CECCARELLI, S., VALKOUN, J. ERSKINE, W., WEIGAND, S., MILLER, R. and VAN LEUR, J.

Farming systems research in remote areas in Nepal: the need for a new approach to on-farm research and extension
GIBBON, D. and SCHULTZ, M.

Intercropping and diversity: an economic analysis of cropping patterns on smallholder farms in Malawi
SHAXSON, L. and TAUER, L. W.

Measuring light interception and the efficiency of light utilization by the coconut palm (*Cocos nucifera*)
MOSS, J. R. J.

Canopy duration and structure of pigeonpea intercropped with upland rice
RAMAKRISHNA, A., ONG, C. K. and REDDY, S. L. N.

Genetic vulnerability of Oceania's traditional crops
LEBOT, V.

Data analysis in agricultural experimentation: some standard contrasts
PEARCE, S. C.

Restriction fragment length polymorphisms (RFLPs) and crop improvement
YOUNG, N. D.

Vesicular-arbuscular mycorrhiza and phosphorus uptake of chickpea grown in Northern Syria
WEBER, E., GEORGE, E., BECK, D. P., SAXENA, M. C. and MARSCHNER, H.

Prospects for improving Mediterranean grasslands in Lebanon through seeding, fertilization and protection from grazing
OSMAN, A. E. and COCKS, P. S.

Subscription information

Volume 31, 1995: January, April, July and October: £96; £44 for members of Tropical Agriculture Association; delivery by airmail £18.50 per year extra. ISSN 0014-4797
