

Erratum

Owing to a production error, Figure 8 of the paper by Plowman & Creamer that appeared in the previous issue (*Journal of Dairy Research* **62** 451–467) was printed with the lower part of the Figure reversed. We regret this error, and reproduce the correct version of Figure 8 (from p. 462) opposite.

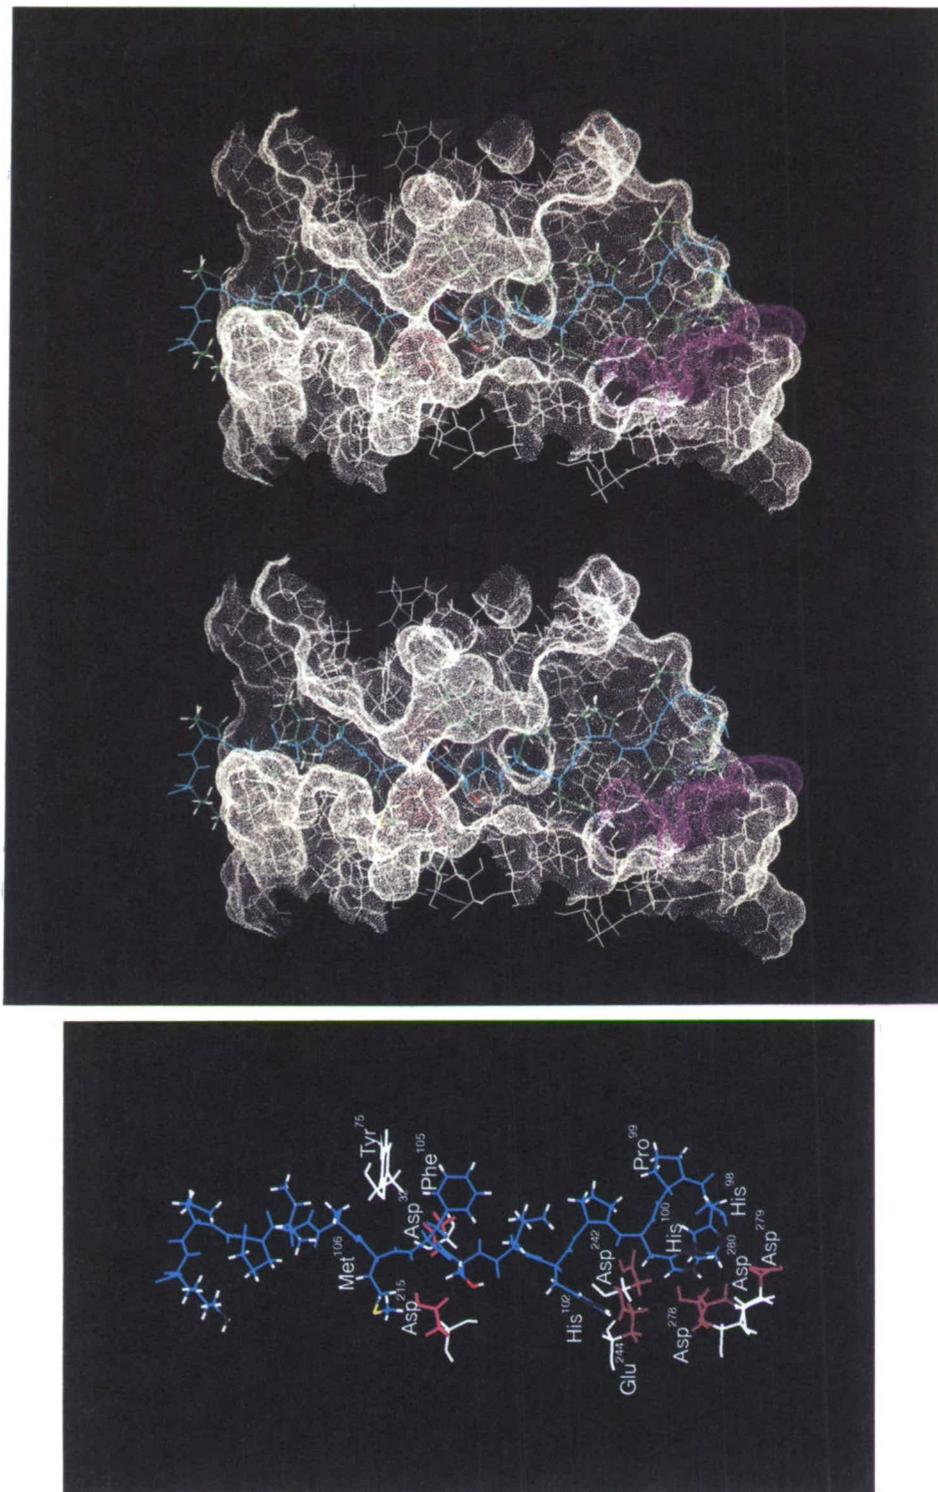

Fig. 8. A stereoscopic view of the interaction of the 98–111 region of κ -casein with porcine pepsin looking down on the active site cleft. For an explanation of the diagram, see Fig. 5.
