## EDITOR

William K Estes, *Harvard University*

*Psychological Science* is a new bimonthly publication being launched as the flagship journal of the American Psychological Society, founded 1988, to regain the scientific focus of psychological research. The journal is designed to be the forum for research, theory, and application in psychology and the closely related behavioral, cognitive, neural, and social sciences. The journal also considers psychology in government and public affairs. Unlike most research journals, *Psychological Science* encourages articles of general theoretical significance or of broad interest across specialties.

## *Recent Articles*

The Prenatal Origins of Behavioral Organization,  
*William P Smotherman and Scott R Robinson*

Facts, Fantasies, and the Future of Child Care in  
the United States, *Sandra Scarr et al.*

Serial vs Parallel Processing, *James T Townsend*

Answering Reading Comprehension Items Without  
Passages on the SAT, *Stuart Katz et al.*

Infants' Perception of Phase Structure in Music,  
*Carol L Krumhansl and Peter W Jusczyk*

*Psychological Science* (ISSN 0956-7976) is published bimonthly. Volume 1 (1990) subscriptions (US and Canada only): \$100.00 institutions; \$50.00 for non-member individuals. APS members receive the journal as part of their dues.

## CONTENTS

### *Research Articles*

- AVI CHAUDHURI AND DONALD A. GLASER 397 Metastable motion anisotropy
- JAY F. MULLER, JOSEF AMMERMÜLLER, RICHARD A. NORMANN, AND HELGA KOLB 409 Synaptic inputs to physiologically defined turtle retinal ganglion cells
- M. ARIEL AND A.F. ROSENBERG 431 Effects of synaptic drugs on turtle optokinetic nystagmus and the spike responses of the basal optic nucleus
- WILLIAM H. BALDRIDGE AND ALEXANDER K. BALL 441 Background illumination reduces horizontal cell receptive-field size in both normal and 6-hydroxydopamine-lesioned goldfish retinas
- OSAMU UMINO, YUNHEE LEE, AND JOHN E. DOWLING 451 Effects of light stimuli on the release of dopamine from interplexiform cells in the white perch retina
- NEIL A. MONTGOMERY AND KATHERINE V. FITE 459 Organization of ascending projections from the optic tectum and mesencephalic pretectal gray in *Rana pipiens*
- CHERYL K. MITCHELL AND DIANNA A. REDBURN 479 Melatonin inhibits ACh release from rabbit retina
- CLAUDINE SAVY, AXELLE SIMON, AND JEANINE NGUYEN-LEGROS 487 Spatial geometry of the dopamine innervation in the avascular area of the human fovea
- MICHAEL S. BIERNBAUM, BRAD M. BINDER, AND M. DERIC BOWNDS 499 Dim background light and Cerenkov radiation from <sup>32</sup>P block reversal of rhodopsin phosphorylation in intact frog retinal rods
- HEIKE WEBER, BURKHART FISCHER, MICHAEL BACH, AND FRANZ AIPLE 505 Occurrence of express saccades under isoluminance and low contrast luminance conditions
- 511 Detailed Information for Contributors
- 512 The Humane Care and Use of Animals
