CAMBRIDGE UNIVERSITY PRESS

Bentley House, 200 Euston Road, London, N.W. 1
American Branch: 32 East 57th Street, New York, N.Y. 10022

SUBSCRIPTION £5 net (U.S.A. \$18.50) per volume

SINGLE PARTS 40s. net (U.S.A. \$7.50)

GENETICAL RESEARCH

GENETICAL RESEARCH publishes original work on all aspects of genetics, or in any field of research which has an important bearing on genetics. Papers will be submitted to referees before acceptance. They will generally be printed in order of acceptance. In addition, Short Papers (see below) may be included if received 3 months before publication date.

TWO VOLUMES are published per year each consisting of three parts plus an index.

SUBSCRIPTIONS may be sent to any bookseller or to the Cambridge University Press, 200 Euston Road, London, N.W. 1. Subscriptions in the U.S.A. should be sent to the American Branch of the Press, 32 East 57th Street, New York, N.Y. 10022. The subscription price is £5 net (including postage) for a volume of three parts (\$18.50 in the U.S.A.), payable in advance; Separate parts 40s. or \$7.50 each (plus postage).

NOTES FOR CONTRIBUTORS

CONTRIBUTIONS will be welcomed from scientists of all nationalities, but must be written in English, with an English summary. An additional summary in French, German, Russian or Italian will be accepted. Papers should be sent to the Executive Editor, Dr. E. C. R. Reeve, Institute of Animal Genetics, West Mains Road, Edinburgh 9.

GENERAL. Submission of a paper will be taken to imply that it is unpublished and is not being considered for publication elsewhere. Papers published in *Genetical Research* may not be reprinted or published in translation without permission from the Editorial Board. Papers should be as concise as clarity permits, and illustrations kept as few as possible.

SHORT PAPERS. This category is designed for concisely written reports of work for which rapid publication is considered desirable. Such papers will normally be published within three months of receipt in acceptable form. They should not exceed 6 pages of print in length.

TYPESCRIPTS. A top copy and one carbon copy should be submitted. They should be typed with double-spacing, on one side of the paper, leaving margins of about 1½ inches at the left-hand side and head of each sheet. Quarto is preferred to foolscap paper. Heavily corrected typescripts may have to be returned to the author for retyping. Papers should state the name and address of the author (or his proxy) to whom proofs are to be sent. The address of the laboratory at which the work was carried out will be printed with the authors' names at the head of the paper, and changes of address and sources of financial support may be added in footnotes.

A short title should be supplied for running headlines; this must not exceed 50 characters, counting each letter and space as one character.

(continued inside back of cover)

JOURNAL OF REPRODUCTION AND FERTILITY

The Journal publishes original papers, abstracts of Proceedings, and occasionally reviews and bibliographies, dealing with the morphology, physiology, biochemistry and pathology of reproduction in man and animals, and with the biological, medical and veterinary problems of fertility and lactation. Numbers are issued bimonthly to give two volumes a year.

Papers to appear during 1966:

- W. R. DUKELOW. Effects of age and strain of female and of ethylene dichloride extracted wheat germ oil on reproduction in mink (*Mustela vison*)
- R. G. ZIMBELMAN and L. W. SMITH. Control of ovulation in cattle with melengestrol acetate: 1. Effects of dosage and route of administration. 2. Effects of follicular size and activity
- A. BARTKE. Reproduction of female dwarf mice treated with prolactin
- L. E. A. ROWSON and R. M. MOOR. Embryo transfer in the sheep: the significance of synchronizing oestrus in the donor and recipient animal
- M. M. KETCHEL, U. K. BANIK and S. J. MANTALENAKIS. A study of delayed implantation caused by parabiosis in pregnant rats
- H. PIGON, M. MARCHUT and N. NESTOROV. Urinary oestrogens in the mature male mule
- H. PETERS and E. LEVY. Cell dynamics of the ovarian cycle
- J. J. YASUKAWA and R. K. MEYER. Effect of progesterone and oestrone on the pre-implantation and implantation stages of embryo development in the rat
- T. O'SHEA and R. G. WALES. The aerobic metabolism of ram spermatozoa
- G. H. KIRACOFÉ and H. G. SPIES. Length of maintenance of naturally formed and experimentally induced corpora lutea in hysterectomized ewes
- C. V. HULET. Effects of various treatments with 6-methyl-17-acetoxy-progesterone (MAP) on subsequent fertility in ewes
- R. P. AMANN. Effect of ejaculation frequency and breed on semen characteristics and sperm output of rabbits

Editorial correspondence should be sent to the Executive Editor, Journal of Reproduction and Fertility, 8 Jesus Lane, Cambridge, England, and business correspondence to the publishers.

The subscription rate for 1966 is £6 per volume or £12 per year (two volumes). U.S.A. and Canada \$20.00 per volume or \$40.00 per year.

BROAD STREET, OXFORD**

CANADIAN
Journal of Genetics and Cytology

Published by
The Genetics Society of Canada

An international quarterly contains original research papers covering all branches of genetics as well as short notes and book reviews. Speedy publication of contributions assures quick dissemination of results.

Annual subscription: \$12.00, in Canadian funds, UNESCO coupons accepted. Backnumbers of all volumes are available at \$12.00 per volume.

Orders may be sent to:

Dr. A. S. Johnson,
Central Experimental Farm,
Box 65, Ottawa, Ontario, Canada.

**COMMONWEALTH BUREAU OF
ANIMAL BREEDING AND GENETICS**

ANIMAL BREEDING ABSTRACTS

Issued quarterly in March, June, September and December

This journal provides comprehensive coverage of world literature on the reproduction and genetics of laboratory mammals (excluding primates) as well as of farm livestock, poultry, and other animals of economic importance. Theoretical and statistical genetics are covered in so far as these are concerned with principles of general application. In addition to abstracts the journal contains book reviews and review articles.

Among recent review articles are: "Some contributions of the laboratory mouse to animal breeding research," by R. C. Roberts (Pt. I, Sept., Pt. II, Dec. 1965). "Intersexuality in farm animals," by E. S. E. Hafez and M. R. Jainudeen, (March, 1966).

*Subscription rate: 140s. per annum
65s. per annum in U.K. and contributing countries*

*Subscriptions may be placed with any major
bookseller or sent to:*

The Journal of General Microbiology

Editors: B. C. J. G. KNIGHT and
A. F. B. STANDFAST

The *Journal of General Microbiology* is conducted by the Society for General Microbiology, whose aim is to promote the advancement of microbiology by providing a common meeting-ground for those working in all the various specialized fields, including for example, medical, veterinary, agricultural and economic microbiology. The Society is concerned with the more fundamental aspects of the study of bacteria, viruses, micro-fungi, protozoa and microscopic algae in their various biological activities, its members being united by the common aim of developing scientific knowledge concerning micro-organisms.

The subscription rate is £5 net per volume of 3 parts. Single parts 45s. each, plus postage. Four volumes will be issued each year. Orders should be sent to

Chromosome Techniques

Theory and Practice

By A. K. Sharma, D.Sc., and
Archana Sharma, D.Phil., D.Sc.

The scope of this new reference work for postgraduates and advanced research workers is extremely wide and it deals with all the important chromosomes of plants, animals and human materials under both fixed and unfixed conditions, and in tissue culture. *484 pages illus. 87s. 6d.*

Introduction to Medical Laboratory Technology

4th Edition.

By F. J. Baker, F.I.M.L.T., F.I.S.T., F.R.M.S.,
R. E. Silvertown, F.I.M.L.T., F.R.M.S., and
Eveline D. Luckcock, F.I.M.L.T.

For the fourth edition of this textbook, which has been acknowledged as the standard work for students and postgraduates, the text has been considerably enlarged and extensively revised.

672 pages illus. 62s. 6d.

The Mast Cells

By Hans Selye, M.D., Ph.D., D.Sc.

This critical evaluation of the entire literature which has been produced on the mast cells is unique in that it represents a wealth of information never before assembled. *527 pages illus. 135s.*

The Molecular Basis of Heredity

By A. R. Peacocke, M.A., D.Sc., and
R. B. Drysdale, B.Sc.

The molecular basis of heredity is described here from the viewpoint of two scientists, one concerned with the chemical aspect of the subject and the other with the microbiological.

188 pages illus. 37s. 6d.

Structure and Function of Connective and Skeletal Tissue

Edited by S. Fitton Jackson, R. D. Harkness, S. M. Partridge, and G. M. Tristram.

The Proceedings of an Advanced Study Institute organized under the Auspices of N.A.T.O. and held at St. Andrews in June 1964.

559 pages illus. £7
