Medical Ethics

Melanie Philips

Health correspondent, The Guardian.

Dr. John Dawson

Spokesman, British Medical Association.

The technology and the possibilities of modern medicine are undergoing considerable changes, and with them comes a challenge to the existing codes of medical ethics.

Melanie Philips and Dr. John Dawson – both constantly involved with the issues at hand – have written a new, entirely up to date and international analysis of the problems posed that will become a standard text for informed debate. Genetic engineering, euthanasia, abortion, brain death, tissue transplants, artificial insemination, screening, limb replacement, life support machines – all are discussed as a new framework for rational and ethical practice is proposed.

Sociology and Socialism

Tom Bottomore

Professor of Sociology, University of Sussex.

This landmark book presents the core of Tom Bottomore's work on the relation between sociology and socialism. It focuses on sociological theories which are critical of socialism, and examines some of the unsettled questions about Marxism itself as a comprehensive sociological theory which claims to be, at the same time, a doctrine of human emancipation.

Ideology and Social Science

István Mészáros

Professor of Philosophy, University of Sussex.

This important book – written by a major philosopher – provides a significant critical evaluation of the theory of ideology, focusing on the work of Marx, Weber, Coser, Constantino, Lukács and Sartre. Mészáros insists on the socially embedded and value-orientated character of all social theory, in sharp contrast with the self-serving ideology of the much-advertised 'end of ideology.'

The Welfare State in Crisis: Social Thought and Social Change

Ramesh Mishra

Associate Professor, School of Social Work, McMaster University.

The Welfare State throughout the Western World is on the defensive and in disarray. Starved of financial and political support, it faces a crisis of legitimacy. Ramesh Mishra presents a penetrating analysis of the problems of the Welfare State, and concludes that it is premature to reject the combination of market and state regulation of economic life.

Philosophy and Sociology of Science

An Introduction

STEWART RICHARDS

Modern science is inseparable from the society that supports it. Yet now more than ever before the scientist is encouraged to specialize and narrow his field of vision. Stewart Richards argues that it is vital to reverse this trend, and that all students of science — natural and social — should look at the context, roots and structure of their disciplines.

A Dictionary of Marxist Thought

Edited by TOM BOTTOMORE

Editorial Board: Laurence Harris, V.G. Kiernan, Ralph Miliband

A clear and scholarly guide both to the basic concepts of Marxism and to the individuals and schools of thought whose work has formed the body of Marxist ideas since Marx's day. The articles, written by an international team of some 80 scholars, are often extensive and are fully referenced to the writings of Marx and Engels.

Beyond Objectivism and Relativism

RICHARD J. BERNSTEIN

Philosophy is again questioning its goals and assumptions, a malaise signified by the growing opposition between objectivism and relativism, between rationality and irrationality, and between realism and anti-realism. Contemporary thinking is becoming increasingly polarized and attempts to escape from this entire framework of analysis have all too frequently been assimilated to these standard oppositions. This major new book represents a courageous attempt to break out of this mould, while identifying what is wrong with the intellectual and cultural matrix that has shaped so much of modern life.

Rationality and Relativism

Edited by MARTIN HOLLIS and STEVEN LUKES

This book takes its inspiration from the debate encapsulated in *Rationality* (1970) edited by Bryan Wilson, but extends it into new fields and into current topics of discussion. Ernest Gellner, Martin Hollis, Robin Horton and Steven Lukes add to their earlier thoughts. They are joined by Barry Barnes, David Bloor, Jon Elster, Ian Hacking, W. Newton-Smith, Dan Sperber and Charles Taylor.

Against Epistemology: A Metacritique

Studies in Husserl and the Phenomenological Antinomies

THEODOR ADORNO

This is the long-awaited translation of one of Adorno's most important works: it inspired Habermas and Marcuse, and continues to influence other eminent thinkers in philosophy and the social sciences today. Written in a relatively simple style, the book can serve as an introduction to Adorno's later and more difficult writings.

The Politics of Social Theory

Habermas, Freud and the Critique of Positivism

RUSSELL KEAT

'The discussion is clear and well presented . . . His discussion of "value-freedom" in particular is clear and helpful, and his consideration of the scientific status of psychoanalysis is, though detailed, something to be recommended to anyone who has struggled to understand its marginal status amongst the social sciences. If only Habermas would be as clear as Keat!' *New Society*

Rights, Killing and Suffering

Moral Vegetarianism and Applied Ethics

RAYMOND FREY

Is it morally wrong to eat meat? In recent years much has been written about animal welfare and rights, and more and more people have come to think that vegetarianism is the only justifiable approach. Their views reflect one or more of three basic arguments: that meat-eating violates moral rights, that it is wrong to kill, and that it is wrong to inflict pain and suffering. In this provocative book, going against the main tide of current thinking, Raymond Frey examines and finds wanting all three arguments.

Women, Reason and Nature

Some Philosophical Problems with Feminism

CAROL McMILLAN

Accepting that there are irreducible biological differences between women and men, Carol McMillan sets out to disprove the philosophical assumption that these differences entail inferiority or superiority. The book shows that all human activity presupposes reasoned behaviour, and is a forthright assault on all the popular misconceptions which ultimately lead to an under-valuing of women.

Science and Moral Priority

The Merging of Mind, Brain and Values

ROGER SPERRY

'This volume will guide both speculative philosophy and scientific examination of the evidence for years to come in the search for a new foundation of belief.' Colwyn Trevarthen from the foreword

The winner of the 1982 Nobel Prize for Medicine here summarizes recent research on the nature of the brain and explores its implications for the behavioural sciences.

Freud and Human Nature

ILHAM DILMAN

Interest in the writings of Freud seems never to decline, but it is rare that an important book appears which discusses Freud's belief that human nature exists independently from the society in which an individual develops. This book provides this: a thorough critical examination of the various issues raised by Freud's ideas of sexual and moral development.

The Ethics of Environmental Concern

ROBIN ATTFIELD

The Ethics of Environmental Concern sets out to examine traditional attitudes to nature and to discover how far these need to be revised to cope with modern ecological problems. With its survey of moral traditions which are often misrepresented, and lively engagements of urgent contemporary questions, the book will interest all students of philosophy.

The Shaping of Man

Philosophical Aspects of Sociobiology

ROGER TRIGG

'Trigg stimulates one to think on important matters. And that is no small praise.'
Nature

Why do people behave as they do? Is there such a thing as human nature or is man fundamentally different in different societies? Underlying these questions is the basic question of whether genetic inheritance or cultural influence is the decisive factor in shaping man.

Sociobiology and the Preemption of the Social Sciences

ALEXANDER ROSENBERG

Why have the economic theories developed throughout history been unsuccessful? Why have the social sciences in general failed to produce results with the ever-increasing explanatory power and predictive strength of the natural sciences? Alexander Rosenberg, a philosopher of science, examines the new and highly controversial discipline of sociobiology.

Spheres of Justice

A Defence of Pluralism and Equality

Michael Walzer

A powerful demonstration of how complex an affair "equality" is in real life, **Spheres of Justice** examines exactly how society distributes the social things of life — honour, work, education, health care, free time, political power and even love — and how these goods should be distributed. For each, Walzer argues, has its own "sphere of justice". His magisterial new book defends both pluralism and equality, and pleads for a just society where "equality" depends not on the surveillance of the state but on the vigilance of ordinary men and women.

"This brilliant book works out a new and radically different conception of distributive justice. Walzer's sensitive and insightful examinations of the goods we exchange and desire qualifies as one of the most significant formulations of distributive justice in our time. **Spheres of Justice** should and will transform the debate about distributive justice beyond all recognition." Charles Taylor, Professor of Political Science, McGill University

"A humane and hopeful vision . . . His purpose is to resist the universalizing impulse of philosophy, to affirm the rich particularity of our moral lives . . . **Spheres of Justice** offers an imaginative alternative to the current debate over distributive justice." **The New York Times**

Professor at the Institute of Advanced Studies, Princeton, Michael Walzer's books include the widely acclaimed **Just and Unjust Wars** (1977) and **Radical Principles** (1980). Just published 368 pages £15.00 in hardback only 683 7

Durkheim and the Law

Edited by STEVEN LUKES and ANDREW SCULL

From his first major work, *De la Division du Travail Social*, Durkheim never ceased to see Law both systematically and as a social phenomenon. This book collects together writings previously scattered through his works — including both sides of his illuminating and provocative public debate, in the pages of the *Revue Philosophique*, with Gabriel Tarde — and sets them in context, analysing his lasting contribution to the sociology of Law. 256 pages, £16.50 in hardback only 286 6
