

Proceedings of the
CAMBRIDGE PHILOSOPHICAL
SOCIETY

VOLUME 51

CAMBRIDGE
AT THE UNIVERSITY PRESS
1955

*Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press*

*London: Bentley House, N.W. 1
American Branch: New York*

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

	PAGE
Adkins, J. E. A note on the finite plane-strain equations for isotropic incompressible materials	363
Ballinger, R. A. and March, N. H. Molecules with tetrahedral and octahedral symmetry. II. Energy calculations and molecular constants for methane, silane and germane	504
Ballinger, R. A. and March, N. H. Molecules with tetrahedral and octahedral symmetry. III. Theoretical basis of the 'smoothing approximation'	517
Bambah, R. P. Polar reciprocal convex bodies. (<i>Research note</i>)	377
Bastin, E. W. and Kilmister, C. W. The concept of order. II. Measurements	454
Batchelor, G. K. A correction to the paper 'The effect of homogeneous turbulence on material lines and surfaces' (An appendix to the paper by W. H. Reid, On the stretching of material lines and surfaces in isotropic turbulence with zero fourth cumulants)	361
Birch, B. H. On games with almost complete information	275
Brown, L. J. M. On conformal mappings of domains of infinite connectivity	56
Bullard, Sir E. The stability of a homopolar dynamo	744
Cassels, J. W. S. Bounds for the least solutions of homogeneous quadratic equations	262
Chandrasekhar, S. The character of the equilibrium of an incompressible heavy viscous fluid of variable density	162
Cherry, T. M. On Kepler's equation	81
Chisholm, J. S. R. and De Borde, A. H. A new derivation of the fundamental formulae in Fowlerian statistical mechanics. (<i>Research note</i>)	526
Clenshaw, C. W. and Olver, F. W. J. The use of economized polynomials in mathematical tables	614
Cohn, P. M. A non-nilpotent Lie ring satisfying the Engel condition and a non-nilpotent Engel group	401
Coppel, W. A. The solution of equations by iteration	41
Cox, D. R. A use of complex probabilities in the theory of stochastic processes	313
Cox, D. R. The analysis of non-Markovian stochastic processes by the inclusion of supplementary variables	433
De, S. C. Contributions to the theory of Stokes waves	713
De Borde, A. H. (<i>Joint author</i>). A new derivation of the fundamental formulae in Fowlerian statistical mechanics. (<i>Research note</i>)	526
Dennis, S. C. R. and Poots, G. The solution of linear differential equations	422
Diananda, P. H. The central limit theorem for m -dependent variables	92
Dixmier, J. Sur les algèbres dérivées d'une algèbre de Lie	541
Douglas, A. S., Hartree, D. R. and Runciman, W. A. Atomic wave functions for gold and thallium	486
Dungey, J. W. Deductions from the perfect cosmological principle. (<i>Research note</i>)	532
Edwards, D. A. and Moyal, J. E. Stochastic differential equations	663
Elton, L. R. B. On the infinity in the second Born approximation for the Coulomb field	333
Fan, Ky. Some inequalities concerning positive-definite Hermitian matrices	414
Gee, B. D. On Riemann Integrability. (<i>Research note</i>)	537
Gillis, J. Correlated random walk	639
Goddard, L. S. Transition matrices occurring in the theory of Markoff processes. (<i>Research note</i>)	382

	PAGE
Goddard, L. S. and Schneider, H. Pairs of matrices with a non-zero commutator	551
Good, I. J. The joint distribution for the sizes of the generations in a cascade process. (<i>Research note</i>)	240
Good, I. J. A new finite series for Legendre polynomials. (<i>Research note</i>)	385
Green, C. D. (<i>Joint author</i>). The Ehrenfests' wind-wood model in two dimensions	141
Green, J. A. On the converse to a theorem of R. Brauer. (<i>Research note</i>)	237
Griffiths, H. B. A note on commutators in free products. II	245
Hammersley, J. M. and Nelder, J. A. Sampling from an isotropic Gaussian process	652
Hamilton, J. and Salam, A. The bound state representation	103
Hartree, D. R. Approximate wave functions, with exchange for Mn^{+2}	126
Hartree, D. R. The interpolation of atomic wave functions	684
Hartree, D. R. (<i>Joint author</i>). Atomic wave functions for gold and thallium	486
Hawthorne, W. R. The growth of secondary circulation in frictionless flow	737
Hedlund, G. A. A class of transformations of the plane	554
Heins, A. E. and Silver, S. The edge conditions and field representation theorems in the theory of electromagnetic diffraction	149
Herivel, J. W. The derivation of the equations of motion of an ideal fluid by Hamilton's principle	344
Hide, Raymond. The character of the equilibrium of an incompressible heavy viscous fluid of variable density: an approximate theory	179
Hilton, P. J. A note on the P-homomorphism in homotopy groups of spheres. (<i>Research note</i>)	230
Huzurbazar, V. S. On the certainty of an inductive inference. (<i>Research note</i>)	761
Jones, D. S. Note on Whitham's 'The propagation of weak spherical shocks in stars'	476
Kahn, F. D. The correction of observational data for instrumental band width	519
Kilmister, C. W. (<i>Joint author</i>). The concept of order. II. Measurement	454
Kuper, C. G. Note on Ehrenfest's equations. (<i>Research note</i>)	243
Laredo, S. J. and Pippard, A. B. Thermal conduction in the intermediate state of superconductors	368
Leigh, D. C. F. The laminar boundary-layer equation: a method of solution by means of an automatic computer	320
Liebeck, H. A note on prime-power groups with symmetrical generating relations. (<i>Research note</i>)	394
Littlewood, D. E. The cosmological principle	678
Longuet-Higgins, M. S. Bounds for the integral of a non-negative function in terms of its Fourier coefficients	590
Ludford, G. S. S., Martinek, J. and Yeh, G. C. K. The sphere theorem in potential theory. (<i>Research note</i>)	389
Macbeath, A. M. and Rogers, C. A. A modified form of Siegel's mean-value theorem	565
McCarthy, I. E. Physical properties of particles obeying generalized statistics	131
March, N. H. (<i>Joint author</i>). Molecules with tetrahedral and octahedral symmetry. II. Energy calculations and molecular constants for methane, silane and germane	504
March, N. H. (<i>Joint author</i>). Molecules with tetrahedral and octahedral symmetry. III. Theoretical basis of the 'smoothing approximation'	517
Martinek, J. (<i>Joint author</i>). The sphere theorem in potential theory. (<i>Research note</i>)	389

	PAGE
Michael, D. H. The stability of a combined current and vortex sheet in a perfectly conducting fluid. (<i>Research note</i>)	528
Morris, G. R. A differential equation for undamped forced non-linear oscillations. I	297
Moyal, J. E. (<i>Joint author</i>). Stochastic differential equations	663
Munn, W. D. On semigroup algebras	1
Munn, W. D. and Penrose, R. A note on inverse semigroups. (<i>Research note</i>) . . .	396
Nelder, J. S. (<i>Joint author</i>). Sampling from an isotropic Gaussian process	652
Northcott, D. G. A note on the $AF + B\Phi$ theorem and the theory of local rings .	545
Northcott, D. G. A note on classical ideal theory. (<i>Research note</i>)	766
Obi, Chike. Uniformly almost periodic solutions of non-linear differential equations of the second order. I. General exposition	604
Olver, F. W. J. (<i>Joint author</i>). The use of economized polynomials in mathematical tables	614
Patankar, V. N. A note on recurrent events	96
Patterson, E. M. Note on nilpotent and solvable algebras	37
Pennington, W. B. On Ingham summability and summability by Lambert series .	65
Penrose, R. A generalized inverse for matrices	406
Penrose, R. (<i>Joint Author</i>). A note on inverse semigroups. (<i>Research note</i>) . . .	396
Phillips, O. M. The irrotational motion outside a free turbulent boundary	220
Pippard, A. B. (<i>Joint author</i>). Thermal conduction in the intermediate state of superconductors	368
Pirani, F. A. E. On the perihelion motion according to Littlewood's equations. (<i>Research note</i>)	535
Polkinghorne, J. C. Temporally ordered graphs in quantum field theory	113
Polkinghorne, J. C. Temporally ordered graphs and bound state equations. (<i>Research note</i>)	762
Poots, G. (<i>Joint author</i>). The solution of linear differential equations	422
Powell, F. C. A notation for vectors and tensors	449
Ragab, F. M. Some formulae for the associated Legendre functions of the first kind. (<i>Research note</i>)	538
Rees, D. A note on valuations associated with a local domain	252
Reid, W. H. On the stretching of material lines and surfaces in isotropic turbulence with zero fourth cumulants (with an appendix by G. K. Batchelor)	350
Ridley, E. C. The interpolation of atomic fields	693
Ridley, E. C. The self-consistent field of Mo^+	702
Ringrose, J. R. Compact linear operators of Volterra type	44
Roberts, G. T. Topologies defined by bounded sets. (<i>Research note</i>)	379
Rogers, C. A. (<i>Joint author</i>). A modified form of Siegel's mean-value theorem . .	565
Runciman, W. A. (<i>Joint author</i>). Atomic wave functions for gold and thallium .	486
Salam, A. (<i>Joint author</i>). The bound state representation	103
Schildrop, Edgar B. A principle in classical mechanics with a 'relativistic' path-element extending the principle of least action	469

	PAGE
Schneider, H. (<i>Joint author</i>). Pairs of matrices with a non-zero commutator	551
Scott, J. M. C. The retardation of alpha particles when capture and loss occur	121
Shaw, R. Spinor identities. (<i>Research note</i>)	234
Shenton, L. R. A semi-infinite random walk with discrete steps	442
Silver, S. (<i>Joint author</i>). The edge conditions and field representation theorems in the theory of electromagnetic diffraction	149
Slater, L. J. The integration of hypergeometric functions	288
Slater, L. J. Hypergeometric Mellin transforms	577
Smith, W. L. Extensions of a renewal theorem	629
Stewartson, K. On the motion of a flat plate at high speed in a viscous compressible fluid. I. Impulsive motion	202
Taunt, D. R. Remarks on the isomorphism problem in theories of construction of finite groups	16
Taunt, D. R. Finite groups having unique proper characteristic subgroups. I	25
Taylor, S. J. The α -dimensional measure of the graph and set of zeros of a Brownian path	265
Ter Haar, D. and Green, C. D. The Ehrenfests' wind-wood model in two dimensions	141
Ward, A. J. On relations between certain intrinsic topologies in partially ordered sets	254
Yeh, G. C. K. (<i>Joint author</i>). The sphere theorem in potential theory. (<i>Research note</i>)	389
Ziman, J. M. The electron-phonon interaction, according to the adiabatic approximation	707
<i>Proceedings</i>	768
<i>Statement of Accounts</i>	772

The following papers have been accepted for publication and will appear shortly:

LINDEN, C. N. Functions regular in the unit circle.

GRAVETT, K. A. H. A characterization of frontier.

JEFFREYS, H. On the use of asymptotic approximations of Green's type when the coefficient has zeros.

REES, D. A basis theorem for polynomial modules.

COULSON, C. A. and MARCH, N. H. Molecules with tetrahedral and octahedral symmetry, IV.

BANYARD, K. E. and MARCH, N. H. Molecules with tetrahedral and octahedral symmetry, V.

REES, D. Two classical theorems of ideal theory.

TAYLOR, J. G. Classical electrodynamics as a distribution theory.

DAVIES, R. O. A note on linear derivates of measurable functions.

LITTLEWOOD, D. E. The behaviour of the universe.

BASSALI, W. A. and DAWOUD, R. H. Bending of a circular plate with an eccentric circular load.

BORN, M. and HOOTON, D. J. Statistical dynamics of multiply periodic systems.

PHILLIPS, O. M. The final period of decay of non-homogeneous turbulence.

BESICOVITCH, A. S. On the definition of tangents to sets of infinite linear measure.

HAMMERSLEY, J. M. The area enclosed by Pólya's walk.

SAWYER, D. B. A remark on translated sets.

DAVIES, R. O. A property of Hausdorff measure.

ROGERS, K. Complex homogeneous linear forms.

MORAN, P. A. P. The numerical evaluation of a class of integrals, I.

DAS, S. C. The numerical evaluation of a class of integrals, II.

PAPADOPOULOS, V. M. Scattering by a semi-infinite resistive strip of dominant-mode propagation in an infinite rectangular wave-guide.

HAMMERSLEY, J. M. and MAULDON, J. G. General principles of antithetic variables.

HAMMERSLEY, J. M. and MORTON, K. W. A new Monte Carlo technique: antithetic variates.

GARSTANG, R. H. The effect of configuration interaction on forbidden line strengths.

HAMILTON, J. Centre of mass state vectors.

GRAVETT, K. A. H. Note on a result of Krull.

HANNA, I. I. and SONDHEIMER, E. H. The theory of the thermomagnetic effects in semi-conductors.

LONGUET-HIGGINS, M. S. Statistical properties of a moving wave form.

DUGUID, A. M. and McLAIN, D. H. FC-nilpotent and FC-soluble groups.

WOODS, A. C. The anomaly of convex bodies.

SHERCLIFF, J. A. Entry of conducting and non-conducting fluids in pipes.

CONTENTS OF BIOLOGICAL REVIEWS

Vol. 30, Part 4. November 1955

KATHLEEN M. DREW. Life histories in the algae.

C. BARKER JØRGENSEN. Quantitative aspects of filter feeding in invertebrates.

J. N. SMITH. Detoxication mechanisms in insects.
