VERIFY WITH CONFIDENCE

HEALTHMARK'S CLEARLY
VISIBLE, OBJECTIVE TESTS OF
CLEANING METHODS

SCREEN WITH THE **NOW! TEST**

Rapid Indicator of Gram-Negative bacteria

Simply flush the lumen or swab the elevator mechanism of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

For testing of duodenoscopes in compliance with FDA guidelines

After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories, the leader in independent testing of flexible endoscopes.

MONITOR WITH **PROFORMANCE™ CLEANING VERIFICATION TOOLS**

Perform weekly testing of all assets of the cleaning process

Challenge the cleaning efficacy of the ultrasonic bath with SonoCheck™, the automated washer with TOSI®, pulse-flow lumen washers with LumCheck™, endoscope washers with FlexiCheck™ and more!

Linda Lefrak, Kristen E. Schaffer, Janine Bohnert, Peter Mendel, Kurlen S.E. Payton, Henry C. Lee, Michael A. Bolaris and Kenneth M. Zangwill
- 1582** Using clinical decision support to improve urine testing and antibiotic utilization
Michael E. Yarrington, Staci S. Reynolds, Tray Dunkerson, Fabienne McClellan, Christopher R. Polage, Rebekah W. Moehring, Becky A. Smith, Jessica L. Seidelman, Sarah S. Lewis and Sonali D. Advani

- 1587** Longitudinal rates, risk factors, and costs of superficial and deep incisional surgical-site infection (SSI) after primary and revision total knee arthroplasty: A US retrospective claims database analysis
Charles E. Edmiston, Maureen Spencer, Najmuddin J. Gunja, Chantal E. Holy, Jill W. Ruppenkamp and David J. Leaper
- 1596** Association between in situ steroids and spine surgical site infections among instrumented procedures
James E. Lee, Kathleen O. Stewart, Jessica L. Swain, Evalina Bond, Michael S. Calderwood and Justin J. Kim
- 1601** Surveillance of surgical site infection after colorectal surgery: comprehensiveness and impact of risk factors
Rui M. Malheiro, Bárbara Peleteiro, Goreti Silva, Ana Lebre, José Artur Paiva and Sofia Correia
- 1607** Complex cardiac implantable electronic device infections in Alberta, Canada: An epidemiologic cohort study of validated administrative data
Teagan L. King, Derek S. Chew, Jenine Leal, Kristine Cannon, Derek V. Exner, Stephanie Smith, Oscar Larios, Kathryn Bush, Brian Yuen, Zuying Zhang and Elissa Rennert-May
- 1614** Estimating the effect of active detection and isolation on *Clostridioides difficile* infections in a bone marrow transplant unit
Kelly A. Reagan, David M. Chan, Ginger Vanhoozer and Gonzalo Bearman
- 1620** The association between socioeconomic factors and the success of decolonization treatment among individuals diagnosed with methicillin-resistant *Staphylococcus aureus*: A cohort study from 2007 to 2020
Mette Assenholm Kristensen, Julia Skov Abrantes, Hanne Irene Jensen, Christian Backer Mogensen, Jens Søndergaard and Jens Kjølseth Møller
- 1629** The incidence, duration, risk factors, and age-based variation of missed opportunities to diagnose pertussis: A population-based cohort study
Nicholas J. Evans, Alan T. Arakkal, Joseph E. Cavanaugh, Jason G. Newland, Philip M. Polgreen and Aaron C. Miller
- 1637** Nosocomial influenza in a pediatric general ward: Effects of isolation and cohort placement of children with influenza
Woosuck Suh and Seung Beom Han
- 1643** Risk factors associated with severe acute respiratory coronavirus virus 2 (SARS-CoV-2) transmission, outbreak duration, and mortality in acute-care settings
Tamara R. Duncombe, Matthew Garrod, Xuetao Wang, Joyce Ng, Eunsun Lee, Katy Short and Kennard Tan
- 1650** Incidence and risk factors for clinically confirmed secondary bacterial infections in patients hospitalized for coronavirus disease 2019 (COVID-19)
Hiromichi S. Park, Caitlin M. McCracken, Noah Lininger, Cara D. Varley, Monica K. Sikka, Christopher Evans, Angela Holly Villamagna, Jina T. Makadia and Jessina C. McGregor
- 1657** Knowledge, beliefs, and practices related to coronavirus disease 2019 (COVID-19) infection and vaccination in healthcare personnel working at nonacute care facilities
Armaghan-e-Rehman Mansoor, Caroline A. O'Neil, David McDonald, Victoria J. Fraser, Hilary M. Babcock, Jennie H. Kwon and for the CDC Prevention Epicenters Program

Concise Communication

- 1663** Sensitivity of National Healthcare Safety Network definitions to capture healthcare-associated transmission identified by whole-genome sequencing surveillance
Alexander J. Sundermann, Joseph Penzelik, Ashley Ayres, Graham M. Snyder and Lee H. Harrison

- 1666** Active screening and patient-placement and cohort-placement strategies to decrease carbapenem-resistant gram-negative bacilli colonization and infection in pediatric patients: A 5-year retrospective observational study in China
LJ Yin, LY He, GP Lu, Y Cao, LS Wang, XW Zhai and CQ Wang
- 1670** Carbapenem-resistant *Acinetobacter baumannii* load in patients and their environment: the importance of detecting carriers
Vered Schechner, Anat Or Lerner, Elizabeth Temkin and Yehuda Carmeli
- 1673** Identification and control of two outbreaks of unrelated New Delhi metallo- β -lactamase-producing carbapenem-resistant *Escherichia coli* traced to the same endoscope defect
Halima K. Dabaja-Younis, Vered Schechner, Ibrahim Firan, Iyad Khamaysi, Gabrielle D. Levi, Mor N. Lurie-Weinberger, Avi Weissman, Yuri Guriel, Yuval Geffen and Khetam Hussein
- 1676** A do-it-yourself test protocol using commercial *Bacillus atrophaeus* spores to evaluate the effectiveness of ultraviolet-C light room-decontamination devices
Jennifer L. Cadnum and Curtis J. Donskey
- 1680** Genotypic investigation of a rotavirus cluster at a quaternary-care pediatric hospital
Eimear M. Kitt, Hee-won Yoon, Courtney E. Comar, Kenneth P. Smith, Rebecca M. Harris, Mathew D. Esona, Rashi Gautam, Slavica Mijatovic-Rustempasic, Amy L. Hopkins, Jose Jaimes and Lori K. Handy
- 1683** Does marking as sterile mean really sterile? *Stenotrophomonas maltophilia* outbreak caused by a blood-gas injector containing liquid heparin
Gülçin Telli Dizman, Gökhan Metan, Gizem Karahan, Elif Seren Tanrıverdi, Gülşen Hazırolan, Barış Otlı, Meliha Çağla Sönmezer, Nur Dilek Gül, Burcu Çınar and Serhat Ünal
- 1686** Large hospital-wide outbreak of *Paenibacillus* spp pseudobacteremia associated with contaminated nonsterile gloves
Guilherme Geraldo Lovato Sorio, Beatriz Arns, Cristiane Tejada da Silva Kowski, Patricia Machado Gleit, Gabriela Pereira Flores, Erik Menezes Martins, Muriel Gorges, Renata Dortzbacher Feil Klafke, Marcelle Duarte Alves, Cibele Massotti Magagnin, Jorge Luiz Mello Sampaio and Alexandre Prehn Zavascki
- 1690** Feasibility and impact of a monoclonal antibody infusion program in reaching vulnerable underserved communities
Alfredo J. Mena Lora, Stephanie L. Echeverria, Brenna Lindsey, Ella Li, Lawrence Sanchez, Tiffany Truesdell, Eden Takhsh, Romeen Lavani and Rodrigo Burgos
- 1693** Sickness presenteeism in healthcare workers during the coronavirus disease 2019 (COVID-19) pandemic: An observational cohort study
Katherine Linsenmeyer, David Mohr, Kalpana Gupta, Sucheta Doshi, Allen L. Gifford and Michael E. Charness

Research Brief

- 1697** Central-line-associated bloodstream infections secondary to anaerobes: Time for a definition change?
Jessica L. Seidelman, Ibukunoluwa C. Kalu, Sarah S. Lewis, Deverick J. Anderson and Becky A. Smith
- 1698** Incidence and outcomes of hospital-associated coronavirus disease 2019 (COVID-19) before and after emergence of the severe acute respiratory coronavirus virus 2 (SARS-CoV-2) omicron variant
Victoria R. Williams, Charlie Tan, Robert Kozak and Jerome A. Leis
- 1701** Pandemic hits: Evaluation of an antimicrobial stewardship program website for hospital communication during the coronavirus disease 2019 (COVID-19) pandemic
Reinaldo Perez, Michael E. Yarrington, Martha B. Adams, Connor R. Deri, Richard H. Drew, Michael J. Smith, Justin Spivey, Rebekah H. Wrenn and Rebekah W. Moehring

Letter to the Editor

- 1704** Clean hospitals day 2023 marks the global launch of a self-assessment tool
Alexandra Peters, Pierre Parneix and Didier Pittet on the behalf of Clean Hospitals

Erratum

- 1705** Prospective evaluation of data-driven models to predict daily risk of *Clostridioides difficile* infection at 2 large academic health centers – ERRATUM
Meghana Kamineni, Erkin Ötleş, Jeeheh Oh, Krishna Rao, Vincent B. Young, Benjamin Y. Li, Lauren R. West, David C. Hooper, Erica S. Shenoy, John G. Guttig, Jenna Wiens and Maggie Makar

Full details may be found at: www.cambridge.org/about-us/rights-permissions.

Subscriptions

The individual subscription prices for 2023 are: Print & Online: \$305; Online Only: \$236. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Title: *Nile's Joy, Horses & Hope*, 2006

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

Artist: Nile Moss (1990-2006)

Medium: Tissue paper, stained glass technique

Nile's parents, Carole and Ty Moss, spoke to ICHE about his artwork.

What was the inspiration for this artwork? Nile began every morning with a loud announcement, "It's going to be such a great day!" At the end of the day, he would jump off the school bus and announce, "I had such a great day!" Nile's love of horses began very early in life thanks to his school's participation at a nearby therapeutic riding center. His horses brought him great joy and his faith gave him the hope and promise of a rainbow every day. This piece was inspired by the love Nile had for his horses, Tex and Clutch.

Why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*? Nile's art expression and techniques blossomed from August 2005 to April 2006 in his first high school art class. He returned home with this final creation on April 14, 2006. His life ended only days later when physicians failed to recognize the initial symptoms of sepsis caused by methicillin-resistant *Staphylococcus aureus* (MRSA) that he had acquired while receiving care in a local hospital. Nile's story represents the preventable harm that happens when people are unaware and unprepared to protect their loved ones and their patients. Patient safety begins with a robust bench of healthcare professionals, including healthcare epidemiologists, infection preventionists and antimicrobial stewards, that are given the knowledge, tools, training and support they need to do their work effectively. Our healthcare professionals deserve to feel joy and hope at the start of each new day, just as Nile did, and not doubt that their hard work saving lives is appreciated.

What is your personnel connection to the content of ICHE? When Nile died, our lives were changed forever. After researching the "why" and the "how," we decided to become a part of the solution to end preventable harm in honor of Nile. We became educated on the science of infection prevention to help inform and empower the public and educate healthcare professionals about what happens when healthcare facilities don't maintain a culture of safety and allow preventable healthcare-associated infections to occur. We celebrate his life every day by empowering the public and healthcare professionals with our story of prevention and action to end preventable healthcare harm.

Carole and Ty Moss are the founders and Executive Directors of Nile's Project, a non-profit organization founded in 2007 to end unnecessary deaths due to preventable hospital-acquired infections. Nile's Project works with survivors, families, healthcare professionals, public health officials, and other advocacy groups to increase public awareness and advocate for changes that will make the healthcare system safer. For more information, visit www.nilesproject.com.
