# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

#### *United States of America*

Orders for this Journal may be sent either through a local bookseller, or to MESSRS. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

O T I T I S M E D I A

DECONGESTION OSMOSIS  
WITH REMEDIAL ANALGESIA

DECONGESTION SUCCESSFULLY ACHIEVED by the addition of Ephedrine Sulphate which acting in synergy with the other ingredients produces shrinkage of the mucosa, promotes drainage from the middle ear and a rapid control of pain. The bactericidal constituents of Auralgin cover a wide range of micro-organisms including those likely to be present in otitis media, thus avoiding the danger of masking.

**AURALGIN** D.D.A.  
(BENGER)

*Each ml. contains*

Phenazonum	0.050 g.	Papaveretum	0.025 g.
EPHEDRINE SULPH.	0.01 g.	Chlorbutol	0.010 g.
Pot. Hydroxyquinolin Sulph.		0.001	
Glycer ad 1 ml.

**PRESCRIBE THE EASY EFFECTIVE METHOD**

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss  
ATOMIZERS**

**DROPPER ?**

**ATOMIZER ?**

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

FOR ORAL MEDICATION

**KERFOOTS  
Proflavine  
LOZENGES**

enable the affected tissues  
to be bathed in a naturally  
buffered antiseptic solution.

Each contains  
Proflavine Sulphate 3 mg.  
In bottles of 30 and 500

**KERFOOTS  
Sulphanilamide  
LOZENGES**

are of special value in  
throat affections due to local  
streptococcal infection.

Each contains  
Sulphanilamide gr. 1  
In bottles of 50 and 500

Professional samples on request.
