Cambridge **Core**

CAMBRIDGE
UNIVERSITY PRESS

- 602 The correspondence between drag enhancement and vortical structures in turbulent Taylor–Couette flows with polymer additives: a study of curvature dependence
J. Song, H. Teng, N. Liu, H. Ding, X.-Y. Lu & B. Khomami
- 617 Various approaches to determine active regions in an unstable global mode: application to transonic buffet
E. Paladini, O. Marquet, D. Sipp, J.-C. Robinet & J. Dandois
- 648 Effects of rotation on the bulk turbulent convection
F. Toselli, S. Musacchio & G. Boffetta
- 660 Transcritical flow over obstacles and holes: forced Korteweg–de Vries framework
R. H. J. Grimshaw & M. Malewong
- 679 Multiscale fluid–particle thermal interaction in isotropic turbulence
M. Carbone, A. D. Bragg & M. Iovieno
- S* 722 Instability of radially spreading extensional flows. Part 1. Experimental analysis
R. Sayag & M. G. Worster
- S* 739 Instability of radially spreading extensional flows. Part 2. Theoretical analysis
R. Sayag & M. G. Worster
- 772 An experimental and computational study of the post-collisional flow induced by an impulsively rotated sphere
S. A. W. Calabretto, J. P. Denier & B. Levy
- 794 A conjecture on the least stable mode for the energy stability of plane parallel flows
X. Xiong & Z.-M. Chen
- 815 Mapping the properties of the vortex-induced vibrations of flexible cylinders in uniform oncoming flow
D. Fan, Z. Wang, M. S. Triantafyllou & G. E. Karniadakis
- 859 Spreading and oscillation dynamics of drop impacting liquid film
X. Tang, A. Saha, C. Sun & C. K. Law
- 872 Dynamics and wall collision of inertial particles in a solid–liquid turbulent channel flow
M. Ebrahimi, R. Sean Sanders & S. Ghaemi
- 906 On the physical mechanisms of the two-way coupling between a surface wave field and a circulation consisting of a roll and streak
N. Suzuki
- 951 The effects of geometry and heating rate on thermocapillary convection in the liquid bridge
Q. Kang, D. Wu, L. Duan, L. Hu, J. Wang, P. Zhang & W. Hu
- 983 Simultaneous and sequential collisions of three wetted spheres
R. H. Davis
- 1010 Space–time formation of very-large-scale motions in turbulent pipe flow
J. H. Lee, H. J. Sung & R. J. Adrian
- 1048 Forced motion of a cylinder within a liquid-filled elastic tube – a model of minimally invasive medical procedures
A. Vurgaft, S. B. Elbaz & A. D. Gat
- 1073 Direct numerical simulations of Rayleigh–Bénard convection in water with non-Oberbeck–Boussinesq effects
A. D. Demou & D. G. E. Grigoriadis
- 1097 Decomposition of the forces on a body moving in an incompressible fluid
W. R. Graham
- 1123 Control of a purely elastic symmetry-breaking flow instability in cross-slot geometries
M. Davoodi, A. F. Domingues & R. J. Poole

JFM Rapids (online only)

- R1 Coherence resonance in low-density jets
Y. Zhu, V. Gupta & L. K. B. Li

S indicates supplementary data or movies available online.

- 1 Farewell to paper
M. G. Worster
- 3 Global instability in the onset of transonic-wing buffet
J. D. Crouch, A. Garbaruk & M. Strelets
- S 23 Proper orthogonal decomposition analysis and modelling of large-scale flow reorientations in a cubic Rayleigh–Bénard cell
L. Soucasse, B. Podvin, P. Rivière & A. Soufiani
- S 51 A tale of two airfoils: resolvent-based modelling of an oscillator versus an amplifier from an experimental mean
S. Symon, D. Sipp & B. J. McKeon
- S 84 Fast transient spray cooling of a hot thick target
F. M. Tenzer, I. V. Roisman & C. Tropea
- S 104 Drag reduction in boiling Taylor–Couette turbulence
R. Ezeta, D. Bakhuis, S. G. Huisman, C. Sun & D. Lohse
- 119 Elasto-inertial wall mode instabilities in viscoelastic plane Poiseuille flow
I. Chaudhary, P. Garg, V. Shankar & G. Subramanian
- 164 Edge tracking in spatially developing boundary layer flows
M. Beneitez, Y. Duguet, P. Schlatter & D. S. Henningson
- 182 Wave–vortex interactions, remote recoil, the Aharonov–Bohm effect and the Craik–Leibovich equation
M. E. McIntyre
- 218 Effect of sidewall on heat transfer and flow structure in Rayleigh–Bénard convection
Z.-H. Wan, P. Wei, R. Verzicco, D. Lohse, G. Ahlers & R. J. A. M. Stevens
- 244 Breakage, coalescence and size distribution of surfactant-laden droplets in turbulent flow
G. Soligo, A. Roccon & A. Soldati
- 283 Turbulence at the Lee bound: maximally non-normal vortex filaments and the decay of a local dissipation rate
C. J. Keylock
- 313 The hydroelastic response of a surface-piercing hydrofoil in multi-phase flows. Part 1. Passive hydroelasticity
C. M. Harwood, M. Felli, M. Falchi, S. L. Ceccio & Y. L. Young
- 365 Analytical study for swimmers in a channel
A. Farutin, H. Wu, W.-F. Hu, S. Rafaï, P. Peyla, M.-C. Lai & C. Misbah
- 384 Analysis of degenerate mechanisms triggering finite-amplitude thermo-acoustic oscillations in annular combustors
S. R. Murthy, T. Sayadi, V. Le Chenadec, P. J. Schmid & D. J. Bodony
- 420 On an analytical explanation of the phenomena observed in accelerated turbulent pipe flow
F. Javier García García & P. Fariñas Alvario
- S 462 Laminar–turbulent transition in channel flow with superhydrophobic surfaces modelled as a partial slip wall
F. Picella, J.-Ch. Robinet & S. Cherubini
- 498 Electrohydrodynamic settling of drop in uniform electric field: beyond Stokes flow regime
N. Behera, S. Mandal & S. Chakraborty
- S 524 Electrorheology of a dilute emulsion of surfactant-covered drops
A. Poddar, S. Mandal, A. Bandopadhyay & S. Chakraborty
- 551 Rapid distortion theory on transversely sheared mean flows of arbitrary cross-section
M. E. Goldstein, S. J. Leib & M. Z. Afsar
- 585 Grid criteria for numerical simulation of hypersonic aerothermodynamics in transition regime
X. Ren, J. Yuan, B. He, M. Zhang & G. Cai
